Agricultural experiments began at Rothamsted in Hertfordshire in 1843 and continue to this day. There are brief histories of Rothamsted and of the Lawes Agricultural Trust on the Rothamsted website [http://www.rothamsted.ac.uk](http://www.rothamsted.ac.uk)

About the catalogue
This catalogue is a revised and greatly expanded version of Rothamsted Archives: a catalogue of the records in the Library, Rothamsted Experimental Station, compiled by Margaret Harcourt Williams in 1987. The original investigation and cataloguing of the Rothamsted archives was made possible through a grant from the Leverhulme Trust in 1984; when this grant finished, continuing work on the archives was funded by the Lawes Agricultural Trust. We are grateful to both these organisations for their interest and support.

The terms of the 1984 grant restricted work to sorting and cataloguing the papers held in a single storeroom whose contents consisted largely of 19th century material from the work of Lawes and Gilbert, together with early to mid 20th century material from some staff members, especially from the Director EJ Russell. The entire Rothamsted historical archive was potentially much larger and since the publication of the original catalogue in 1987 it has more than doubled, as an extensive rebuilding programme prompted some departments to transfer their older material to the Library. However, other departments have opted to retain their archives so the Library does not currently hold the entire archive of Rothamsted Research and its predecessor bodies. In general, archives in departments have not been catalogued although some lists may be available.
The catalogue has been organised alphabetically by series, with each series preceded by a brief description of its contents and their provenance. There is no index but the entire catalogue can be searched by using the ‘find’ function in Adobe Acrobat Reader. However, it should be borne in mind that the catalogue contains descriptions of items in the archives, not transcriptions of their content, so names and subjects mentioned in the records themselves may not always be searchable. If a search produces no results, it may be worth browsing through relevant series to try to identify material of possible interest.

Scope and content of the archives
The earliest archives are from the time of Lawes and Gilbert (1843–1901). They include:

- archives of experiments begun in the 19th century ie experimental data with related notebooks and letters
- drafts and proofs for their numerous scientific papers
- bound volumes of correspondence
- a few personal papers.
- papers relating to the Lawes Chemical Manure Company
- papers relating to the Lawes Testimonial Laboratory.

Although scientific experiments began at Rothamsted in the early 1840s the organisation was not given a formal structure until 1889 when the owner and founder, Sir John Lawes, established the Lawes Agricultural Trust. Before this, there are no formal administrative archives and, even though after 1889 the Lawes Agricultural Trustees supervised the work here, it was largely directed by Sir John and his scientific partner Sir Henry Gilbert until they died in the early 20th century. Therefore there are no visitors’ books, records of appointments or similar records and most of the 19th and early 20th century archives here are scientific data and drafts of material for publications.

Other experimental work is illustrated by extensive archives from departments. These have been arranged by the first title of the department that produced them although, after closures and mergers, the current title may differ. Botany, Chemistry, Farm, Field Experiments, Meteorology and Woburn all produced extensive archives while smaller collections have been received from the Library, the Manor, Microbiology, Saxmundham and Tunstall, Statistics and Soils.

Administrative records include:

- a long series of archives of the Lawes Agricultural Trust
- a large collection, including numerous photographs, from EJ Russell, Director 1912 – 43
- small collections from other 20th century Directors
- archives of the Staff Union (a social club) and of the Friends of Rothamsted and related bodies
- small collections relating to awards, exhibitions, the Rothamsted site and the Society for Extending the Rothamsted Experiments.

There are personal papers from the 19th century scientists Robert Warington senior and junior and also a series of miscellaneous personal papers, some of which are
from former staff members and others from people with more distant connection to
Rothamsted.

Rothamsted Library does not normally collect archives but the archives do include
some largely 20\textsuperscript{th} century estate records, a gift from the Lawes family’s land agents,
and a small number of manuscripts relating to agriculture. This is what remains of a
collection made by EJ Russell, which has been dispersed.
Archives held by the Library are mostly boxed and stored on approximately 200 one
metre shelves. They are mainly paper, including plans and newspaper cuttings, but
they also include different types of photographs. At present, in 2010, there is very
little in other media.

**Consulting the Rothamsted Library Archives**
Rothamsted is a working Research Institute, and as such is not generally open to the
public, although we always welcome bona fide researchers who wish to use our
collections. However, the Library has a very small staff, so if you wish to look at any
of the items listed in the catalogue, please make an appointment by emailing the
Library at library@rothamsted.ac.uk or writing to the Librarian. To help you make the
most of your visit, please give us as much information as you can and please do
some preparatory work before approaching us. The Rothamsted website includes
information on the origin of Rothamsted, the Lawes Agricultural Trust and the
Classical and Long-term experiments and you can find other information from the
bibliography below.

Please note that all the archives kept in the Library are included in this catalogue,
although the amount of detail given varies. The individual series do not follow a
standard arrangement, due to the diversity of the material and length of time over
which it has been acquired. Some series are arranged chronologically while others
are sub-divided according to related materials or function. However, if something
you hope to find is not listed, it is more likely to be because it is not held by the
Library than because it has not been catalogued. Please look below for details of
related material at Rothamsted and related material elsewhere.

The reference codes given in the catalogue are also used for locating the
documents and you should quote these if you are ordering documents prior to a visit.
Most of the codes used in the 1987 catalogue have been altered. Although this
catalogue was never widely available, some of its references have been used in
published articles; if you come across these, please remember that they will have
changed. If what you want to see is not easily identified in the current catalogue,
please give us as many details as you can.

**Related material at Rothamsted**
All departments hold their own current and semi current records.

Biomathematics and Bioinformatics hold the archives of the former Statistics
Department.

VCU, formerly Photography, has an extensive collection of photographs, some
dating from the 19\textsuperscript{th} century, mainly taken during the course of work at Rothamsted.
Related material in Rothamsted Library
Printed papers by Lawes, Gilbert and other scientists, details on Rothamsted Library catalogue.

A large collection of bound miscellaneous pamphlets, many of which are offprints or photocopies. Partly catalogued, details on Rothamsted Library catalogue.

Rothamsted annual reports, 1908 - 2009.

Related material elsewhere
Hertfordshire Archives and Local Studies, http://calm.hertfordshire.gov.uk/calmview/ have Rothamsted estate records from the 1200s to the 1700s, and also family records, mainly from the 17th and 18th centuries. The relevant catalogues are D/Elw and D/Z55.

Bristol University, http://www.bristol.ac.uk/is/library/collections/specialcollections/ has the records of Long Ashton Research Station, which was once administered by Rothamsted.

Barking and Dagenham Archive and Local Studies Centre http://archiveshub.ac.uk/data/gb350-bd24 has records of Lawes Chemical Company Ltd. 1872-1970.

Gaps in the archives
There are only a few personal papers of either Lawes or Gilbert. The Lawes family may have taken their archives with them when they finally left Rothamsted in the 1930s or may have destroyed them; Mrs Gilbert took her husband’s papers with her when she left Harpenden. She returned some books and letters later but these are scientific not personal.

There are very few 19th century estate records at either Rothamsted or HALS.

There are very few early records of the Lawes Chemical Manure Company.

There is no lengthy correspondence from other scientists to either Lawes or Gilbert although there are some letters, mainly to Gilbert.

Further reading

Grey, E. (1922) Reminiscences, tales and anecdotes of the laboratories, staff and experimental fields, 1872 – 1922. (available to read on line at http://www.archive.org/details/rothamstedexperi00greyuoft)
Grey, E. (1934) Cottage life in a Hertfordshire village: "How the agricultural labourer lived and fared in the late '60's and '70's". St.Albans, Fisher Knight & Co.

Previous catalogues

Rothamsted Archives: a catalogue of the records in the Library, Rothamsted Experimental Station, 1987, has been completely superceded by the present web based catalogues and should not be used to identify any of the archives. It reflected the composition and arrangement of the archives in 1987. Since then the collection has more than doubled in size, reference codes have been altered and some series rearranged.

Rothamsted letters: a catalogue of the correspondence of Sir John Lawes and Sir Henry Gilbert, 1989, is now available on the internet. Search the Library catalogue to find a link to the document.

LAT1-9 Lawes Agricultural Trust: foundation and administration, 1889-mid 20th century

LAT10-19 Lawes Agricultural Trust: minutes 1931-1940

LAT20-29 Lawes Agricultural Trust: financial papers 1900-

LAT30-49 Lawes Agricultural Trust: miscellaneous financial records 1889-

LCMC Records relating to the Lawes Chemical Manure Company mid 19th- mid 20th century, including Lawes’ Super-Phosphate Patent suit

LIB Library records, 1940s – 1990s, including material relating to rare books, the livestock print collection and manuscripts

LTL Lawes Testimonial Laboratory

MAN Rothamsted Manor, including photographs, plans, newspaper and magazine cuttings, inventories, correspondence about Manor paintings etc., mainly 20th century

MET Meteorological and drainage records for Rothamsted, Woburn and Saxmundham mid 19th century onwards

MIC Microbiology 1950s – 1980s. Scientific papers of Dr Barbara Mosse

MSS Manuscripts relating to agriculture, 17th – 19th centuries, collected by Sir John Russell, including papers and correspondence of Sir John Sinclair and Sir Joseph Banks

PC 19 bound volumes of letters and papers relating to Rothamsted experiments. Many are replies to letters from JH Gilbert, but the index (PC20) is inadequate: 1840s-1890s

PHO Miscellaneous photographs (including non-Rothamsted images) mainly mid 19th-mid 20th century, many collected by Sir John Russell

PROD Production papers for work by JB Lawes and JH Gilbert, 1840s – 20th century

RB Documents received from Rumball and Sedgwick, Estate Agents, relating to the management of the Rothamsted Estate mid 19th-mid 20th century
RUS  Papers of Sir (Edward) John Russell, at Rothamsted 1907-1943; Director 1912-1943, including administrative papers, correspondence, travel diaries and photograph albums

RWJ  Personal and scientific papers of Robert Warington, junior (1838-1907), at Rothamsted and JB Lawes’ London factories mid-late 19th century

RWS  Scientific papers of Robert Warington, senior (1807-1867), chemist

SERE Papers relating to the Society for Extending the Rothamsted Experiments 1904-1956

SITE  Plans and documents relating to Rothamsted buildings and site development 19th – 21st centuries

SOIL  Production papers and data relating to work by Soil Science staff in 1980s and 1990s

ST  Saxmundham and Tunstall records transferred to Rothamsted in 1998 and 1999

STA  Committee minutes, financial and administrative records for the Staff Union/Sports and Social Club 1919 – mid 1990s. (AGM minutes to present day). Some general staff administrative records

STATS  Partial records of the Statistics Department (now Computational and Systems Biology); the majority of the Statistics archive is held by CSYS

STF  Records of individual Rothamsted staff, including Edwin Gray, Winifred Brenchley, Mary Glynne, Frank Yates

WOB  Administrative papers and records of experiments at Woburn Farm and Woburn Fruit Farm

XTRA  Miscellaneous small collections

Updated 21 December 2011
AD Hall took charge at Rothamsted shortly after the deaths of the founders and after a brief period during which JA Voelcker had had temporary charge. Rothamsted expanded under Hall’s direction, with new appointments including a bacteriologist, a botanist and a soil chemist. Hall’s classic work *An Account of the Rothamsted Experiments* was published in 1905. He left in 1912 to become full-time Development Commissioner of the Board of Agriculture.

Hall’s archive at Rothamsted is small and relates mostly to external work.

**ADH1** Notebook, largely figures, relating to experimental work at Rothamsted, 1901. *One volume*

**ADH2** Notebook used at Wye College, Kent by AE Ashford, GE Pilgrim and possibly also by AD Hall, early 20th century. *One volume*

**ADH3** Reports of the Home Grown Wheat Committee of the National Association of British and Irish Millers, of which AD Hall was a member, 1903 – 11. *One bundle*

**ADH4** Original diagrams and data used for ‘An Account of the Rothamsted Experiments’, 1905. *One bundle*

**ADH5** Papers relating to AD Hall’s work as secretary of Section VII, agricultural chemistry, of the 7th Congress of Applied Chemistry, 1909. *One box*

**ADH6** Production papers for Report on the Soils of Kent, Surrey and Sussex by AD Hall and EJ Russell, London HMSO, 1911. *Five bundles*

**ADH7** Tables, plans and letters about a survey of pastures on Romney Marsh, early 20th century. *One bundle*

**ADH8** Cuttings of AD Hall’s contributions to *The Countryman*, 1935 – 42. *One envelope*

**ADH9** Commemorative diplomas from the Franco-British exhibition, 1908, the Japan-British exhibition, 1910 and the Turin International exhibition, 1911. *Four items with JBL2.7*

**ADH10.1** Photograph c1910. *Framed*

**ADH10.2** Portrait etching by CH Barraud, 1938. *Framed*

Rothamsted, its directors and its scientists have received commemorations and awards since John Bennet Lawes was presented with a testimonial from British farmers in 1854/5. This small collection of awards and related administrative papers does not contain all the awards given to Rothamsted or its staff from the mid 20th century onwards but only those transferred to the Library.

**AWA1**  
**Queen’s Awards**  
**AWA1.1** Queen’s Award for Technological Achievement, 1976, 1980. *Two certificates, stored loose on shelf at base of AWA boxes; a container is stored in box with AWA1.1; two photographs of award presentation 1976 in box. The Awards are stored by the Librarian and the Rothamsted Archive of Scientific and Other Equipment includes a textile with the Queen’s Award logo*  

**AWA1.2** Queen’s Award magazine, with details of work at Rothamsted, 1976. *One item*

**AWA2**  
**Other awards**  
**AWA2.1** Lenin All-Union Academy of Agricultural Sciences, Moscow: 125th Anniversary greetings, 1968. *One folder*  
**AWA2.2** ICIPE (International Centre of Insect Physiology and Ecology), Nairobi: Award of Excellence, 2016. *One folder*  
**AWA2.3** Guinness World Records: longest running scientific experiment certificate, 2016. *One folder*  
**AWA2.4** Royal Agricultural Society: 150th Anniversary Commemorative Medal, 1993. *One framed medal*

**AWA3**  
**Administrative papers**  
Director’s correspondence and related papers and booklets on British Technology Group Awards, Albert Einstein World Science Award and Wolf Foundation Prize, Genstat and Pyrethrin Inventors’ Awards, Pollution Abatement Technology Award, Queen’s Awards, UNESCO Science Prize, 1970s – 90s. *Eight folders; closed*

Rothamsted’s 150th anniversary in 1993 was marked by a series of publications and commemorative events both at Rothamsted and elsewhere, eg the Royal Society. The most significant event was the Queen’s visit, during which she consented to becoming a patron of Rothamsted.

The small archive AY1 is divided into papers received from the co-ordinator and those received from departments.

**AY1.1 John Stevenson, 150th anniversary year co-ordinator**

Notes, minutes, circulars, arrangement details etc for Open Day 1989; for Open Weekend, Queen’s Visit, Staff Party and Royal Show 1993; for the 1993 committee and for possible and actual scientific and special events.

150th anniversary conference abstracts with presentation folder; anniversary booklet; SPRUCE conference abstracts; The Agronomist number 3, 1993 with an article on Rothamsted; T Lewis ‘150 Years of Research at Rothamsted’ from JRASE volume 153, 1992; Gardeners’ Question Time recording.

*Three bundles*

**AY1.2 Staff and departments**

Circulars to heads of departments, calendars of events and minutes of meetings of departmental representatives and of the 1993 committee, none of which is a complete series.

Programmes, correspondence with Director, handouts, guest lists etc for Lawes lunch, 150th anniversary concert, Open Weekend, retired staff party, summer ball, Royal Society reception, Royal Show, 150th anniversary conference, service of thanksgiving, Queen’s visit, 1843 dance, classical ale, restoration of JB Lawes’ and JH Gilbert’s graves, SPRUCE conference, photographs of anniversary conference including photographs of Trevor Lewis receiving Liebig medal from Liebig’s great-great-nephew.

*Two folders of photographs, one solely of the Queen’s visit; one folder of press cuttings of Queen’s visit; one box of miscellaneous papers, largely unsorted*

**AY1.3 Souvenirs**

Calendar, 1993. *Two copies, stored near AY boxes. Other souvenir items are held by the Rothamsted Archive of Scientific and Other Equipment in 2011*

**AY2 Park Grass**

‘A celebration of 150 years of the Park Grass Experiment’: explanatory leaflet (2006), invitation, programme and attendees list. *One folder*

**AY3 Rothamsted Insect Survey**

Rothamsted Insect Survey 50th Anniversary: programme, leaflets, sample certificate, 2014. *One folder*
AY4 175th Anniversary Festival of Ideas 23-24 June 2018
Publicity material, programmes, magazine articles and artefacts
including t shirt, passport stamps, wrist band, ruler and keyring. One
box

email: library@rothamsted.ac.uk
Lawes and Gilbert carried out botanical work through their analyses of samples from the Park Grass experiments and in 1906 Winifred Brenchley, the first woman scientist to work at Rothamsted, was appointed to the staff as a botanist.

As the scope of work at Rothamsted increased in the early 20th century a departmental structure became necessary and the Botanical Laboratory is listed in the 1913 Annual Report. This became the Botany Department which subsumed a separate Crop Physiology Department in 1948. It ceased to exist in the early 1980s when most of the work was transferred to the Biochemistry Department or the newly created and short lived Physiology and Environmental Physics Department. More ‘traditional’ botanical research, including weed science and surveys of the flora of Park Grass continues in other departments.

The work of the Botany Department is described by EJ Russell in A History of Agricultural Science in Great Britain. Most of the archives below are staff notebooks and botanical surveys.

**BOT1, BOT2 Staff**

**BOT1.1 – 14** Notebooks of W Brenchley, early 20th century to early 1940s, including work on water culture, weed seeds on Broadbalk, pot experiments on nutrition and minor element work. 138 notebooks of similar format, numbered 1 to 802, many numbers unused, plus one larger notebook.

**BOT1.15** Lists of contents of BOT 1.1 – 14. *One folder*

View the lists at:

http://www.rothamsted.ac.uk/sites/default/files/groups/Library_and_Information_Services/Botany_notebooks.pdf

**BOT1.16** W Brenchley’s notes from weed surveys, c1910 – c20. *Two boxes*

**BOT2.1** W Brenchley’s lists of species found on Harpenden Common with plan and account of work on Harpenden Common vegetation, 1906, 07 and after 1916. *One folder*

**BOT2.2** W Brenchley’s notes on seed soaking experiments, 1920s. *One folder*

**BOT2.3** Weed pictures drawn by Miss Salisbury for Weeds in Farmland by Brenchley and Long, c 1916. *Two parcels*

**BOT2.4** Notebooks analysing work on weed flora and weeds in farmland by Brenchley, Thurston and others, 1920s onwards. *Three boxes, one partly open.*

Chemistry department: much of the work done by Lawes and Gilbert in the 19th century could come under a broad heading of chemistry, especially that relating to soils and plant nutrition. Similar work continued throughout the 20th century and to the present day. Classification of some archives, especially those relating to departments, can be arbitrary or subjective because of changes in the organisation of research, which often results from changes in emphasis.

In the early 20th century, the Goldsmiths' Company gave a grant for the appointment of a soil chemist at Rothamsted. All the archives below were either originally stored as Chemistry Department Archives and transferred to the Library Archives as such, or were transferred by members of the successor departments. Most of them are working notebooks, data and papers of department members.

The Library Archives holds numerous reports from the late 1930s to the 1960s prepared by Rothamsted scientists. There is a list of titles and authors at CHEM8

**CHEM1**  Notes on received 1994
These include exercise books, notebooks of different sizes, pocket books and binders. They are all described as notebooks for the purpose of this list. The list below is based on the personal names from the outside of each bundle and the numbers and other details have been copied from the outside of each book, where these exist.

The notebooks are in good condition. The brown wrapping paper in which they came to the Archives has been destroyed but labels and other identifications have been kept. Each entry represents one of the bundles unless otherwise indicated.

**CHEM1.1**  SP Aiyer, JA Black, F Steenberg, 1930s: clays, phosphates and untitled. GC Sawyer, 1913: weights and balances, notebook numbered 216. *Seven notebooks*

**CHEM1.2**  WO Atkinson, 1903 – 5: flour and untitled. *Four notebooks*

**CHEM1.3**  JK Basu, late 1920s: C/JKB 1 – 18, base exchange and pH values, donnan equilibrium, electro dialysis, PG exchangeable bases, Woburn exchangeable bases, lime requirement, mechanical analysis and untitled. *18 notebooks*

**CHEM1.4**  AH Bowden, 1920 – 36: APC rain samples, blanks on nitrogen stills, miscellaneous N samples, miscellaneous samples, nitrate plot observations, nitrogen and dry matter in potatoes, nitrogen in barley samples, straw, potato samples, Woburn green manuring and untitled. *23 notebooks*

**CHEM1.5**  AH Bowden, early 1940s: 913, 932 CR untitled, 927 CR APC rain samples, 979 CR APC rain samples. *Four notebooks*
CHEM1.6  EM Crowther, c1915 – 20s: 302, 344, 364, 434 Weston cells, 462, 469, continued from 434, 524 soil from F Wakerley, 576 Harpenden Common, 632, bicarb work charts, collected pH and titration curves, energy relationships on Broadbalk, flue dust, grass plots and pH, immersed float, inverted tin method, liming experiments, nitrification, nitrogen and dry matter in barley, nitrogen in mustard, potatoes, samples stored away, soil CaCO₂ water experiments, suction moisture equivalents, summary of electrometer pH results, treatment of bicarb results, treatment of sedimentation, wart disease, weights and untitled. 53 notebooks in three bundles

CHEM1.7  WA Davies, 1912 – 5: yeast. Nine notebooks, including one from AJ Daish

CHEM1.8  WA Davies, 1913 – 6: notebooks numbered 242, 273 (Carlo Mendes) 281, 282, 311 (GC Sawyer) 318, analyses of sugar and illegible. Eight notebooks plus a few loose pages

CHEM1.9  HO Ghani, 1936 – 8: chem M.O.G., summarised results A – D. 17 notebooks

CHEM1.10  E Grey, B Weston and JJ Willis, 1901 – 21: mangolds, roots and leaves, swedes, turnips plus B Weston’s ‘time book’ a notebook including starting times, subscriptions, receipts and payments 1920 – 1. 19 notebooks; these were transferred to the Library Archives with rest of CHEM1 but belonged to support staff (the field superintendent, the farm manager and the field superintendent) and not to scientists.

CHEM1.11  HJG Hines, 1920s: carbon, Gold Coast soils, nitrogen, potatoes, Woburn sugar beet and untitled. Nine notebooks

CHEM1.12  HJG Hines, 1920s: barley, colorimetric data, sugar beet and untitled, possibly referring to basic slag. 20 notebooks including one from AJ Walker and two from JJ Brereton, plus loose pages

CHEM1.13  E Horton, 1913 – 5: 222, 265, 291, 310, all untitled. Four notebooks

CHEM1.15  HW Lawrence, 1891 – 1901: nitrogen determinations. 5 notebooks numbered 1 – 5 with note saying book 6 of this series may have been destroyed ‘with the N calculation books nos 1 – 60’; ‘Laboratory Book Mr Lawrence’s Particulars of
Pulping Mangels, Sugar-beet and Swedes, 1898 – 1908. *One small notebook*

**CHEM1.16**
AH Lewis, 1926 – 7: Gezira 1 - 3, I-III. *Six notebooks*

**CHEM1.17**
FA Manning, 1850s: 6 – 10, progress of analysis and untitled. *15 notebooks in three bundles including notes, possibly by Vaux, on sheep experiments*

**CHEM1.18**
NHJ Miller, late 19th, early 20th century: *Three bundles of 17 untitled notebooks and six other notebooks with label ‘chemical analyses and various subjects’.*

**CHEM1.19**
NHJ Miller and JJ Willis, 1890s, early 1900s: wheat hybridation experiments and untitled but identified inside as vegetation and pot plant experiments. *Six notebooks*

**CHEM1.20**
ES Moore, 1915 – 6: raffinose, soils. *Two notebooks*

**CHEM1.21**
G Nagelschmidt, late 1920s – 40s: dehydration curves, fluorin determinations, shale experiments, F1 – F3 and untitled. *14 notebooks*

**CHEM1.22**
AG Norman, 1930s: decompositions, forage crops 1 – 3, hemicelluloses I-IV (one from JG Shirklands) old motor tyres, pectin 1. *10 notebooks*

**CHEM1.23**
HJ Page, early 1920s: general literature record, 438 humus, 448 green manuring, 479 nitrogen cycle, 483 various analyses, 549 untitled. *Five notebooks*

**CHEM1.24**
HT Richardson, 1926 – 33: analyses, cynamide mustard pots, cynamide storage, experimental, field, germination, grass, leaching, nitrogen uptake, Park Grass, Park Grass II and III, references, soil ammonia and nitrate, winter cynamide decomposition. *16 notebooks*

**CHEM1.25**
R Warington, 1870s – 80s, early 1900s: 2 Warington and WA Peake, 3 WA Peake, 4 unidentified, 5 WA Peake, 5 (sic) 6, 7 Rothamsted Laboratory Nitrogen Determinations by E Grey. *Seven notebooks; see series RWJ, papers of Robert Warington junior, 1838 – 1907 for other Warington notebooks*

**CHEM1.26**
AJ Walker, late 1920s: ammonia and urea, germination experiments, nitrates and untitled. *Five notebooks*

**CHEM1.27**
A Walkley, 1900 – 33: C&N, CO₂, hypobromite, nitrogen and carbon, Robinson carbon etc. *32 notebooks including one from JA Black, labelled CO₂.*
CHEM1.28  
RG Warren, 1926 – 37 and Joan Hellyer 1938 – 9: basic slag pot experiments, calcimeter, chemistry carbon determinations, N on sugar beet, phosphate, saturation capacity, carbon for Mr Weston. 21 notebooks plus loose pages

CHEM1.29  
W Williams, 1920s: 601 replaceable bases, other notebooks untitled or with titles referring to Broadbalk, Park Grass, Woburn, East Halton and Alkborough. 14 notebooks

CHEM1.30  

CHEM2  
Archives transferred in summer 2000

CHEM2.1  
Analysis sheets 1 – 7896. 1 – 3000 and S7003 – S7846 are in folders and the remainder are loose; some numbers are missing. 10 boxes; see also Warren

CHEM2.2  
CR589 – 1391 (some numbers missing) plus two volumes with titles 'K fixation' and 'determination of potassium with CaCl2, determination of calcium & magnesium with E.D.T.A'. 18 boxes

CHEM2.3  
C1 – 25 (all numbers, plus C7a, C9a, C12a, C12b, C15a, c15b, C21a, C21b): data from the Classical Experiments, some of which probably duplicate items in the PROD series. Box 12b contains botanical notebooks from the 1860s and 1870s, which may overlap with items in EXP 4.11. 32 boxes; some of the files in the second box marked C9 may belong elsewhere. They have been kept together as they were received together. An undated note on the original box said 'C30 transferred to box containing B17 etc.'

CHEM3  
Miscellaneous

CHEM3.1  
Outside Experiments 1941: town refuse series, Tunstall liming 10th season; Sugar beet NPK observations; NPK school microplot series. One binder

CHEM3.2  
Proposals for Barnfield and Drainage – Barnfield Pit, c1973. One envelope

CHEM4  
Weighbridge books and surveys

CHEM4.1.1  
H1  
Weighbridge books for root crops, mainly Barnfield mangolds, 1870s – 1920s. One box

CHEM4.1.2  
Weighbridge books for hay, 1929 – 41 and roots, 1932 – 52. One box
CHEM4.2  CW1
Correspondence, data, reports and sampling instructions for commercial wheat, 1933 – 9, plus one folder on commercial oats, 1936 – 7. One box

CHEM4.3  Data for precision barley at Rothamsted and precision oats at Harper Adams, 1930s. One box with contents labelled ‘from stats. Lab 1940’

CHEM4.4  Data for the National Wheat Survey, 1960s. One box

CHEM5  Archives of staff members
CHEM5.1  John Bolton
Data etc relating to work on R&W CS (Crop Sequence) 10 experiments and on trace elements and speciation liming effects. Six boxes

CHEM5.2  AH Bunting
CHEM5.2.1  Correspondence, figures and reports on experiments by AH Bunting and others on use of town refuse and sewage as fertilizer, 1940s. 14 folders in poor condition in one box

CHEM5.3  EM Crowther
CHEM5.3.1  Conference of Advisory Chemists Fertilizer Sub-Committee: papers relating to the allocation of fertilizers in wartime, 1941 – 4. 16 folders from box previously labelled ‘Draft allocation of fertilizers’ with former numbers 98 and 125; one folder labelled ‘Secret: Min. Agric. Conference on Allocation of Fertilizers’ found in office move 2016.

CHEM5.3.2  Letter from Crowther to the Ministry of Agriculture and correspondence between Crowther and Mann on work at Woburn, 1941 – 52. Four folders previously labelled ‘Woburn’ with former numbers 80 and 132.

CHEM5.3.3  Biology War Committee and Pirie Sub-Committee: minutes, agenda and memos, 1942 – 3. 10 folders from box previously labelled ‘Allied Post War requirements bureau’ with former numbers 64B and 136.

Rothamsted Research - Archive Catalogue
CHEM5.4  NHJ Miller
Details of work on rainfall and atmospheric pollution, including notes on the work of others from the 1840s onwards, 1880s – 1920s; monthly tables on Rothamsted rainfall, 1870s to 1915; letters and tables on countrywide and worldwide rainfall and pollution, late 19th and early 20th centuries; reports and circulars of the Committee for the investigation of Atmospheric Pollution, 1906 – 20. Two boxes

CHEM5.5  HL Richardson
Two bundles of notes and results from experiments on nitrates, 1930s, 40s (including data from Classical Experiments). One box

CHEM5.6  RG Warren
CHEM5.6.1
Crops analysis, 1930s – 50s; soil analysis, 1930s – 50s; trace element analysis, 1953 – 4. 18 files from box previously labelled 'files on analysis'

CHEM5.6.2
Analysis of bulky organic manures, 1930 – 60s. 16 files from box previously labelled 'bulky organics analysis'
Phosphate experiments, bulky organic manure experiments and concentrated organic manure experiments, 1930s – 50s. Seven files from box previously labelled 'reprints, crops, weeds'.

CHEM6  Reference Plots
CHEM6.1
Rothamsted Reference Plot 1, 1959 – 86. Five green binders and one pink binder
CHEM6.2
Rothamsted Reference Plot 2, 1960 – 85. Five binders
CHEM6.3
Woburn Reference Plots, 1960 – 79. Five green binders and one blue binder
CHEM6.4
Grazed Reference Plots, 1959 – 73. One binder
CHEM6.5
Rothamsted Reference Plots, Crops, 1956 – 75. One binder
CHEM6.6
All Reference Plots, 1950s, 1960s. Two binders, one black, one red

CHEM7  Lists
All photocopies, originals held by Andy Macdonald.
List of Laboratory notebooks commencing 1902: 1 – 802, with many gaps, 1903 – 35. Some notebooks listed are among CHEM1.1-CHEM1.30.
‘List of numbered notebooks in the Botanical Department’: numbers 3 – 805 on the numbered notebooks list, with many gaps, 1903 –35, some notebooks listed are now in BOT1 in the Botany department records.
‘List of numbers in Chemistry Routine (CR) notebooks, 806 – 1416’: some notebooks listed are in CHEM2.2, 1936 – 99.
‘List of notebooks used for farm samples’, numbers 1–26, 1929 – 35

P.5b Superphosphate Water Soluble Phosphoric Acid (no more details). All the lists are in one bundle, stored loose

CHEM8

Reports on work by Rothamsted staff, especially EM Crowther, for RES and other bodies, eg the ARC, late 1930s – 1960s.

Three boxes:

Box 1

ARC

Report to ARC on investigations in 1942 on the manurial value of sewage sludge and other organic manures, ARC 6927. Crowther

Report to ARC on investigations on organic manures in 1943. Crowther

Reports of the results of experiments on predrilling of fertilizer for peas, 1950, 1951, ARC 12463 and ARC 882/51. Cooke, Reynolds,

ARC Conference on the production and storage of carrots

Fertilizer experiments on carrots during 1941 and 1942: report on results, ARC 7210. Crowther

ARC Conference on sewage sludge and compost

Interim report on investigations at Rothamsted, 1943 – 4, ARC 7678. Crowther

Draft memo on the agricultural use of sewage sludge and sludge-straw compost, 1947, ARC 9533. Crowther

ARC Conference on mineral deficiencies in agricultural and horticultural crops

Deficiency diseases of the sugar beet, ARC 7828. Hale

Report on plant tissue tests carried out during 1944, ARC 7829. Greenhill.

ARC Conference on methods of fertilizer application to agricultural and horticultural crops

Report on field experiments on potatoes in 1947 with the NIAE fertilizer placement machine, ARC 9771. Cooke

Report on field experiments on row crops carried out in 1947 with the NIAE fertilizer placement machine, ARC 9772. Cooke
Report on fertilizer placement experiments on peas and beans carried out in 1947, ARC 11356. Cooke

Reports on field experiments on row crops carried out in 1948 and 1949 with the NIAE fertilizer placement drill, ARC 10570, 11666. Cooke

Reports on field experiments on herbage crops carried out in 1950 with the NIAE fertilizer placement drill, ARC 12383. Cooke and Widdowson

**ARC Conference on fertilizers**

Reports on field experiments on herbage crops and row carried out in 1951 with the NIAE fertilizer placement drill, ARC 881/51. Cooke and Widdowson

Report on experiments carried out in 1951 to compare alternative methods of applying fertilizers for potatoes planted by machines, A994/51. Cooke, Jackson, Widdowson

Reports on field experiments on kale carried out in 1950 and 1951 with the NIAE fertilizer placement drill, ARC 1001/51. Cooke and Widdowson

Report on experiments carried out in 1952 to compare alternative methods of applying fertilizers for potatoes planted by machines, A798/52. Cooke, Jackson, Widdowson

Report on fertilizer placement field experiments carried out in 1952 on horticultural crops, ARC 799/52. Cooke, Jackson, Fairbank, Goodway

Report on fertilizer placement field experiments on beans and lucerne carried out in 1952, ARC 800/52. Cooke, Jackson, Widdowson,

Alternatives to superphosphate: a report on visits to France, Belgium and Holland in summer 1952, ARC802/52. Cooke.

Reports on experiments carried out in 1952 on spring wheat and barley to compare nitrophosphate and superphosphate, ARC 803/52. Cooke, Jackson, Widdowson

Interim report of 1952 field experiments on potatoes and grass testing phosphate fertilizers, ARC 848/52. Cooke

Second interim report of 1952 field experiments testing phosphate fertilizers. ARC 440/53. Cooke
Report on fertilizer placement field experiments carried out in 1953 on horticultural crops, ARC 660/53. Cooke, Widdowson, Wilcox, Fairbank, Goodway

Report on experiments carried out in 1953 to compare alternative methods of applying fertilizers for potatoes. ARC 661/53, Cooke, Widdowson, Wilcox

Reports on experiments carried out in 1953 on spring wheat and barley to compare nitrophosphate and superphosphate, and on one experiment on spring beans comparing di-calcium phosphate with superphosphate, ARC 662/53. Cooke, Widdowson, Wilcox

Report on fertilizer placement field experiments on lucerne carried out in 1953, ARC 663/53. Cooke, Widdowson, Wilcox

Interim report of 1953 field experiments on potatoes and grass testing phosphate fertilizers, ARC 664/53. Cooke

Report on 1954 experiments on cereals comparing nitrophosphate and superphosphate, combine-drilling and broadcasting of ammonium sulphate, and on one experiment testing heavy nitrogen dressings on spring beans, ARC 689/54. Cooke, Widdowson, Wilcox

Report on experiments carried out in 1954 to compare alternative methods of applying fertilizers for potatoes. ARC 691/54, Cooke, Widdowson, Wilcox

Report on 1955 experiments comparing placing and broadcasting of nitrogen, phosphorus and potassium fertilizers for potatoes, peas, beans and kale, ARC 636/55. Cooke, Widdowson

Report on 1955 experiments on winter and spring sown cereals, comparing methods of application of nitrogen and potassium fertilizers, forms of nitrogen fertilizers, and on one experiment on spring beans, ARC 637/55. Cooke, Widdowson

Comparisons between alternative forms and methods of application of nitrogen fertilizer for potatoes and kale, ARC 638/55. Cooke, Widdowson

Report on 1956 experiments comparing placing and broadcasting of nitrogen, phosphorus and potassium fertilizers
for potatoes, peas, beans, kale and maize. Widdowson, Penny, Cooke

Report on 1956 experiments on winter and spring sown cereals, comparing methods of application of nitrogen and potassium fertilizers, forms of nitrogen fertilizers, ARC 182/57. Cooke, Widdowson

**ARC Conference on fertilizer placement**

Report on Rothamsted cereal experiments, 1943 – 4, ARC 7784. Crowther

Report on fertilizer placement trials carried out in 1943 – 4 by TD subcommittee, ARC 7785. Crowther

Report on fertilizer placement trials on cereals carried out in 1944 – 5 by TD subcommittee, ARC 8412. Crowther

Report on field experiments conducted in 1945 with the NIAE fertilizer placement machine. Cooke

Report on field experiments on potatoes conducted in 1946 with the NIAE fertiliser placement machine, ARC 9035. Cooke

**Box 2**

**MAF Conference on fertilizer placement**

Report on TD sub-committee trials on fertilizer placement: 1943 spring sown trials. Crowther

**MAF Flax Manuring Experiments**

Reports, 1940 – 4. Crowther, Cullen

**MAF Sugar Beet Research and Education Committee**

Committee paper 184, 214, 233, 259

**MAF Department of Agriculture for Scotland Sugar Beet Research and Education Committee**

MAF Sugar Beet Research and Education Committee
Irrigation Sub-Committee
Report on Irrigation Experiment, 1947, 1948, 1949, 1950,
summary 1947, Committee papers 219, 236, 257

MAFF National Agricultural Advisory Service Conference of
Soil Chemists
Field Experiments on Phosphate Fertilizers, 1954 – 7,

Ministry of Supply
Field experiments on phosphatic fertilizers and liming materials,
1943 – 8: report parts 1, 3, 4, 6 – 9 and interim reports.
Crowther, Cooke

Fertilizer value of ground rock phosphate and other phosphatic
fertilizers, report on investigations, 1941.  Crowther

Phosphatic fertilizers in relation to soil characters, field
experiments on Swedes and potatoes, part 5 of report on
investigations, 1941 – 3.  Crowther

Field experiments on the fertilizer value of high-temperature
phosphates and mineral phosphates, interim report 1942.
Crowther

Pot experiments on blast furnace and other slags, part 2 of
report on investigations, 1943.  Crowther

Committee on nutrition problems in forest nurseries
Summary of report of 1945 experiments.  Crowther

Conference of Advisory Chemists Liming Committee
Reports on results of field experiments, 1945 – 8, LSC 6, LSC 8,
LSC 11.  Crowther

Agricultural Improvement Council
Report on the results of fertilizer experiments on peas, 1946,
1947, 1949.  Cooke, Crowther, Reynolds

Reports on deep ploughing experiments, 1944 - 6, Russell.

Box 3
Rothamsted Experimental Station
Interim report, summary and report on the RASE experiment on
the residual manurial values of cake fed to grazing cattle, 1937 –
44.

Report on field experiments on Hyganic, 1938.

The relative values of nitrate of soda and sulphate of ammonia, 1945. Crowther, Benzian

Oil Palm Yellowing Disease: report on septrochemical analyses of leaf samples, 1945. Hale

Agricultural value of silicophosphates, 1940s: report parts V and VI. Crowther, Warren, Nagelschmidt, Cooke

**Rothamsted Experimental Station Chemistry Department**

Comparisons of ammonium sulphate, calcium nitrate and urea for potatoes and kale, part 1, 1957. Widdowson, Penny

Report of experiment comparing formalised casein compared with other forms of nitrogen on second year Italian ryegrass: report, 1957. Shaw, Widdowson

Report on 1957 experiments on winter and spring sown cereals, comparing methods of application of nitrogen and potassium fertilizers and forms of nitrogen fertilizers, 1959. Widdowson, Penny, Williams

Fertilizer experiments on winter wheat and spring barley and on cereals, 1958 – 65, CD/F/1/59 – CD/F/1/64, CD/F/1/66. Penny, Widdowson, Williams

Fertilizer experiments on kale, main-crop potatoes and grass, 1958 – 65, CD/F/2/59 – CD/F/2/65, CD/F/3/60. Penny, Widdowson, Williams

**Rothamsted and Woburn**

Experiments on Krilium, 1952

**Oil Palm Manurial Experiments**

Reports 1, 2, 6, 7, 11 and 12: N'Dian, Cowan and Kangala Experiments, 1940 – 9. Crowther, Benzian, Ferguson, Haines.

**Colonial Products Advisory Bureau**

Report on the Pyrethrum Industry of Kenya and Tanganyika with reference to research and analytical control 1953. Furlong, Potter; C Potter was head of the Rothamsted Insecticides and Fungicides department.

**CHEM9**

Archives transferred autumn 2009

Saxmundham computer sheets for 82/S/RN/2, 1974 – 82. One parcel labelled ‘duplicates’ and ‘AE Johnston’.

*Rothamsted Research - Archive Catalogue*

email: library@rothamsted.ac.uk
The Rothamsted directors from the mid 1940s to the late 1980s were:

- Sir William Gammie Ogg, 1943 – 58
- Sir Frederick Bawden, 1958 – 72
- Sir Leslie Fowden, 1973 – 88

Unlike Sir John Russell, Ogg’s immediate predecessor, they did not leave large quantities of personal and administrative papers in the Library Archives.

There are no papers of the directors after K Trearne, ie since 1989, in the Library Archives.

The documents described below have not been numbered individually in case others are found and sent to the Library Archives.

**DIRS1**  
**WG Ogg**
Correspondence on training agricultural research workers, farewell party for E Havelock of the ARC, fertilizer bags, fungicides, Russian teaching by Dr Novakowski and general matters, 1944 – 58. *One small bundle*

Programmes of work (summaries of work in progress and immediate plans), 1944 – 61. *One bundle*

Applications for research grants received by Ogg for approval or information and retained by later directors: large scale separation of leaf protein, 1949 – 68; biological activity of different strains of pyrethrum flowers, 1952 – 63; succession of fungi in mouldy hay, 1958 – 60. Most of the information concerns grant applications and receipts but some also refers to the aims and progress of the work. *Three bundles tied as one bundle*

Photographs possibly 1950, taken by the Sport and General Press Agency; correspondence with DHG Ogg about the painting of WG Ogg (his father) at Rothamsted, 1984. *One small folder*

Portrait etching by Christopher Perkins, 1958. *Framed, stored separately*

**DIRS2**  
**FC Bawden**
Correspondence, including letters on Home Office Warning and Monitoring Organisation (for radioactivity), National Productivity Year, use of NMR spectrometer, economic benefits of agricultural research, AFRC information services and zinc in water, 1961 – 9. *One small bundle*
Correspondence relating to the deposit of Bawden’s papers at the Royal Society and a copy of the Contemporary Scientific Archives centre listing. One folder

**DIRS3**

**L Fowden**

Letters of congratulation and newspaper cuttings on appointment as Director, 1972. One folder

Minutes, notes and reports of the RAPAC Working Party on Crop Protection, 1970s, 1980s. One folder

Correspondence of the Director and others with the National Research Development Corporation, later the British Technology Group, including letters on the Agricultural Genetics Company, electrostatic crop spraying, mycorrhizal root production, patenting and the work of NW Pirie, pyrethrins, water supply and the Wittewronge portraits, 1972 – 85. One folder

Correspondence, mainly with the LAT committee, on committee membership and constitutional arrangements, assets, financial matters, employment, maintenance, sales, site developments etc., 1976 – 88. Two folders

Informal general correspondence with LAT committee on awards and honours and on routine matters, eg meeting arrangements, 1977 – 88. One folder

Notes, submissions and correspondence on present and future research, late 1970s, 1980s. One folder

Correspondence with R Shephard about painting L Fowden for Rothamsted, 1987. One folder

Drafts and notes for speeches and papers, 1980s, 1990s and undated, including
Adelaide
Agrotechnology, past, present and future
Amino acids: production by plants and the requirements of man
Balanced use of chemicals
Biotechnology in agriculture and food production
Impact of John Monteith’s research on world food production
Prospect for greater diversity in future utilization of plants
Utilizing science in agricultural practice: past successes, future challenges
Various addresses of welcome, mainly handwritten
Visits to Brazil and Uruguay, China, Greece, Hong Kong. One large bundle

_Rothamsted Research - Archive Catalogue_
Photographs of events and presentations, 1970s – 80s and undated. One bundle
Total two boxes

DIRS4 KJ Treharne
Correspondence, mainly with MPs on ‘Keeping the Balance’ (nitrates, fertilizers and water supplies) 1989. One folder
Papers relating to experiments, talks and work by JB Lawes and JH Gilbert, 1840s – 1900

The DRAF series is a miscellaneous collection that includes notes by Lawes and Gilbert on a variety of topics, including their own experiments, that did not necessarily become printed papers or talks. It also includes their notes on the work of others, including people who criticised their work; newspaper cuttings on a range of subjects, including the Rothamsted jubilee in 1893 and some stray reports and figures that may have become separated from their original bundles.

Other archives of experiments are in the PROD and EXP series

**DRAF1** Rough undated notes by JB Lawes for talks and articles on fertility and soil exhaustion, population and food, London sewage, turnips, fish manure and guano, sheep feeding, barley and wheat, clover disease and other topics. *One bundle*

**DRAF2** Report by JB Lawes on ‘Experiments on Rothamsted farm, Herts in 1843 and 1844 on the Growth of Turnips’, printed in the Gardeners’ Chronicle, 1845. *One notebook*

**DRAF3** JH Gilbert’s draft remarks on ‘On the Fairy-Rings of Pastures as illustrating the use of Inorganic manures by Way’, JRAS 7, 1846. *One bundle*

**DRAF4** JH Gilbert’s draft remarks on ‘On the Present State of Agriculture and its relations to Chemistry by Prof Johnson’, JRAS 9, 1848. *One bundle*

**DRAF5** JH Gilbert’s draft remarks on ‘The Course of Experiments conducted on the Farm of Mr Lawes at Rothamsted, Herts. 1848. *One bundle*

**DRAF6** Draft of ‘On the Sources of the Alkalis in Agriculture’ for the Farmers’ Magazine, 1848 – 9. *One bundle*

**DRAF7** Drafts for a paper on sugar cane, c1847 and for ‘On the Selection of Artificial Manures for the sugar-cane’, 1864, with letters, notes and pamphlets, 1840s – 60s. *One bundle*

**DRAF8** Notes supplied to the Reverend Edwin Sidney for a lecture on ‘The rise of the Sap in the Spring’, 1872. *One folder*

**DRAF9** Drafts and notes by JB Lawes and JH Gilbert for replies to criticisms of the Rothamsted experiments by ‘R’ in the Agricultural Gazette, 1852 – 3. *One bundle*

**DRAF10** Proofs of ‘Notes on the Current Method of estimating the Cellular Matter of Woody Fibre in Vegetable Foodstuffs’ by Segelcke of Copenhagen and later notes on methods of determining crude and woody fibre, 1859, 1860, 1883. *One folder*
DRAF11 Notes and correspondence, mainly from Moreton, on experiments on the amount of nitrogen in dates by JH Gilbert and Voelcker, reported in the Gardeners’ Chronicle, 1860. *One folder*

DRAF12 Drafts for ‘On the Application of Different Manures to different Crops and their proper Distribution on the farm’, 1861. *One folder*

DRAF13 Analysis of Broadbalk soils by H von Liebig, 1865, paper by Liebig on pig feeding with rough translation, and other papers in German, 1862 – 79. *One folder*

DRAF14 Production papers for ‘Experiments with Peruvian Guano mixed with a small Quantity of Sulphuric Acid’ and ‘Experiments on the Artificial Fecundation of Wheat’ with JB Lawes’s letters on Peruvian guano referring to his circular ‘The Present Position of the Trade in Peruvian Guano’, 1871. *One folder*

DRAF15 Draft report on Rothamsted researches, 1867. *One folder*

DRAF16 Calculations for the Rivers’ Pollution Commission report on animal feeding and weights, using Rothamsted data, 1869. *One folder*

DRAF17 Papers relating to the Rumford Chemical Works against Lauer, a case in the United States on a patent bread making powder, with JB Lawes’s answers to cross examination, 1870. *One bundle*

DRAF18 Production papers for ‘Scientific Agriculture with a view to Profit, a lecture by JB Lawes to the Maidstone Farmers’ Club, 1870. *One folder*

DRAF19 Correspondence, notes, reports and tables on experiments on different manures in the RHS gardens, Chiswick, later printed in the Proc. Roy. Soc., 1870. *One bundle*

DRAF20 Notes on Rothamsted experiments on nitrogenous manures, 1871 – 5. *One folder*

DRAF21 Drafts of JB Lawes’s notes or letters on ‘Mr Randell’s Motion’ relating to the Landlord and Tenant Bill, c1875. *One bundle*

DRAF22 Account of Rothamsted Agricultural Experimental Station, prepared for the commemoration of the first experimental station in Mockern, Germany, 1877. *One bundle*

DRAF23 Production papers for JB Lawes’s address on ‘Freedom in the Growth and sale of the Crops of the Farm’ for the Jour. Soc. Arts. *One bundle*

DRAF24 Production papers for ‘Is Higher Farming a remedy for Lower Prices?’ a lecture by JB Lawes to the East Berwickshire Agricultural Association’, 1879. *One bundle*

DRAF27  Article by de Laune on tobacco, JRAS 2nd series 23, part 1, 1887 and JB Lawes’s notes.  One bundle

DRAF28  Letters by JB Lawes to the Agricultural Gazette on fertility (not a complete series) with critical letters from ‘Enquirer’, 1881.  One bundle

DRAF29  Figures for drainage, rainfall, prices and produce, with related notes for JB Lawes’s evidence to the Commission on Agricultural Distress’, 1874 – 81.  One bundle

DRAF30  Production papers for JH Gilbert’s memoir on A Voelcker’s life and work, JRAS 2nd series 21, 1885.  One bundle

DRAF31  Production papers for JB Lawes’s article on Peasant Proprietors and for JH Gilbert’s on ‘The Average Yield of Wheat per acre in Different Countries, 1885 – 7.  One bundle

DRAF32  Production papers for ‘The History and Present Position of the Rothamsted Investigations, 1891.  One bundle

DRAF33  Production papers for ‘Allotments and Small Holdings’ JRAS 2nd series 3, with data from 1870 onwards and a list of allotments and allotment holders in Harpenden, 1892.  One bundle

DRAF34  Letter from JB Lawes and draft of paper on ‘Nutritive Rations’ for the Agric. Students’ Gazette, 1892.  Two items

DRAF35  Production papers for ‘The Rothamsted Experiments over Fifty Years’ Trans. Highland and Agric. Soc. of Scotland, 7, 1895.  One folder

DRAF36  Drafts for an unpublished paper on ‘Historical, Critical and Experimental Enquiry into the Chemical Statistics of the Animal Body, with Special Reference to the Question of Whether Animals either assimilate or exhale free Nitrogen’, with a note that some data was used for ‘The Feeding of Animals for the Production of Meat, Milk and Manure and the Exercise of Force’, JRAS 3rd series 6, 1895.  One bundle

DRAF37  Notes on barley production and imports, arising from JH Gilbert’s membership of the Beer Materials Committee, 1897 – 8.  One bundle

DRAF38  Transactions of the Banffshire Field Club with an article by Milne on Soils, referring to Rothamsted, 1899.  Two items
DRAF39 Proofs for papers by JB Lawes on mangels, red clover, lime, weeds, the Scottish Chambers Land Bill, soil, artificial food, Burnyeat versus the Earl of Lonsdale, artificial manures, cow products, ploughing green crops, Joulie on nitrogen, manure for sugar cane and sulphate of ammonia, with a few newscuttings, most undated, some 1880s. 

One bundle

DRAF40 Corrections of experimental farm sheets, 1869 – 75 and notes to accompany annual revisions of the Memoranda, 1876 – 1900. 

One box

DRAF41 Newspaper cuttings on visits to Rothamsted and on JB Lawes and JH Gilbert, 1868 – 1901. 

One bundle

DRAF42 Newspaper cuttings on events in Rothamsted and Harpenden, 1875 – 88. 

Three volumes

DRAF43 Extract from the Gardeners’ Chronicle on JB Lawes’s turnip experiments in 1843 and 1844 and article on Rothamsted, 1877. 

One bundle

DRAF44 Correspondence, invitations etc for Jubilee, 1893 and a few items on JB Lawes and JH Gilbert’s Cambridge degrees, 1894. 

One bundle

DRAF45 Newspapers describing the Rothamsted Jubilee and music for the Rothamsted anthem, 1893. 

One bundle

This small group of papers was formed by bringing together items found at random in the 19th century archives in the Annexe strongroom and probably survives from a few only of the exhibitions in which Rothamsted took part.

Although the main way of making Rothamsted’s work known was by publication in scientific journals, other ways included talks by both Lawes and Gilbert, Gilbert’s attendance at scientific conferences, the distribution of photographs and offprints to scientific institutions worldwide and, as shown below, providing items for exhibitions.

**EXH1**  
Diagrams, letters and tables relating to Rothamsted items exhibited in Moscow, 1872.  *One folder*

**EXH2**  
Correspondence with JH Gilbert on loans to an exhibition of scientific instruments at South Kensington, 1876; list of Rothamsted items in glass case at S.K, 1872.  *One bundle*

**EXH3**  
Correspondence and notes on Rothamsted’s loans and gifts to Hertfordshire County Museum, c1889, plus some figures from experiments, probably unrelated.  *One folder*

**EXH4**  
Papers relating to Rothamsted exhibits at an exhibition in Chicago, later also displayed at South Kensington Museum, 1893 – 4.  *Three bundles*

**EXH5**  
Programme for Royal Agricultural College, Cirencester, jubilee celebrations and list of Rothamsted items exhibited at the ‘conversazione’, 1895.  *One folder*

**EXH6**  
Particulars of Rothamsted exhibits at the Paris International Exhibition, 1890s.  *Two bundles*

**EXH7**  
EJ Russell at the Rothamsted stand at an exhibition in Regina, Canada, 1933.  *One photograph*

**EXH8**  
Rothamsted stand at the Royal Show, Newport, 1927.  *One photograph*

Systematic records of the experimental work were kept at Rothamsted from the beginning of Lawes’ and Gilbert’s partnership in 1843. The formal record was in the White Books while other notes were made in Green Books. The series of white books continues in 2011 although in a different format.

The EXP series also includes plans and miscellaneous notes and tables. Other archives of experiments are in the DRAF and PROD series.

**EXP1.14**  Deep Cultivation Rotation Experiment, 1943 – 59.  *One volume*

**EXP1.15**  Ley and arable rotation experiments in Highfield on old permanent grass and in Fosters on old permanent arable, 1949 – 59.  *One volume*

**EXP1.16**  Chemical notes on gas in plants and taking nitrogen from the air, 1857 – 8.  *One volume*

**EXP2**  Green Books

**EXP2.1**  A  Notes on animal feeding experiments, 1840s, 1850s.  *One volume*

**EXP2.2 – 6**  B, C, E, F, H  Notes and figures on classical and other experiments, 1840s, 1850s.  *Five volumes, E with slight fire damage*

**EXP2.7 – 10**  I, L, N, O  Tables of dry matter and ash determinations, 1840s, 1850s.  *Four volumes*

**EXP2.11**  Notes on green books B and I, 1840s, 1850s.  *One folder in box with EXP1.12 – EXP1.16*

**EXP2.12**  AA  Notes on nitrogen assimilation experiments, 1857 – 8, carried out by Evan Pugh and possibly written by him.  *One volume*

**EXP2.13**  Unused white and green books and unused volume with title ‘Rothamsted Fruit Station Plots’.  *Six volumes*

**EXP3**  Plans

**EXP3.1**  Plans and drawings, partly in watercolour, of experimental plots and the drain and rain gauges, early – mid 1890s.  *Ten large rolls, paper on canvas, moderate condition, grubby, found in Library attic in 2000, currently stored in Early Book Room*

1. Plan of the plots in the Park, on which experiments have been made, on the mixed herbage of grass land, 38 (corrected by hand to 47) years commencing 1856. Dated March 1893. Scale 50 feet to 1 inch.

2. Plan of the plots in Agdell Field, on which experiments have been made on four course rotation, 46 years, commencing 1848. Dated March 1893. Scale 50 feet to 1 inch.

3. Plan of the plots in Barn-Field, on which experiments have been made with root-crops, commencing 1843. Dated March 1893. Scale 50 feet to 1 inch.

4. Plan of the plots in the Park, on which experiments have been made, on the mixed herbage of grass land, 38 years commencing 1856. Undated; numbered 34. Scale 30 feet to 1 inch.

5. Plan of the plots in Hoos Field, on which experiments have been made – on barley 42 years, commencing 1852; on leguminous crops 45 years, commencing 1849; on alternate wheat and
fallow without manure, 43 years, commencing 1851; on potatoes 18 years, commencing 1876. Undated; numbered 31. Scale 30 feet to 1 inch.

6. Plan of the plots in Broadbalk Field, on which wheat has been grown, for 50 years in succession, 1843/4-1892/3. Undated; numbered 32. Scale 30 feet to 1 inch.

7. Plan of the plots in Barn-Field, on which experiments have been made with root-crops, commencing 1843. Undated; numbered 30. Scale 30 feet to 1 inch.

8. Plan of the plots in Agdell Field, on which experiments have been made on four course rotation, 46 years, commencing 1848. Undated; numbered 33. Scale 30 feet to 1 inch.

9. Watercolour drawing of the rain gauge. Undated; numbered 37

10. Watercolour drawing of the 1/1000th acre drain gauges. Undated; numbered 38.

EXP3.2 ‘Maps of the Rothamsted Fields 1912 – 33: details of soils, cropping and manuring, late 19th century – 1930s. *One large volume; stored shelf B5, label 238. Colour prints or slides of frontispiece and of pages 1 – 10, 44, 72, 97 – 9, made in 1994, are stored in STF35*

EXP3.3 Plans of cropping and other experiments, 1934 – 43, partly continuing EXP3.2. *One large folder; stored shelf B5, label 239.*

EXP4 Other notes
EXP4.1 Tables for leguminous crops in Geescroft, 1847 – 83. *One bundle*

EXP4.2 ‘Rothamsted Experimental Fields Sketches and Descriptions 1893’. *One notebook with modern cover*

EXP4.3 ‘Little Hoos experiments on Potatoes and Swedes etc commencing 1904’. *One exercise book*

EXP4.4 Notes by JB Lawes on experiments on water given off by plants, 1842 – 55. *Four notebooks*

EXP4.5 Annual bundles of data from experiments on water given off by plants during growth, 1849 – 58. *One bundle*

EXP4.6 Notes and figures from pot experiments, including work at Woburn and Saxmundham, early 20th century. *One folder*

EXP4.7 Lists of samples, descriptions of methods and results of ash analyses carried out by Richter, 1850s – c1900. *One folder, three bundles*

EXP4.8 Notes on clover, barley and other experiments in Little Hoosfield, 1840s – 1920s. *Two bundles*

EXP4.9 Analysis by Richter of the ashes of bean plants in Claycroft, 1854. *One folder*
EXP4.10  Notes and figures on experiments on nitrogen in wool refuse, 1860s. *One folder*

EXP4.11  ‘Mr Richter’s botanical notes’ on Park Grass, Broadbalk, Hoosfield and bean ground in Geescroft Field, Broadbalk wheat, Hoosfield barley and Rothamsted grass, 1860s. *Eight small volumes*

EXP4.12  Notes on tartaric and citric acid manufacture, 1867, probably from Lawes’ Millwall factory. *One folder*

EXP4.13  Correspondence, notes and tables relating to James Mason’s experiments at Eynsham Hall, Witney, Oxfordshire, on leguminous plants and nitrogen, clay subsoils and animal feed, c1880 – c1900. *One bundle*

EXP4.14  Determinations of percentages of nitrogen as albuminoids and of total nitrogen in Rothamsted Park hay, Hoosfield potatoes and Barnfield mangolds, 1870s. *One folder*

EXP4.15  Determinations of nitrogen and estimates of chlorophyll made by WJ Russell using samples from Rothamsted and Market Harborough, Leicestershire, 1882. *One folder*

EXP4.16  Reports on investigations of cellulose in Rothamsted samples by Hodgkinson, Cross and Bevan at Kew, 1882. *One folder*

EXP4.17  Hoosfield potato experiments, 1876 – 1901: tables, working sheets, particulars of sampling, weights and correspondence. *One box*

EXP4.18  Correspondence on soil and leguminous seed samples, directions for making plant food, notes and tables, 1888 – 94. *One bundle*

EXP4.19  Notes and tables on leguminous plants grown in pots, 1890 – 1. *One bundle*

EXP4.20  Notes and tables on glasshouse leguminous pot plant experiments, 1898 – 1901. *One bundle*

EXP4.21  Estimates of ash constituents supplied and removed in Agdell rotation crops, Hoos leguminous crops and Barnfield mangolds, 1896. *One folder*

EXP4.22  Notes and tables on application of bicarbonate of ammonia to some Rothamsted experimental plots, 1900, 1901. *One folder*

EXP4.23  Notes and tables of dry matter and ash determinations in Rothamsted fields, 1902 – 8. *One bundle*

The Friends of Rothamsted was established in 1983. In 1990 it merged with the long established Long Ashton Members’ Association to become the Arable Research Institute Association/ARIA.

The National Fruit and Cider Institute, a membership organisation, set up in 1903 to support research and instruction in cider making and fruit growing, was re-constituted in 1983 as the Long Ashton Members’ Association and widened its remit to include arable crops.

When Long Ashton closed in 2002, ARIA became the Rothamsted Research Association/RRA. RRA is still active and provides a successful forum for the exchange of information between research and the agricultural industry.

The purpose of these organisations was and is to aid such knowledge transfer between the scientific agricultural community to farmers, growers, advisers and the agricultural industry.

email: library@rothamsted.ac.uk
The series of farm records is one of the longest in the archives as it begins in the mid 19th century and is still being added to in 2011. The early experiments were carried out on the Lawes estate’s Home Farm and until 1911 the records cover both experimental and routine farm work. In 1911 the Farm came under the control of the LAT/Rothamsted Experimental Station and a farm manager was appointed. In 1983 the farm became part of the Agronomy and Crop Physiology Division; there have been further administrative changes since then and in 2011 the Farm is one of Rothamsted ’s technical support services.

The archives below cover administrative, experimental and financial matters.

FARM 1 – 16  Farm diaries, notebooks, reports and tables
FARM1.1 – 4 Notes by F. Bassil, on work on the Farm, experimental plots and in the Laboratory plus notes on labour, rain gauges and weather and notes by JB Lawes on Bassil’s work, 1850s.  *Four volumes*

FARM 1.5 Notes by G. Knott on farm work, labour, sheep experiments and the weather, 1853 – early 1854.  *One volume*

FARM 1.6, 7 ‘Notes in connection with the Experimental Crops and Fields’ by JJ Willis, 1867 – 70.  *Two notebooks*

FARM 2 Farm diaries, 1912 – 98.  *87 volumes*

FARM 3 Field plots/field experiments diaries (mainly B Weston’s), 1927 – 2001, excluding 1940.  *75 volumes*

FARM 4 Notebooks (the earlier ones mainly B Weston’s) with crop weights, cultivation plans, drilling, field notes, manure weights, weedkiller rotation, rough calculations and memoranda.1910 – 1970s, with gaps.  *Numerous small notebooks in five boxes, the last of which contains notebooks titled ‘cultivation weed killer rotation’ and one green binder (70/R/RN/8)*

FARM 5 Pocket diaries (B Weston’s) 1920s – 50, with gaps.  *24 small diaries in one box; information in these diaries is often but not always repeated in the Field Plot diaries.*

FARM 6 Other diaries: weather and farm work, 1927 – 8; crop book and field operations record, 1911 – 20s; experimental fields, 1928 – 33; stock, 1944; cultural operations, 1944 – 56; sheep and grazing experiments, 1951; field diary, 1950s.  *Four volumes, one folder, three binders. These diaries were found individually among various different transfers of farm records and further examination may show that some could be added to existing series.*

FARM 7 Weights of crops at carting, mainly Park Hay (weighbridge books) 1862 – 1928.  *Thirteen folders in one box*
FARM8  Dairy records: figures for cows’ food consumption and milk yields, calving times and other statistics, with notes on other dairy experiments, eg at Saffron Walden and by the Aylesbury Dairy Company, 1884 – 90.  *Four boxes*

FARM9.1  Harvest books, 1890s – 1940s.  *11 boxes; there are gaps in the early 1920s and these books may be with the archives held by the former Statistics Department as other missing volumes have been found there.*

FARM9.2  Harvest and weight books, 1969 – 2005 (some years missing).  *Two boxes*

FARM10  Manure tables, late 19th century – 1950s: Agdell, Barnfield, Broadbalk, Great Hoos (now Long Hoos), Hoosfield, Little Hoos, Long Hoos, Park Grass, Woburn, Two Course Rotation, Cultivation Rotation, miscellaneous, outside centres.  *Two boxes*

FARM11.1 – 5  Threshing results, 1902 – 4, Barnfield, Hoos Barley and Little Knott; straw weights at threshing, 1913 – 8; threshing results, 1930 – 2, 1940s; description of threshing and sampling, undated.  *Two boxes*

FARM13  Area tables: rough tables of plot area and general notes, eg on Zeppelin raid, 1916, sowing, yields, carting, weeds, weather etc, 1916 – 30.  *One bundle*

FARM14  C. Heigham’s notes and diagrams for crops and manures, c1925.  *Two notebooks*

FARM15.1  Field books, 1926 – 59.  *One exercise book, six binders*

FARM15.2  Rothamsted and Scout farms non experimental fields’ diaries, 1960 – 92.  *Six boxes*

FARM16  Cattle record books, 1950s – 80s.  *Three binders*

FARM17  **Inventories, purchases and valuations**

FARM17.1  Notes for farm valuation, 1927.  *One notebook*

FARM17.2  Electrical equipment: catalogues and correspondence, mainly with GEC (General Electric Company) 1930s – 60s.  *One large bundle*
FARM17.3 Correspondence on purchases from Alfred R. Tattersall, milling engineers, 1940 – 1. One small bundle, including references to items still in use in 2002

FARM17.4 Correspondence on purchase of insecticides, 1940s – 50s. One folder

FARM17.5 Inventories, 1940s – 80s. One bundle

FARM17.6 Machinery book, 1950s – 70s. One binder

FARM17.7 Valuations, Rothamsted and Woburn farms, 1987/8, 1991/2; Rothamsted, 1990. One folder, two notebooks

FARM18 Labour
FARM18.1 Labour account book for the experimental fields, 1857. One notebook

FARM18.2 Summary of payments at haymaking, 1891. One item

FARM18.3 Costings for farm operations, 1903 – 9. One bundle

FARM18.4 Labour sheets, 1911 – 5, October 1922. One volume (damaged and dirty), one bundle

FARM18.5 Application for farm posts, references, notices and other supporting papers, 1920s – 70s. (access restricted, consult Librarian). Two boxes, contents arranged alphabetically.

FARM19 Photographs
FARM19.1 Photographs, some identified. One box of 40 hanging slide holders with up to 24 slides, some glass. Not in archive quality packaging

FARM19.2 Photographs, mainly of machinery in fields and buildings and also including some photographs of animals and experiments, 1940s – early 1960s. One album

FARM19.3 Photographs of hay fire, 1968. One folder

FARM19.4 Eleven photographs of farming operations at Rothamsted donated by Associated Press, 1938. One folder

FARM20 Miscellaneous
FARM20.1 Letter to AD Hall on farming and general matters, 1911. One item

FARM20.2 Correspondence, mainly about footpaths and rights of way, plus some details of property maintenance, 1930s – 60s. One bundle
FARM20.3 Talks on the Farm, 1930s – early 1970s. *Seven papers in one folder, one incomplete*

FARM20.4 Farm notes, 1944 – 54 and Woburn farm notes, 1949. *12 items*

FARM20.5 Details of farm and experimental work, late 1940s, 1950s, mainly Rothamsted, some Woburn. *One binder*

FARM20.6 Hertfordshire Cattle Breeders Society: share certificate and passbook, 1947. *Two items in envelope*

FARM20.7 ‘Crib sheet for demonstrations’, c1980. *One green binder*

FARM20.8 Plans of location, outline and siting of field experiments, 1930 – 60s. *One box*

FARM20.9 Plans and related details of reference posts, 1930s – 70s. *One folder*

FARM21 Financial

FARM21.1 Repair, cash and maintenance book, 1848, 1903 – 19

FARM21.2.1 – 30 Ledgers, 1911 – 47. *30 volumes*

FARM21.3 Stock book, 1911 – 23. *One volume*

FARM21.4.1 – 4 Summary costs and returns and monthly statements, 1911 – 26. *Four volumes*

FARM21.5 Sales day books, 1911 – 24. *Two volumes*

FARM21.6 Sales books, 1912 – 29. *Three volumes*

FARM21.7.1 – 8 Cash books 1915 – 47. *Eight volumes*

FARM21.8 Purchase book, 1915 – 20 (few entries only). *One volume*

FARM21.11 Estate account and farms journal, 1947 – 8 (few entries only). *One volume*

FARM21.13 Payments and receipts books, 1948 – 51. *Two volumes*

The role of the Field Plots and Field Experiments committees and working parties was to be a channel or buffer between scientists and the Farm. They appraised and altered proposals, drew up plans and gave instructions to the Farm.

**FX1** **Field Plots Committee minutes**
**FX1.1.1, FX1.1.2, FX 1.1.3** Field Plots Committee minutes of meetings 1 – 83, 1924 – 47. *Three volumes*

**FX1.2** Field Plots Committee agendas, minutes, summary minutes and papers, 1928 – 43, ending at meeting 69, the director’s (EJ Russell) copies. *Two folders*

**FX1.3** Field Plots Committee agendas, minutes, summary minutes, reports and papers, 1930 – 45, ending at meeting 81, the farm manager B Weston’s copies. *Two folders*

**FX1.4.1 – 5** Field Plots Committee Executive Sub-Committee minutes of meetings 1 – 153, 1931 – 54. *Five volumes, handwritten except for the last few pages*

**FX1.4.6 – 16** Field Plots Committee minutes of meetings 154 –363, 1954 – 79. *11 folders*

The committee, the minutes of which form FX1.4, began in 1931 and was known as the Field Plots Executive Sub-Committee until 1944, then after a gap of two years became the New Sub-Committee and from 1948 onwards was called the Field Plots Committee. It no longer exists but its responsibilities were assumed successively by the Working Party for Field Experiments (WPFE) and currently (2013) the Farm and Field Experiments Committee (FFEC).

A history of the Field Plots Committee by HV Garner from the Annual Report 1961 is stored in the box containing FX1.3 and part of FX1.4.

**FX4.1 – 5** are signed minutes, largely handwritten in exercise books and not normally including memoranda. **FX4.6 – 16** are typed circulated unsigned minutes, also not normally including memos and are stored in folders; memos are usually with the group or working party that created them.

**FX2** **Field Plots Committee/Field Experiments Working Party**
**FX2.1 – 24** Agendas and papers, 1947 – 79, numbered as memoranda from 1954, excluding 1955 – 57; numbers FX2.5, FX2.6, FX2.7 not used, to be used if records are found. *21 folders*

**FX2.2** Standing orders, 1924 – 76. *One folder*

**FX2.3** Numbers of experimental plots, 1930s – 50s, 1970s – 90s and proposals for crop symbols and code letters, early 1960s. *Three*
folders

FX2.4  Reports of diseases, 1958 – 85. *One folder*

FX2.5  Sampling requests, 1972 – 93. *One folder*

FX3  Working parties

FX3.2.1, FX3.2.2  Cereal Crops and Grass Working Party: minutes (memos 1 – 31) 1967 – 76; agendas and papers, 1967 – 76. *Five folders*

FX3.3.1, FX3.3.2  Classical Working Party: minutes (memos 1 – 44, then continuing unnumbered), 1954 – 78; agendas and papers, 1958 – 78. *Five folders*

FX3.5.1, FX3.5.2  Field Methods Working Party: minutes (memos 1 – 28) 1955 – 1976, agendas and papers, 1956 – 78. *Four folders*

FX4  Groups

FX4.2  Long Term Experiments Group: minutes (memos 1 – 6) agendas and papers, 1976 – 9. *One folder*

FX4.3  Wheat Commodity Group: minutes (memos 1 – 144) agendas and papers, 1977 – 90. *Three folders*

FX4.4  Barley and Oats Commodity Group: minutes (memos 1 – 107) agendas and papers, 1977 – 90. *Two folders*

FX4.5  Cereals Commodity Group: minutes (memos 1 – 96) agendas and papers, 1990 – 2006. *One folder*
FX4.6 Beans and Pulses/Legumes and Forage Commodity Group: minutes (memos 1 – 56) agendas and papers, 1977 – 90. Two folders

FX4.7 Grass Commodity Group: minutes (memos 1 – 16) agendas and papers, 1977 – 84. One folder

FX4.8 Oilseeds Commodity Group: minutes (memos 1 – 41) agendas and papers, 1977 – 90. One folder

FX4.10 Potatoes/Potatoes and Sugar Beet Commodity Group: minutes (memos 1 – 60) agendas and papers, 1977 – 98. Two folders

FX4.11 Mobile Greenhouse Group: minutes and papers, 1974 – 75. One folder

FX5 Committees and sub-committees
FX5.1 Agricultural Chemicals Sub-Committee (originally Noxious Materials Sub-Committee)
FX5.1.1 Minutes, agendas and papers (meetings 1 – 61) 1958 – 2002. Three folders

FX5.1.2 Lists of acceptable chemical sprays and dusts, 1959 – 81; guide on disposal for sponsors, undated. One folder

FX5.2 Small Plots/Garden Plots Committee/Garden Plots and Outside Experiments Committee (called Field Research Committee briefly in 1967)
FX5.2.1 Scheme for proposed Garden Plots, 1949; minutes, agendas and papers, 1950 – 69. Two folders

FX5.2.2 Requests for use of Garden Plots with supporting notes, details of proposed experiments and letters accepting Garden Plots proposals, 1950s – 60s. Nine small folders

FX5.2.3 Plans, correspondence and experiment details for Garden Plots, 1950s and Ninnings Garden Plots, 1960s. One bundle

FX5.2.4.1 Record of experiments on Garden Plots, 1 – 12, 1960 – 67, arranged by plot number. One green binder

FX5.2.4.2 Record of experiments on Garden Plots, 1 – 15, x and y, 1968 – 81, arranged by plot number. One green binder

FX5.2.5 Record of experiments on Long Hoos III – VII, 1971 – 81,
arranged by plot number. *One green binder*

**FX5.2.6** Record of experiments on Long Hoos III – VII and Garden Plots, 1 – 12, x and y, 1982 – 85, arranged by plot number. *One green binder*

**FX5.2.7** Record of experiments, 1979 – 84, arranged by date and crop. *One brown binder, with note on spine identifying it as a green binder*

**FX5.2.8.1** ‘Details of all SPS sites from 1985 onwards’; ending in 1994 and covering Long Hoos III – VII and Garden Plots, 1 – 12, x and y. *One brown binder*

**FX5.2.8.2** ‘Green book’ ‘Computer sheet records of all activities carried out by SPS on all experiments 1985 onwards’, ending in 1994. *One brown binder*

**FX5.2.9.1** Diaries, 1967 – 1985, with two each for 1971 – 75 containing similar but not duplicate information. *24 volumes*

**FX5.2.9.2** Diaries covering both Garden Plots/Small Plots and Long Hoos as above, plus work on other fields, 1987 – 2006. *21 volumes*

**FX5.2.10** ‘Farm land and outside experiments’ brief details of work, eg spraying, weeding, on Farm and elsewhere on site, early 1970s. *One green binder*

**FX6, FX7** *White books*

*These binders continue the series EXP1, most of which ends in 1959*

**FX6.1** *number not used*

**FX6.2** ‘Classicals’ 1960 – 74. *Two green binders*

**FX6.3** ‘Rothamsted Ley-Arable (RN/1 & 2)’ 1960 – 74. *Two green binders*

**FX6.4** ‘Crop rotations excluding ley/arable’ 1960 – 74. *Two green binders*

**FX6.5** ‘Crop sequence’ 1960 – 74. *Four green binders*

**FX6.6** ‘Annuals’ 1960 – 73. *Five green binders*

**FX6.7** Untitled green binders probably continuing FX6.6, 1976 – 92; one binder has the title inside ‘white book farm records 1981’. *12 green binders*

**FX6.8** White books, 1993 – 2005. *Six red plastic ring binders, two boxes, one*
Results of the Classical and other Long-term Experiments, 2007, 2008. Two files, containing similar data to white books; see also this title and ‘Yields of the Field Experiments, Rothamsted Experimental Station’ 1971 – 2002 in Rothamsted Library

‘White Books Observations Extended or Excluded’, early 1960s. One folder

Annual experiments
Plans, fertilizer sheets and notes relating to annual experiments, mid 1940s – late 90s. Approximately 3600 folders arranged annually in three four drawer filing cabinets, transferred to 12 boxes in 2012. The folders contain plans and fertilizer sheets for annual experiments, ie those lasting one year only. They have not been examined and remain as they came from the farm in 2003; they are not in archive quality packaging.

Other records of experiments
Each title refers to one folder unless otherwise indicated. The contents have been left as they were when they were transferred to the archives, ie they have not been appraised after transfer. Some may contain information duplicated elsewhere and some may belong elsewhere. The folders are not archive quality. Many of them contain non-archive quality papers clips, staples etc.

First box
2 Course Rotation, 1950 – 9
3 Course Rotation, 1933 – 51
3 Course Rotation, New System, 1952 – 8
4 Course Rotation, 1929-1956. Five folders

Second box
6 Course Rotation, R&W, 1930 – 59. Three folders
Arable Reference Plots, Great Field IV, Widdowson, Barraclough, Haynes, RN/5, 1961 – 94
Cereal Disease Reference Plots, Pennels Piece, Slope, RN/9, 1966 – 74
Crop Rotations, Great Field I, II, Shield, Hewitt, Payne, RN/22, 1997 – 8

Third box
Cultivation Weedkiller, Rothamsted, Great Harpenden I, RN/8, 1960 – 90
Cultivation Weedkiller rotation/CW notes, 1960s
Cultivation Weedkiller, Woburn, Great Hill, 1960 – 7
Deep Cultivation, Long Hoos I, II, 1944 – 7
Effects of Deep PK, Butt Furlong, McEwen, RN/16, 1974 – 86
Erosion Reference Experiment, Great Hill II, III, Webster, Morgan, Rickson, Styles, RN/20 1988 – 98
Exhaustion Land Data (history 1850s – mid 20th century)
Eyespot Rotation, Little Knott, 1952 – 4
Eyespot Rotation, Long Hoos, 1954 – n 6
Fosters Soil Structure, 1950 – 63

FX9 fourth box
Intensive Cereals, Stackyard I, Johnston, McEwen RN/13, 1966 – 90
Irrigation Plots, Great Field I, II, 1964 – 5
Irrigation Plots, Great Field I, Penman, Moffatt, RN/11, 1964 – 76
Irrigation Plots, Great Field II, Penman, Legg, French, RN/11 1973 – 6
Key to Crop Index Letters, Warren, 1930s – 50s
Liming Recommendations, 1963 – 6
Long term liming, Sawyers 1, barley 1965
Long Term Phosphate, Sawyers, Barraclough, Day, Poulton, Lane, Todd, RN/21, 1993 – 8
Permanent Wheat and Barley, Woburn, Stackyard, 1954 – 63

FX9 fifth box
Plans of Classicals (two only: Long Hoos 1903, Hoos Leguminous Plots, undated).
Rates of P&K to the Sub-soil, Meadow, RN/17, 1960 – 88
Reference Plots, Stackyard C, RN/23, 2000 – 5
Residual P, Stackyard Old Classical Site, RN/14, 1968 – 82
Residual Phosphate, Great Field IV, Mattingly, RN/7, 1965 – 81
Residual Phosphate, Sawyers I, Mattingly, Slope, RN/7, 1972 – 81
Residual Phosphate, 1959 – 84
Rotation and Fumigation, Bones Close, Jones et al, RN/15, 1968 – 71
Survival of Wild Oats, 1955 – 61

FX9 sixth box
Wheat Bulb Fly Reference Plots, Great Harpenden I, RN/10, 1963 – 85
Woburn Irrigation, Butt Close, 1956 – 64
Woburn New Green Manuring, Stackyard, 1946 – 67
Woburn Oil Seed Rape Spore Study, Great Field I, II, RN/18, 1984 – 91
Woburn Reference Plots, Stackyard, Widdowson, RN/6, 1960 – 80
Worm Worked Wastes, Ninnings, RN/19, 1980s

FX9 seventh box (files received 2009 onwards)
Guide for sponsors, undated, [1970s]
Liming prior to autumn 1976
Liming instructions Rothamsted
Rules for use of garden plots, notes on shed, memo on gardener AC Smith, 1960s. One folder

FX9 eighth box (files received 2011)
Results of the Field Experiments, 1973. One box

FX9 ninth box (files received 2011)
Results of the Field Experiments, 1974. One box
FX10  Miscellaneous
FX10.1  Treatment plans, Rothamsted and Woburn, book numbers 5 – 8, 1938 – 46. *Three exercise books, indexed, one folder*

FX10.2.1, 2  ‘Record of the direction of Ploughing’, 1949 – 76. *Two volumes*

FX10.3.1, 2  Minor investigations, 1967 – 90. *Two green binders*

FX11  Files transferred 2011
Records of long-term experiments, 1940s – 90s, received from Rothamsted Farm in January 2011 and transferred to the Library Archives by Andy Macdonald in February 2011; details on list. *Two drawers of filing cabinet, transferred to boxes 2012; list available.*

email: library@rothamsted.ac.uk
Joseph Henry Gilbert began work at Rothamsted in 1843 when JB Lawes engaged him as a chemist. He stayed for the rest of his life and his scientific partnership with JB Lawes was one of the most valuable and enduring of the 19th century.

Although most of his extensive archive is from his time at Rothamsted it does include a few notebooks from before that and also from his later external work eg as Sibthorpiian Professor of Rural Economy at Oxford and a lecturer at the Royal Agricultural College, Cirencester.

Much of the archive is correspondence and it includes letters from a range of scientists and Gilbert’s own reports to Lawes from scientific conferences. Other letters are on the progress of experiments, work preparing papers and laboratory management.

GIL1  Letters from foreign correspondents on scientific work in progress, published papers, requests for information and visits, 1854 – 86. *Two bundles, tied as one*

GIL2  Correspondence with Evan Pugh and Pugh’s notes on his work at Rothamsted, 1856 – 9. *One folder*

GIL3  Copies of letters from JH Gilbert to JB Lawes, many long and detailed, recording both work in progress and general administrative matters, 1856 – 90. JB Lawes’ letters to JH Gilbert are JBL1.9. *One large bundle*

GIL4  Letters on the supply of methylated spirits to the Laboratory, 1863. *Three documents*

GIL5  Correspondence with T Way mentioning J von Liebig’s work and sewage experiments, 1864 – 5. *One small bundle*

GIL6  Letters from the USA, 1868 – 1901, most on matters arising from JH Gilbert's American lectures, others about visits and requests for information. *One large bundle*

GIL7  Letters and report on agricultural experiments in Aberdeen and Kincardine, 1875. *One bundle*

GIL8  Letters to JH Gilbert on LAT matters, 1890 – 1901, eg covering letters for cheques, committee minutes, notices of meetings and requests for information. The letters are arranged in yearly bundles and are mostly brief and from HRix, LAT secretary, with a few from other committee members. *13 small bundles*
GIL9.1 – 7  Letters, with some draft replies, on personal and administrative matters and on scientific work, 1845 – 1901. Most of the letters are brief and are to JH Gilbert, although a few are to JB Lawes and to others at Rothamsted. They are in seven bound volumes, arranged alphabetically and indexed by correspondent. There is no subject index and the personal names index is not accurate. Additionally, letters for any correspondent on a particular matter or from a particular time may be found in some or all the volumes and the contents also overlap with the series of ‘Rothamsted Experimental Station Papers and Correspondence’. Seven volumes

GIL10  ‘J.H. Gilbert foreign letters 1850 – 65’: letters on personal, administrative and scientific matters, many in European languages, some translated. One volume

GIL11  ‘A Voelcker’s collection, letters to J.H. Gilbert’: brief letters to JH Gilbert from scientific colleagues given by Lady Gilbert to Mrs Voelcker for her autograph collections and returned in 1924. One volume, the return of which to Rothamsted is described in RUS2.5, library correspondence

GIL12  Copies of letters from JH Gilbert to the LAT, mainly to H Rix, the secretary, 1890 – 1901. Two folders

GIL13  Letters to JH Gilbert, 1839 – 1900, arranged and sent to Rothamsted by Lady Gilbert about 1913, including a testimonial from Thomas Thomson of Glasgow University, 1839 and letter on work in progress, 1840; a testimonial from AT Thomson of London University, 1840; letters from Justus von Liebig, 1841 and 1853, in French and German; from Brewster about obtaining chemicals and subsequent experiments, 1842 and 1843; from Thomas Graham on turnip analysis, 1844 and JH Gilbert’s election to the Royal Society, 1859; from Allen Miller on scientific work, 1847 and award of the Royal Society’s medal, 1867; from Lyon Playfair, 1860s and 1894 on work in progress; from Charles Darwin and his son Francis on exchange of information with JH Gilbert, with Gilbert’s notes and draft replies, 1875 – 82 (10 letters, 5 written by Darwin, 5 by Francis Darwin of which 3 are signed by Darwin); about Gilbert’s election as a corresponding member of the Académie des Sciences, 1883; notice of meeting of the Rothamsted Jubilee Fund, 1893; letter from Rona congratulating Gilbert on his prize at the Universal Exhibition, 1900; from Dr. Will in German, undated; Gilbert’s draft of a letter to Mittenheimen 1841 and Dymond 1892. One bundle subdivided into five small bundles.

The Darwin letters in GIL13 were transcribed in 2008. Also in 2008, Cambridge University Library supplied Rothamsted with photocopies of JH Gilbert’s original letters to Darwin and
Darwin’s draft replies, 1875 – 82. Copies of the Rothamsted Darwin letters were supplied to Cambridge University in 2008 and had been supplied to the Darwin Museum in 1988. Their reference in 1988 was B6.2. The transcripts, copies and related administrative papers are in a folder in the box with GIL13.

**GIL14.1 – 5** Notes taken at Glasgow University by Gilbert on lectures by J Cowper, Thomas Thomson and WJ Hooker, 1838 – 9. Five notebooks

**GIL15** Notes on dyeing made in Manchester and Stockport, c1840, with related letters to Philips of London, 1823. One bundle

**GIL16** Letters from Mrs Gilbert (JH Gilbert’s mother), 1848, 1859 – 66. Nine letters loose in a 19th century folder

**GIL17.1 – 20** Note and memoranda books with rough calculations, notes and tables, 1840 onwards. 20 small notebooks in three bundles

**GIL18** Memoranda book with calculations, analyses, notes and tables, undated and apparently a rough book but with more detail than the small notebooks above. One notebook

**GIL19** Memoranda books on ash analysis, undated. Two notebooks

**GIL20** Notebook for tests on lead and limestone, undated. One notebook

**GIL21** Notes for analysis of chrome, iron and copper ores found in Scotland, undated. One roll

**GIL22** Notes on the effects of insects on lead, c 1850. One roll

**GIL23** JH Gilbert’s copies of pamphlets in German, mid – late 19th century. 20 booklets

**GIL24** Letters to JH Gilbert about printing articles, 1853 – 69. One bundle

**GIL25** Notes on respiration from various sources, early 19th century onwards. One bundle

**GIL26** Copies of notes and specifications relating to artificial incubation of poultry, 1770, mid 19th century. One bundle

**GIL27** Drafts for lectures to the British Association at Leeds, Oxford, Manchester, Cambridge and Sheffield, 1858 – 62, 1879. Six parcels in one bundle
GIL28  Notes by JH Gilbert on Scottish farming including visits to named individuals, general observations and some letters, 1858 – 65; notes by Gilbert on the Durris estate, Kincardine, 1885, with a few details of agricultural experiments, 1875, letters to the Durris factor and printed regulations and conditions of lease of the Durris estate, 1882.  One folder

GIL29  Reports and tables of analysis of superphosphates in England and Germany, including accounts for coprolite raising, 1867.  One bundle

GIL30  Notes by JH Gilbert on journeys to study mining, use and transport of phosphorite in Nassau, Germany, 1867, 68.  One bundle

GIL31  Notes on a search by JH Gilbert and C Smith, his brother-in-law, for phosphates in Devon and Cornwall, 1867 – 8.  One bundle

GIL32  Correspondence and notes, some printed, on establishing RHS scientific committee including the secretary’s address at the first meeting, 1868; printed report of a South Australian commission on diseases in cereals, 1868.  One bundle

GIL33  Correspondence with MA Lawson of Oxford on his experiments with plants, 1871.  One folder

GIL34  Letters from RW Dixon of Essex on crops from a field on his farm, 1874, with tables from 1818.  One folder

GIL35  Letters announcing JH Gilbert’s election as a corresponding member of the committee for agriculture of the Société pour L’Industrie Nationale and his diploma from the Council of the Academy of Agriculture and Forestry of Petrovskoie, 1875, 1878.  Two items, rolled

GIL36  Administrative papers arising from time at Oxford, eg notices of lectures and faculty meetings, letters, invoices for book purchase and binding, 1884, 1887.  One bundle

GIL37  Sibthorpian Professorship: papers concerning JH Gilbert’s appointment as Sibthorpian Professor of Rural Economy at Oxford with list of lecture titles, lists of lectures on rural economy and notes on work on soils by CGB Daubeny, 1840s and 50s; letters about the proposed publication of Gilbert’s lectures; applications for his successor.  One volume

GIL38  Sibthorpian Professorship: letters to and from JH Gilbert during his Oxford professorship, 1880s, with a list of correspondents.  One volume
GIL39 ‘Oxford Letters 1884 – 96’, including letters overlapping with the GIL38. One volume

GIL40 Production papers for Oxford lectures, 1884 – 96. Four boxes

GIL41 Translations, abstracts and notes from the works of others used for Oxford lectures, 19th century. Two boxes

GIL42 Production papers for lectures at the Royal Agricultural College, Cirencester, 1885 – 90. One box

GIL43 JH Gilbert’s reply to a letter of JB Lawes about papers to be published, 1883. One bundle

GIL44 Correspondence and printed leaflets about agricultural and technical education in Cambridge, Oxford, France and Scotland, 1888 – 9. One bundle

GIL45 Draft letter to CD Daine of Preston on cattle feeding, 1895. One item

GIL46 Printed papers relating to the International Agricultural Congress at Budapest, 1896. Five booklets

GIL47 Notes from press cutting agencies about JH Gilbert’s membership of the Pure Beer Committee. One envelope

GIL48 Notes and drafts (very rough) some identified by titles as material for talks and articles, others brief and unidentified, mid – late 19th century. One folder

GIL49 Tables used by JH Gilbert and JJ Willis when speaking to visitors about the Rothamsted fields, late 19th century. One folder

GIL50 JJ Willis’ copy of JH Gilbert’s explanation of the experiments, with notes for visitors, particulars of visitors and Gilbert’s draft of ‘A walk over the Rothamsted experiments’, late 19th century. One folder

GIL51 Mounted table of wheat prices, 1852 – 92, possibly used in talks or demonstrations. Two copies in one roll

GIL52 Lady Gilbert’s list of books, journals and pamphlets in her husband’s library, undated. Three items

GIL53 Letter from Lady Gilbert to EJ Russell on her husband’s papers, 1915, with Russell’s reply. Three items

John Bennet Lawes was a country gentleman who became interested in the relationship between crops and manures when he was in his twenties. This led both to a successful business manufacturing artificial manures and to a long series of experiments on his land at Rothamsted, some of which, ‘the Classicals’ continue in the 21st century. His work is described in two books by GV Dyke ‘John Bennet Lawes, the Record of his Genius’ 1991 and ‘John Lawes of Rothamsted, Pioneer of Science, Farming and Industry’ 1993.

Lawes’ archive at Rothamsted is small and what is here is what chanced to come to the Laboratory. His personal papers would have been kept at his home, Rothamsted Manor and may have been moved, destroyed or lost when the Lawes family finally left the Manor in the 1930s. The Rothamsted Library Archive includes notebooks from his early experiments and a long series of letters to JH Gilbert, his scientific partner (an inveterate hoarder). There is a detailed catalogue of these letters. Other items of interest include two volumes of business and personal diaries and accounts, scrapbooks compiled by his wife and sister-in-law, and a few papers relating to his son Charles.

JBL2 Personal papers
JBL2.1 Diary (left hand pages) and accounts (right hand pages) 1847 – 58, with, at intervals, estate rental, stock valuations, financial summaries, capital accounts and lists of contents of cellar. One very large volume

JBL2.2 Diary, 1863 – 8, accounts 1863 – 79, valuations of assets and lists of money owed, 1860s, 1870s and loose papers. One very large volume

JBL2.3 Notes for a testimonial, c1852. Three items in folder

JBL2.4 Notes on his wife, their married life and her alterations to Rothamsted Manor, late 19th century. One notebook, with transcript

JBL2.5 Death certificate, 1900. One item

JBL2.6 Notes for JB Lawes’ obituary, possibly prepared by Robert Warington, junior, 1900. One folder
Note: D/ELw F94 – 99 at Hertfordshire Archives and Local Studies (HALS) are other items relating to JB Lawes’ life

JBL2.7 Commemorative scrolls, addresses and diplomas awarded to JB Lawes and JH Gilbert including notice from the Minister of State Properties in St Petersburg of Lawes’ election as a corresponding member of the Academic Committee of the Ministry of State Properties, 1863 (with translation); letter to Gilbert on his election as a corresponding member of the Institut Agronomique de Gorigoretsk, Russia, 1863; notice of Gilbert’s election as an honorary member of L’Académie agricole et forestière de Petrovskoie, 1878; commemorative scrolls received from the Royal Society, the Royal Agricultural Society of England, the Linnean Society, the Chemical Society of London, the Royal Agricultural College Cirencester, the Association of American Agricultural Colleges and Experimental Stations, the Union of Agricultural Research Stations in the German Empire and the Société de Agriculteurs de France to mark 50 years of research at Rothamsted, 1893.

Added 2019 from Print Room:

**JG Gilbert Certificates and awards**
- Fringed coloured certificate - Honourable member of the RASE 1893
- Coloured certificate Linnean Society 50th Anniversary of the Field Experiments ND

**JB Lawes Certificates and awards**
- Baronette in RES Hannoversche Landwirthschafts Gessellschaft 1885
- La Societe etablie a Geneve por l’avancement des Arts 1876
- Membership of American Philosophical Society of Philadelphia ND
- Diplome de Member etranger L’academie Royale D’Agriculture de Suede 1811
- Honorary member of the Chemico-Agricultural Society of Ulster 1877

Rothamsted Research – Archive Catalogue
Plus letters and certificates in brown paper – to do

13 items in cardboard folder, one in leather folder, one framed

JBL2.8 Copy of evidence given by Lawes to the Select Committee on the Midland Railway (Extension to London) Bill on 13th May 1863 (Original held in the Parliamentary Archives). One item

JBL2.9 Allotment Club Rules and regulations, 1899; notes, including notes on the Club’s history, 1891 – 1900; reprint of ‘Rothamsted Allotment Club’ from Journal of the Royal Agricultural Society, Vol. 13, 1877. One folder, see also pamphlets volume 117 for Allotment Club rules 1875 and a related letter from JB Lawes

JBL2.10 ‘Japanese Sketch Book from Yokohama, 1867 from G King V. Admiral’. One sketch book, found in the Adams Case, 2008

JBL3.1 Notes by others on JB Lawes
JBL3.1 CB Williams’ notes on JB Lawes and Rothamsted, mid 20th century. One folder

JBL3.2 Miscellaneous notes by Lady Bawden and others on Lawes, including his sugar interests in Australia, late 20th century. One folder

JBL4 Caroline Lawes and the Fountaine family
JBL4.1 Scrapbooks of photographs, watercolour sketches, certificates and newspaper cuttings, and photograph albums compiled by JB Lawes’ wife Caroline, nee Fountaine, before and after her marriage, mid – late 19th century. Four volumes
Note: D/Z55 F 30 – 32 at Hertfordshire Archives and Local Studies (HALS) include other sketches by Caroline Lawes and Elizabeth Fountaine. D/ELw F100 – 102, also at HALS, are other related items.

JBL4.2 Scrapbooks compiled by Caroline Lawes’ sister Elizabeth Fountaine, early – mid 19th century. Three volumes
Note: D/Z55 F 30 – 32 at Hertfordshire Archives and Local Studies (HALS) include other sketches by Caroline Lawes and Elizabeth Fountaine

JBL4.3 Photograph of painting of Hatching Green by Caroline Lawes, late 19th century. One item in folder

JBL5 Charles Lawes-Wittewronge and Caroline Creyke (Lawes’ son and daughter)
JBL5.1 Numerous receipts given to Charles Lawes confirming payments
for goods and services, and for work on the Manor and elsewhere (early 20\textsuperscript{th} century), with CDs of re-constituted receipts and explanatory note. Also a folder containing about twelve similar receipts bought and donated by Harpenden Local History Society. \textit{Five boxes.}

\textbf{JBL5.2}  
Charles Lawes-Wittewronge obituary, 1911, coat of arms, miscellaneous notes, including notes on WL Murray, model for the death of Dirce, mostly photocopies. \textit{One folder}

\textbf{JBL5.3}  
Diploma awarded to Charles Lawes-Wittewronge at the Franco British Exhibition, 1908. \textit{One item, stored in folder with JBL2.7}

\textbf{JBL5.4}  
Coloured sketches of houses in Harpenden by C[aroline] C[reyke], Lawes’ daughter, two identified as Harpenden, 1883. \textit{Four drawings in folder}

\textbf{JBL6}  
\textbf{Family members}

\textbf{JBL6.1}  
Lawes Family Bible, late 18\textsuperscript{th} – early 20\textsuperscript{th} centuries. \textit{One large volume}

email: library@rothamsted.ac.uk
Sir John Bennet Lawes founded the Lawes Agricultural Trust in 1889 to make provision for his experiments to continue after his death. It was altered in 1989 and continues to advance the science of agriculture, see www.rothamsted.ac.uk

The archives below cover the Trust’s foundation, related title deeds (including deeds of properties outside Rothamsted) and estate management up to the late 20th century. They also include JH Gilbert’s reports and correspondence as he remained actively involved until his death in 1901. These are followed by archives from the years immediately after Lawes’ and Gilbert’s deaths when JA Voelcker and AD Hall began to restructure the long term work. There is also a long series of correspondence between Trust members and members of Rothamsted staff.

LAT1 Foundation, title deeds and estate maintenance, 1889 – late 20th century

LAT1.1 Foundation deed, (printed) 1889 and related papers, some referring to the ‘Rothamsted Scientific Trust’, 1870s to 1890s; summary for the Royal Society and agenda for the first Council meeting, 1889; letters from JB Lawes to J Evans on administrative matters, 1889 – 90 and on the future of the experiments, undated, probably late 1890s. One folder

LAT1.2 Agreements between JB Lawes and the LAT, 1889 – 91 and between C Lawes Wittewronge and the LAT, 1903 – 6, including epitome of Trust deed, Counsel’s Opinion on foundation deed, agreement on footpath between Broadbalk and Park Grass, Land Registry letter on land and other charges, tithe redemption certificate and valuations. Also copies, 1905, of JB Lawes’ marriage and death certificates, 1842 and 1900, Mrs Lawes’ death certificate, 1895, C Lawes Wittewronge’s birth certificate, 1842 and death certificate of AJ Russell of Edinburgh, 1887 possibly a party to a mortgage of some of JB Lawes’ property in the early 1840s. All in an envelope labelled ‘Papers taken over in 1927 from Few and Co’ and also including papers received from Few and Co in 1944. One bundle

LAT1.3 Deeds, 1707 – 1812, of Coach Lane Field (formerly and subsequently Ninnings) purchased by William Bailey from Mrs Susanna Race 1812, with abstract of title 1707 – 1811. The earlier deeds include other property in Harpenden. Also tenancy agreement between H Lawes Wittewronge and the LAT for Coach Lane Lodge, 1923, and two agreements between H Lawes Wittewronge and Wilson and Bailey for rights to a gateway onto a path on the Rothamsted estate, 1923. One bundle

Rothamsted Research - Archive Catalogue
LAT1.4 Deeds, 1904 – 5, of the 'residence of the late Sir Henry Gilbert at West Common, Harpenden' including an extract from LAT minutes on C Lawes Wittewronge's offer to sell, conveyance with plan 1905, and transfer of the same property, 1994, with plan of proposed site layout. *One envelope*

LAT1.5 Conveyance with plan from C Lawes Wittewronge to the LAT of ground and two cottages, 1909. *One envelope labelled 'rear of laboratory fronting farm road'*

LAT1.6 Consolidating agreements, with supporting papers, between A Lawes Wittewronge and the LAT, over rights of way and related matters, 1913. *One folder*

LAT1.7 Lease with plan by H Lawes Wittewronge to the LAT of land near Amenbury Lane, 1932. *One envelope with note 'later purchased', in folder with LAT1.6*

LAT1.8 Lease of Home Farm, Rothamsted by A Lawes Wittewronge to the LAT 1912, lease by the Public Trustee to Major RB Sidebottom 1930, statutory declaration as to title of H Lawes Wittewronge 1934, copy conveyances, with plan, 1934 and 1936, of Rothamsted Manor, farm and land by H Lawes Wittewronge to the LAT, lease by the LAT to Mrs Sidebottom 1936 and related deed of surrender of Redbourn Lodge 1938. *One envelope*

LAT1.9 Agreement for compounding liability for repair and maintenance of the north transept of Harpenden Church, 1938, with copy of faculty for rebuilding the church, 1861; extract from faculty, 1911, survey, c1936, copy of agreement and a little related correspondence. *One bundle*

LAT1.10 Abstract of title from 1843, conveyance 1908, deed of appointment, case to counsel, order for sale, search certificates and statutory declaration relating to West Common Mission Hall, sold to the LAT in 1937. *One envelope; a conveyance to the LAT in 1937 was not with these documents when they were transferred and possibly was given to the new owner when the property was sold*

LAT1.11 Tithe redemption plan and a little correspondence, 1934, 1940. *One folder, with roll stored nearby*

LAT1.12 Title deeds of land at Half Acre, Barrow, Suffolk (subsequently part of Brooms Barn Experimental Station), 1751 –1967, conveyed to LAT 1967. *One folder with*
**partial list of contents**

**LAT1.13** Correspondence, mainly with the Public Trustee, with solicitors, Rumball and Edwards, and with surveyors, Rees Reynolds and Hunt, on Mrs Sidebottom's lease after the LAT purchase of the Manor in 1934; on repairs 1935 – 9, referring to panelling, leather and tapestries as well as general maintenance; and on attempts to let the Manor in 1939 after her death. Also, list of 'chattels' purchased by the LAT (garden ornaments, pictures and statues) and inconclusive letters on ownership of books and documents. *One box containing a large number of letters arranged roughly in chronological order*

**LAT1.14** Correspondence with military authorities, solicitors and surveyors on wartime requisitioning, de-requisitioning and maintenance of the Manor, grounds, cottages, demonstration room and other buildings at the farm, plus details of compensation and a schedule of garden fittings, c1939 – 47. *Four folders and two bundles*

**LAT1.15** Correspondence on the farm, alterations to farm buildings, water supply and cattle shed, electrification and electrical installation, silo and Adco shed, purchase, damage by birds and game, proposed stock arrangements, suggestions for improving demonstrations, proposed Woburn reorganisation, extensions (implement shed, lavatory block, covered yard, rat proof barn) 1920s – 40. *Two boxes*

**LAT1.16** Letters and forms relating to war damage insurance and compensation for the farm, laboratory buildings and Manor windows, early 1940s. *Two folders*

**LAT1.17** Correspondence with the ministry and with architects, Freeman and Hodgson, accounts, contract, schedule of condition and plans for the Plant Pathology Laboratory and the Insectary, plus some references to the Director's house, 1920s. *Three folders*

**LAT1.18** Correspondence, specifications and related papers on farm cottages, 1928 – 9 with a report on the condition of estate properties, excluding the laboratory buildings, 1937. *One folder*

**LAT1.19** Correspondence mainly with M Tapper, architect, on extensions, plus a few notes on ministry grants, fittings and electrical installations, 1936 – 9; correspondence; correspondence, notes and plans for a new road behind
the laboratories, 1941 – 5; notes and plans on proposed extensions and refurbishment (apparently throughout the site, excluding the Manor) including new wing extensions, glass/green houses, Professor Blackman's laboratory and NW Pirie's laboratory, 1930s, 1940s. Two boxes

LAT1.20 Correspondence on the lease of fields near New Zealand and Great Harpenden Fields, on the sale of part of Hill Harpenden Field to Harpenden UDC and on the surrender by Mrs Sidebottom of Redbourn Lodge, 1930s. One folder

LAT1.21 Correspondence on the purchase of Rivers Lodge from the Wilson family, subsequent tenants, wartime use, derequisitioning and alterations, 1926 – 51. Six folders

LAT1.22 Correspondence on the purchase of and alterations to Rothamsted Lodge, 1946 – 9. One folder

LAT1.23 Correspondence on exemptions from rates 1939, certificate 1945, copies of the Scientific Societies Act 1843. One folder

LAT1.24 Correspondence on planning schemes, 1930s. Two folders

LAT1.25 Abstract of appointment of trustees, 1944 – 69; deed of appointment of new trustees, 1981; photograph of Lord Radnor's last meeting, 1964; photographs and report of last meeting, 1989. One folder

LAT2 Reports and papers up to the death of Sir Henry Gilbert, 1901

LAT2.1 JH Gilbert's reports to the LAT Committee, with supporting papers, 1889 – 1901. One box

LAT2.2 LAT Committee attendance books, 1887 – 1973, also including attendance at meetings of the Society for Extending the Rothamsted Experiments, 1910 – 87. Four small volumes

LAT2.3 JH Gilbert's correspondence, 1890 – 1901, on LAT matters with H Rix (secretary), JB Lawes and C Lawes Wittewronge, including letters about R Warington junior and H Richter, proposals for continuing experiments and draft summary of the LAT's first five years. One folder

LAT2.4 Invoices and balance sheets, 1883 – 1901. One folder

LAT2.5 Correspondence on the loans to the Natural History
Museum 1899; H Armstrong’s report on lectures in the United States 1890; secretary’s notes, late 19th century. *One bundle*

**LAT2.6** Valuations, notes, letters and reports on insurance of the laboratories and their contents, 1900 – 1. *One folder*

**LAT2.7** Obituary notices, apologies for absence and signatures of those attending JB Lawes and JH Gilbert’s funerals, 1900 and 1901; photographs of their graves, 1948 and 1993. *One bundle*

**LAT2.8** Correspondence and papers on JH Gilbert’s appeal against rates, 1896 – 7. *One bundle*

**LAT2.9** 'Manuscript Reports': bound volumes of JH Gilbert’s reports, 1891 – 7, containing duplicate and final copies of some items in LAT2.1. *One volume, numbered 1 and ending a few years before Sir Henry’s death so there may have been a second volume, since lost.*

**LAT3**

**LAT3.1** JA Voelcker and AD Hall, 1901 – 6

Scheme of work for Rothamsted Experimental Station prepared by EJ Russell 1913-14 with marginal notes by JA Voelcker; details of staff, holiday arrangements, unpublished notes and office clearing, prepared under the supervision of JA Voelcker after the deaths of JB Lawes and JH Gilbert, 1901-03. *One folder*

**LAT3.2** Letters to JA Voelcker and notes and figures on work in progress, 1902. *One bundle*

**LAT3.3** Letters to JJ Willis, station secretary, mainly from JA Voelcker, 1893 – 1902. *One bundle*

**LAT3.4** LAT scrapbook, mainly newspaper cuttings, 1890 – 1902. *One volume*

**LAT3.5** AD Hall’s reports to the LAT, 1902 – 6. *One bundle*

**LAT3.6** AD Hall’s correspondence with H Rix, LAT secretary and H Muller, 1902 – 6. *One bundle*

**LAT3.7** AD Hall’s general and financial notes and memos, 1901 – 6, including inventories of laboratory apparatus, 1903 and 1906. *One bundle*

**LAT3.8** Appeals to the Board of Agriculture and others for funds to continue work at Rothamsted, 1902 – 10. *One bundle*
LAT3.9  Lists of platinum and other vessels borrowed from the Laboratory safe, 1910 – 66. *Two volumes*

LAT3.10  Letters, reports on organization and on current and future plans and financial papers sent to H Muller from AD Hall and H Armstrong, 1910 – 14 and returned by Mrs Muller to EJ Russell in 1916. *One envelope*

LAT3.11  LATC correspondence, 1907 – 11. *One volume*

LAT4  **Correspondence**

LAT4.1  Letters, largely routine, to H Rix from LAT members, accountants and solicitors, including letters from JH Gilbert and AD Hall on general matters, from H Armstrong and B Dyer on their lectures in the United States and from H Muller on financial matters, 1889 – 1910. *Two boxes*

LAT4.2  Carbon copies of H Rix’s out-letters, some of which are replies to letters in LAT4.1. *One volume*

LAT4.3  Carbon copies of letters from Dunkley, Hall, Voelcker and Willis, possibly to H Rix, on administrative matters. *One volume*

LAT4.4  Correspondence, largely routine, of EJ Russell, Station Director and W Barnicot, Station Secretary, with LATC chairmen Lord Bledisloe, 1920s and Lord Clinton, 1920s to 1940s. *Two folders tied as one*

LAT4.5  Correspondence of EJ Russell, Station Director and W Barnicot, Station Secretary with LATC treasurers HE Armstrong 1917 – 40, VH Blackman 1930s – 40, HT Brown 1920, JB Farmer 1930s – 40s, H Muller 1914 and D Prain 1915 – 30s, referring principally but not exclusively to financial matters. *Six folders, tied as one bundle*

LAT4.6  Correspondence, largely routine, of EJ Russell, Station Director and W Barnicot, Station Secretary, with LATC committee members WCD Dampier 1931, JL Luddington 1920s, SU Pickering 1915 – 20s, AB Rendle 1914 – 30s, JB Thorold 1914 – 20s, JA Voelcker 1914 – 20s and TB Wood 1920s. *Seven folders, tied as one bundle*

The numbers LAT5 – LAT9 have not yet been used. LAT 4 is followed on the shelves by LAT 10. Numbers 11 to 19 have also not been used so LAT 10 is followed on the shelves by LAT 21

There are no formal arrangements at Rothamsted for regular transfer of LAT financial papers to the Library Archive but some have been sent to the Library Archives.

**LAT20**

LAT trustees and LAT committee accounts, some signed, 1900 – 90, with gaps, **access restricted**. Six boxes

First box: Laboratory accounts 1901, 1902, 1905; schedule of investments and income 1905.

Letters summarising current financial position plus accounts for the Institute of Plant Nutrition and Soil problems and the Institute of Plant Pathology, 1922.

Fourth box: LAT Committee schedules to balance sheets and accounts, 1949, 1951 – 4, 1964 – 75.

LAT Committee statements of accounts, 1982 – 90

Fifth box: LAT Committee Rothamsted and Woburn farms balance sheets and accounts, 1914 – 16, 1918 – 48

Sixth box: LAT Committee statements of net assets and accounts, Rothamsted and Woburn Farms only 1949 – 54; estate general 1955 – 63, including also some balance sheets etc missing from main series

**LAT21**

LAT, RES and related companies: reports and financial statements, 1991 – 2003. Two boxes, including financial records 1998 – 2003, probably added to the box by Peter Thomas. They are a mixture of photocopies, print-outs, drafts, spares and signed copies. There is a detailed list in the Library, reference LAT21 list, but **access to these papers is restricted**
LAT22 – LAT29 unused
LAT 30 – 49

email: library@rothamsted.ac.uk
Following the success of his early experiments, Lawes established the Lawes Manure Company/LMC to manufacture superphosphate fertiliser. The factories were in east London and retailing superphosphate and other fertilisers became an important part of the business. In 1872, Lawes sold the business, which became known as the Lawes Chemical Manure Company, and then briefly acted as an advisor.

The archives here do not include Company records. The most important part of this collection is the material relating to Lawes’ defence of his patent for manufacturing superphosphate, which shows in detail the complexities of his patent suits.

Lawes also had a factory at Millwall, which manufactured citric and tartaric acid. He retained this when he sold the fertiliser business but there are no clearly identified records of this factory at Rothamsted.

**LCMC1** Lawes Manure Works at Barking and Deptford: tables of materials unloaded and used, payments, expenses and a rough plan, with a few letters to JB Lawes from the manager, Wilson, and Lawes’ report on a visit to sulphuric acid works on Anglesey, 1840s, 1850s. *One large roll*

**LCMC2** Lawes (Chemical) Manure Company notices of sale, 1872; invoices for purchases of fertilizers (mainly) and animal feed from John Bennet Lawes (the Manure Company) and Chas. Tennant Sons & Co., 1872 – 8; a few letters to JH Gilbert from Thos. Bennett on composition of manures, 1873 – 80; diagrams of chamber overhang, 1924, 1925; schedule of deeds of properties in Dublin, 1820 – 89, prepared 1930. *One bundle*

**LCMC3** Lawes (Chemical) Manure Company: advertising brochures, 1864; 1871 – 3; employment agreements for Thomas Elborough, managing director, 1903, 1907; bulletins, 1931 – 4, illustrated cover, 1920s or 1930s. *One bundle*

**LCMC4** Photographs of manure works, some identified as Barking, 1920s, some taken by Aerofilms. *One folder*

**LCMC5** Colour slides and print of ashtray showing the Lawes Chemical Co. Ltd. *(sic)* Deptford Wharf in the 1880s; slide of an illustration of the Lawes Works, Deptford, given to the archives by GV Dyke, who received them from the owner of the ashtray. *Four items*

**LCMC6** Photocopies and letters about Lawes’ patent, mid 19th – mid 20th century. *One folder*

**LCMC7** Lawes’ Super-Phosphate Patent suit: printed pamphlets on mineral manures, 1830s – 50s, annotated copy of patent and
specification, correspondence, witnesses’ reports, notes and case, 1852. Six volumes

LCMC8 Letters from the Lawes Manure Company office to an agent in Kent, late 1840s, with related papers. One folder of photocopies. These items may be consulted but not copied as Rothamsted does not own the original letters; see archivist’s ‘archives elsewhere’ file

LCMC9 One cwt 20th century polysac, used by Manure Company, with picture of JB Lawes. One sack

LCMC10 Newspaper cuttings, 1961. One folder

LCMC11 Folder titled ‘Technical’ and ‘Lawes’ mainly containing advertising brochures, 1920s, 1930s, The brochures do not specifically relate to chemical manure manufacture and may have been collected by a Company employee and later given to Rothamsted Library. One folder

The Rothamsted Library is known as the Gilbert Library as it has developed from Lady Gilbert’s gift of Sir Henry Gilbert’s library to Rothamsted in 1913.

The archives described below are mid – late 20th century Library Committee minutes plus other papers probably first kept by the librarians D Boalch and T Cawley for evidential reasons.

**LIB1** Rare books, prints and manuscripts

**LIB1.1** Notes on library and archives by Librarian (D Boalch) 1950s. 
*One folder*

**LIB1.2** Prints and paintings: bound copy of Boalch catalogue (1958) with notes and valuations, *One volume*

**LIB1.2.1** Walker’s Galleries Exhibition catalogues 1932 (2 copies) and 1934 with introduction by Lord Northbrook: one copy annotated by Boalch. Exhibition catalogues 1985 and 2008. Annotated copy of Boalch’s catalogue with prices and additions. *Six items*

**LIB1.2.2** Correspondence etc on purchases and bequests, 1920s-1990s. *One folder.* General correspondence, 1940s, 1950s. *One bundle*

**LIB1.2.3** Sale of prints and paintings: correspondence, Trustees’ decisions, lists of items sold and sales catalogues, late 1970s, 1980s. *One folder, one bundle*

**LIB1.2.4** Valuations 1980s, 1990s and 2018, *Two folders, one marked up catalogue*

**LIB1.2.5** Correspondence on conservation and framing of prints, 1970s and 1980s. *One folder*

**LIB1.2.6** *Zones of inhibition* annotated proof of catalogue and correspondence on prints. *One spiral bound booklet*

**LIB1.3** Correspondence on transfer of manuscripts relating to agriculture to Reading University, 1960s, 1970s. *One folder; these documents were collected by EJ Russell in pursuit of his aim of making Rothamsted library a centre of research into agricultural history. They were sent to Reading on permanent loan in 1966 – 7. See archivist’s ‘archives transferred’ file for related 21st century correspondence.*

**LIB1.4** Rare books

**LIB1.4.1** Valuations, late 1970s to 2017. *One folder, 2 binders*
LIB1.4.2 Correspondence etc on thefts and losses; general enquiries. 1970s to 1990s. Two folders

LIB1.4.3 Conservation reports, 1980s and 1990s. One folder

LIB1.4.4 Disposal of the collection 2018: sale catalogue; Telegraph article, letter and response; shelf list; annotated printed catalogue. One bundle, one binder, one bound volume.

LIB1.6 Stock books c1913 to 1975

LIB2 Minutes
LIB2.1 Library committee minutes and a few circulated papers, 1943 – 96 (the complete life of the Committee). One box

LIB2.2 Library, Information and Photographic Services Committee minutes, 1996-2002 (the complete life of the Committee). One folder

LIB3 Miscellaneous
LIB3.1 Lawes Coat of Arms: correspondence on restoration, 1950s. One folder

LIB3.3 Library rules 1958, draft guide 1980s and photographs 1980s, 2000s. One folder

LIB3.4 Model wagons: descriptions of models by H.R. Waiting, 1930s; descriptive list by R.A. Salaman, 1969; correspondence on loan of models to City Museum, St Albans, 1969-2007. One folder (Models are now kept with the collection of scientific equipment and other material)

LIB4 Library refurbishment
LIB4.1 Correspondence, minutes and plans for new library buildings 1964-1995. Four folders

email: library@rothamsted.ac.uk
Lawes’ work was becoming widely known by the 1850s and one result of this was that farmers and others collected funds for a testimonial to him. This money was used to build a laboratory to replace the barn in which the first experiments had been carried out. The Lawes Testimonial Laboratory opened in 1855; it was extended by adding the Sample House in 1889 and it remained in use until the northern end of the Russell Building opened in 1913. It was then demolished although the Sample Houses still stands in 2011. The barn in which the first experiments had taken place was also demolished.

The Laboratory was designed by Charles Gilbert, Henry’s brother. He was a poor choice and much of this small archive relates to construction problems.

LTL1 Letters and papers, mainly from C Gilbert, architect, with lists of extras added to original contract, lists of subscribers and committee members, a poetry tribute to JB Lawes and particulars of Rothamsted farm, 1850 – 5. *One volume*

LTL2 Flimsy copies of letters from JH Gilbert to C Gilbert and other family members on the laboratory and financial matters, 1854 – 5. *One folder*

LTL3 Newspapers with reports of the opening of the LTL, 1855. *One bundle*

LTL4 Plans for laboratory internal fittings, 1856. *One bundle*

LTL5 Bible, King James’ version, printed 1760, with note by Edwin Grey suggesting it may have been used for services in the Laboratory while Harpenden parish church was being rebuilt, 1861 – 2. *One volume*

LTL6 Photocopies of documents relating to the Laboratory in the Hodgson Collection held by the Harpenden Local History Society, photocopies made in the 1980s from mid 19th century originals. *One folder*

LTL7 Lithographs by F Dangerfield of the Laboratory exterior and interior, with ground plan, undated, probably 1862 – 3. *Two folders, duplicates*

email: library@rothamsted.ac.uk
Rothamsted Manor is a grade 1 listed building and is described in detail in The Manor of Rothamsted by DH Boalch, 1953, revised 1978. It was occupied from the early 17th century until the 20th by the Wittewronge family and their descendants, the Lawes family; the Lawes Agricultural Trust bought it from the Lawes family in 1934.

The surviving archives of the manor, estate and families were given to Hertfordshire Archives and Local Studies/HALS in 1967 and 1977. Some of the papers described below are photocopies, printed and pictorial items relating to the Manor before it belonged to the Trust. The remainder refer to alterations and refurbishments from the mid 20th century onwards and to sales, enquiries and administrative matters.

**MAN1**

**Families**

**MAN1.1** Wittewronge family

**MAN1.1** Sir John Wittewronge’s weather diary, 1684 – 9 (photocopy, copyright HALS, original HALS D/ELw F19; published by the Hertfordshire Record Society in 1999 as ‘Observations of weather: the weather diary of Sir John Wittewronge of Rothamsted 1684-1689’ edited by Margaret Harcourt Williams and John Stevenson)

**MAN1.1.1** Transcripts of family wills

28 wills from the 17th and 18th centuries

**MAN1.1.2** Transcripts of archives

A calendar of certain Wittewronge documents, being a list of part of the contents of a tin box preserved in the Westminster Bank, St Albans. *One notebook.* Extra Rothamsted Deeds not included in Rothamsted Schedule. Typed from Hardy office files. *One bound typescript*

**MAN1.2** Lawes family

**MAN1.2** See JBL and PHO for Lawes family notes and photographs

**MAN1.2.1** Transcripts of family wills

13 wills from the 18th to 20th centuries

**MAN2**

**Publications and printed items**

**MAN2.1** *Country Life*, 1906: three copies of articles on the Manor, one bound, with an album of 31 photographs used as illustrations and further copies of eight of the photographs. *One bundle, stored separately*

**MAN2.2** Notes and correspondence on preparing the Manor Guide, with letters on the site of the Barn Laboratory and on the age of the Lime Walk and photographs used for frontispiece and plates i,
iv, v, vi, viii, xi-xiv; (plates ii, iii and vii are from Country Life, plates xvii, xix and xx are RCHM, plate xvi is Lawes' portrait, plates xv and xvii not sure). One folder

MAN2.3 Royal Commission on Historical Monuments/National Monuments Record. 44 undated photographs in one folder, copyright RCHM

MAN2.4 Offprints, pamphlets, newspaper cuttings, typescript notes, letters etc on the history and contents of the Manor, the estate, early owners, the Wittewronge and Lawes families, the work of Sir John Lawes and Rothamsted history, 20th century. One bundle

MAN3 Building exterior
MAN3.1 Lithograph of Manor by E Noyes, made between 1843 and 1864. Three copies

MAN3.2 Black and white and colour photographs of water colour painting by Thos Fisher c1804 with note 'original in Herts County Muniment Room'. Two photographs and explanatory note, 2008

MAN3.3 Original, photographs and print of colour picture by A Phipson, 1902. Five items

MAN3.4 Colour photograph on glass, 1912. One glass plate in small wooden container

MAN3.5 Black and white photographs and one colour photograph of the exterior, sculptures and gardens taken 1940s – 80s. 35 photographs in one folder

MAN3.6 Colour and black and white postcards. Twelve cards in one folder, including duplicates

MAN3.7 Colour photograph of picture, probably a water colour, signed WW 1989. One photograph in folder

MAN3.8 Black and white aerial photographs by R Bradley, 1948 or 9. Two photographs in folder

MAN3.9 Greetings card of picture of the Manor by Jean O’Grady, early 21st century, extract from the Art Journal, 1894 and correspondence, 2003. One folder

MAN3.10 Notes on pictures in HALS and the British Library, 2008 (two
One small folder

MAN 3.11 Front, showing croquet hoops on lawn, 20th century. *One photograph in folder*

MAN4 Building interior
MAN4.1 Photographs and photocopies of plans of ground and first floor, c1989 and undated. *One folder*

MAN4.2 Harpsichord, Spanish leather, staircase and stained glass: letters, newspaper cuttings, offprints and photographs, 20th century, plus example of leather. *One folder*

MAN4.3 Wall paintings: correspondence on identification, with photographs, 1930s – 51. Correspondence and reports on conservation, 1990s. *One bundle; two folders*

MAN4.4 Colour slides, 1970s, of interior and wall paintings. *8 slides in plastic box*

MAN5 Building restoration, refurbishing and conservation
MAN5.1 Plans for alterations, 1946 – 8; photographs of reopening event and of parts of the interior eg refurbished rooms, other rooms, wall painting and ceilings, 1952; letters about loan of chairs by Lord Radnor, 1952, 1971; two coins dug up in the Courtyard; various newspaper reports and magazine articles, 1952; list of Colonies contributing to the Manor House reserve account, 1953; rules for access to the Manor House, 1953. Also plans of alterations, with date 1960 added but more likely to be of the 1950s work. *One folder, plus one roll stored separately*

MAN5.2 Black and white photographs of clock tower repairs, details of rebuilding celebration, 1979. *One folder*

MAN5.3 Conservation report, on the dining room, staircases and wall paintings, 1996. *One black binder*

MAN5.4 Heritage appraisal by Beacon Planning Ltd, May 2016. *One folder*

MAN6 Contents
MAN6.1 Pre-20th century
MAN6.1.1 Inventories: 18th century (photocopy, original HALS D/ELw E2). *One folder, copyright HALS*

MAN6.2 Acquisitions
**MAN6.2.1** Plans of a chair made from wood from the Manor, 1937 and pictures taken in 2008. *One folder*

**MAN6.2.2** Note on recently acquired pictures in the manor, 1986. *One small item in folder*

**MAN6.3** Manor paintings

**MAN6.3.1** Correspondence etc, with Sir John and Lady Lawes about their pictures on loan to Rothamsted, 1953 – 1980. *One folder*

**MAN6.3.2** Lists of pictures, newspaper cuttings, photographs and statements concerning the theft, 1979 – 80. *One folder*

**MAN6.3.3** Sotheby’s sale catalogues, 1979, 1980. *Eight catalogues (one bundle, stored separately)*

**MAN6.3.4** Correspondence, valuations, sale details etc on sale of pictures by Sir John and Lady Lawes and on LAT purchases, 1979 – 81. *One folder*

**MAN6.3.5** Illustrated list of paintings sold by the Lawes family, compiled from sale catalogues by Roger Plumb, 2008. *One folder*

**MAN6.3.6** Provisional description of painted glass panels (date and authorship not known); notes on the Manor paintings, 1995; notes on iconography and attribution of Jacques and Jacob Wittewronghele portraits, 2001; National Portrait Gallery conservation reports for Jacob and Jacques Wittewronghele portraits loaned for exhibition September 2013. *One folder*

**MAN6.3.7** Correspondence and conservation reports for portraits of Lawes and Gilbert 1989. *One folder*

**MAN6.3.8** Photographs of Manor paintings prepared for T. Cawley, 1970s. *One box*

**Sales**

**MAN6.4.1** Inventories of furniture and heirlooms, 1930s and of contents, 1940. Christie’s sale catalogue dated 14<sup>th</sup> May 1936; Rumball & Edwards sale catalogue dated 16<sup>th</sup> April 1940 (3 copies). *One folder*

**MAN6.4.2** Catalogue of 17<sup>th</sup> century library at Rothamsted for sale by Hodgsons for the Lawes-Wittewronge Will Trust, 1936. *Catalogue (2 copies) and one photocopy*

**MAN6.4.3** Correspondence, photographs etc on sales and attempted sales by Bonham’s and Sotheby’s of pictures including the Flemish Last Supper and Tillman still life, 1980. *One folder*
**MAN6.5 Transfers**

Correspondence on the deposit of Wittewronge and Lawes family and estate records, formerly in the Manor, to Hertfordshire Record Office, 1967; further correspondence on making this deposit a gift, 1977. *One folder*

**MAN7 Gardens and grounds**

**MAN7.1**
Notes, newspaper cuttings and colour slide relating to the Manor ice house, cleared in the early 1980s. *One folder*

**MAN7.2**
Letters about a seat near the croquet lawn in memory of David Wylie-King (at Rothamsted 1947 – 81). *One folder*

**MAN8 Estate**

**MAN8.1**
Photograph of 13th century deed referring to Rothamstedefeld and related letter, 1898. *Two items; the original deed is at HALS but the reference isn’t obvious from the HALS catalogue.*

**MAN8.2**
Catalogue for sale of growing crops from Rothamsted Park Farm, 1834. *One item*

**MAN9 Administration**

**MAN9.1**
Manor Residents’ Committee minutes, circulars and letters, c1980 – 2006. *One folder, received from Norman Carreck in 2006 with covering letter, not sorted or appraised; not available for consultation, consult librarian*

**MAN10 Miscellaneous**

**MAN10.1**
Water wheel sketch on tracing paper dated 1901. *One folder*

**MAN10.2**
Letters asking for photographs of portraits at the Manor, from Robert Bolleurs on a possible portrait of Sir John Wittewronge by Rembrandt, 1969 – 70 and from J Everdij on portraits of Mary Everday, 1976 – 7. *One folder*

**MAN10.3**
Insurance plaque for County Insurance, undated, probably 19th century. *One item*

**MAN10.4**
Letters and reminiscences from code-breakers stationed at the Manor during World War II, 1995 onwards. *One folder; access restricted, consult Librarian*

**MAN10.5**
Photographs of Stantonbury church interior and exterior and the surrounding area, probably taken early 1950s for the Guide to the Manor of Rothamsted. *One folder*
MAN10.6  Fire escape notice, 1973 and explanatory note, 2018. One item

MAN10.7  Threads of Time: catalogue of an exhibition of textile works based on documents in the Wittewronge collection at Hertfordshire Archives and Local Studies, 2014. One item
**MET**

Meteorology, 1840s onwards

email: library@rothamsted.ac.uk
Measurements of weather and related phenomena have been recorded at Rothamsted in increasingly structured formats since the mid 19th century. The information collected was essential to the experimental work and papers were published on rainfall and drainage.

Most of this series is meteorological returns and records. There are also volumes noting weather conditions and related matters, plus a few references to then current affairs, from the mid to late 19th century and some miscellaneous weather related papers.

Much of this series would merit further examination and possible renumbering and rearrangement as it has not come systematically or regularly to the Library Archives.

**MET1**  
**Meteorological returns, 20th century**  
*Transferred to the archives in the mid 1990s and from Farm/Field Experiments in 2002*

**MET1.1** Returns, mainly from Rothamsted, a few from Woburn*, 1921 – 2004:  
Recording rain gauge charts  
Thermograph/Hygrograph charts  
Barograph charts  
Daily weather sheets, original  
Daily summary and weekly sheets  
Wind charts and analysis sheets  
*75 boxes numbered 1 – 95, with gaps, partial list in the first box*

**MET2**  
**Meteorological records, mid – late 19th century**  
*Found among the archives in the annexe strongroom in the 1980s, so transferred before 1984*

**MET2.1** Notes on sowing dates, sheep weights, 1840s, rainfall, temperature, burning and drying, 1848 – 9; tables of water collected in large and small drain gauges, with dates, times and some weather observations, 1853 – 68. *One volume*

**MET2.2** Fair copies of notes in previous volume, 1853 – 84, plus additional calculations to 1873. From 1873, there are figures from rain and drainage gauges in Barnfield, wind directions and, from 1878 maximum and minimum temperatures, notes on weather conditions and occasionally on local and national events. *One volume*

**MET2.3** 1885 – 1904 containing similar information to MET 2.2 above. *One volume*

**MET3**  
**Meteorological returns, mid – late 19th century**  
*Transferred to the archives in the 1990s*

**MET3.1** Copies of data from observations at Harpenden Common and Rivers Lodge sent to the Meteorological Office, 1873 – 96. *22 volumes, many with spine damage, and one bundle*
**MET4**  **Miscellanea**  
*Found among the archives in the annexe strongroom in the 1980s*

**MET4.1** Printed meteorological tables by Bennet Woodcroft, 1854 – 5, including the weather in the Crimea, sold in aid of the Patriotic Fund; weather chart for November 1828 and temperature graphs, 1872, 1873.  *One folder*

**MET4.2** Letters from the Meteorological Office on weather returns, 1876 – 84.  *One folder*

**MET4.3** Statistics from Meteorological Office weekly weather reports including details from Rothamsted, 1880s – c1900.  *One folder*

**MET4.4** ‘Miscellaneous Meteorological Data’ with figures from drain gauges, 1878 – 1932, including work by RS Koshal, atmometer readings, 1921 – 30, correspondence with the Meteorological Office and with individuals, 1934 – 9.  *Seven files in one bundle, possibly once held in the Statistics Department*

**MET4.5** ‘Composition of various Well Waters’: analyses of well waters, including wells in Harpenden, 1879 – 93, with printed ‘Specification of Thomas Clark for purifying and softening water’, and notes, 1860s – 1900s.  *One bundle*

**MET4.6** ‘Hay Harvest forecasts from the Meteorological Office’: reports on Rothamsted weather and forecasts from the Meteorological Office, 1879 – 98.  *One bundle*

**MET4.7** JH Gilbert’s correspondence on the publication of ‘Some illustrations of the Connection of Aggregate Temperatures and Agricultural Production,’ 1886, including letters from other scientists and a French translation of the paper.  *One folder*

**MET4.8** ‘Bright sunshine recorded in the Rothamsted Allotment Gardens’ 1891 – 1910.  *Seven files, which form a complete series as bright sunshine recording started in 1891 and the last file here says ‘subsequent to December 31 1909 the Sunshine cards have not been copied’.*

**MET4.9** Tables, notes and newspaper cuttings on rainfall and climate in Rothamsted and elsewhere, including Scotland, Hertfordshire and London, mid 19th – early 20th centuries.  *One bundle*

**MET4.10** Completed forms B with meteorological statistics from Craibstone, Aberdeen, Sprowston, Norfolk and Wye, Kent, 1924 – 8.  *Three files*
MET4.11 Printed observers’ handbook for the British Agricultural Meteorological Scheme and reports on phenological observations in the British Isles, 1925 – 9. *Five pamphlets*

MET4.12 Correspondence with universities, local authorities, agricultural colleges, MAF and the Meteorological Office about the British Agricultural Meteorological Scheme, with committee minutes, information circulars and progress notes, 1929 – 30. *Eight folders in one bundle*

MET5 *Meteorological records, mid 19th – mid 20th century*

*Transferred from Statistics in 2002 and from the Fertilizer Building by Paul Poulton in 2008. Mostly small notebooks, some of which have traces of an earlier numeration*

MET5.1 Barometric observations, 1862 – 3. *One notebook*

MET5.2 Notebooks recording rain and drainage water collected, plus occasional notes on the weather and the condition of the equipment, 1873 – 1904. *16 notebooks, numbered A3 – A18*

MET5.3 Notebook recording drainage through 18 inch pots, 1874 – 6. *Two notebooks, one previously numbered A23*

MET5.4 Rain and drainage figures, 1904 – 13, 1915 – 30, with comparisons of averages from earlier years. *Five notebooks, two previously numbered B8 and B9*

MET5.6 River’s Lodge meteorological records, 1910 – 27. *Three notebooks*

MET5.7 Barnfield meteorological records, 1925 – 30. *Two notebooks*

MET5.8 Ground thermometer records, 1915 – 30. *Five exercise books, some previously numbered B1 – B5 and one exercise book and three notebooks, previously numbered 8 – 10*

MET5.9 Barometric pressure recordings, 1903 – 16. *Two notebooks, previously numbered B6 and B7*

MET5.10 ‘Pocket Registers of Normal Climatological Observations’, Rothamsted (cloud, heat, pressure, rain, wind, general weather), 1915 – 30. *11 hard cover notebooks, some numbered B13 – B20*
MET5.11  Meteorological Registers and ‘Pocket Registers of Normal Climatological Observations’, Woburn* (cloud, heat, pressure, rain, wind, general weather), 1902 – 64. 42 hard cover notebooks; April 1902 – August 1904 numbered 8 – 11; March 1905 – March 1907 missing

MET5.12  Supplementary and additional observations, Woburn*, late 1930s – early 1950s. Four hard cover notebooks

MET6  Miscellaneous numbered folders

   Transferred from the Farm in 2002 and 2004, possibly overlapping with MET7, records transferred from the Farm and Fertilizer Building in 2008

B2  Rothamsted meteorological records long period summary, 1930 – 66

B3  Woburn* daily meteorological records, 1974 – 81.

B4  Woburn* meteorological records long period summary, 1930 – 67

B5  Saxmundham meteorological records: correspondence, instructions and blank forms, 1960s

B6  Saxmundham daily rainfall, 1966 – 78

B7  ‘Current Saxmundham meteorology including 16 year means and Saxmundham weekly meteorological record’, 1980s

B7a  Saxmundham monthly summaries, 1977 – 85

B8  Saxmundham annual meteorological summaries, 1968 – 80

B8a  Saxmundham weekly and monthly meteorological record sheets, 1966 – 81

B9  Saxmundham meteorological summaries, 1960 – 80 and long period summary, 1930 – 66

B11, B12  Saxmundham meteorological and drainage instrument field and laboratory sets, 1930s, 1940s

B13  Roth, Woburn* & Sax Comparable Met Data

B14, 15 Solarimeter notes and instructions, 1960s – mid 1970s

B16  Saxmundham evaporimeter results, 1967 – 81

B17  Drainage tables, mainly undated, ?1970s

B20b  Rothamsted, Saxmundham and Woburn*: tables of rainwater evaporation, 1969 – 79

B22a  Saxmundham drainage tables, 1966 – 80

B22b  Saxmundham drains recharge data, 1963 – 73

B25  Rothamsted, Saxmundham, Woburn* and elsewhere: silicon in drainage waters and rain, 1974 – 81

B26  Saxmundham: key elements lost on drainage, 1975 – 9

B27  ‘Miscellaneous drainage papers’, 1970s

B52  Notes on Saxmundham drainage, 1960s, pamphlets, 1934,59,65,66, aerial photograph, 1965

B53  Estimates and notes on Barnfield and Broadbalk

Rothamsted Research - Archive Catalogue
drainage, 1970s with unnumbered envelope ‘Proposals for Barnfield Drainage. Barnfield Pit 1973
C9 Saxmundham root growth investigations
C30 Notes on Geescroft drainage, 1971
Total three boxes, files previously numbered and not renumbered; see ST6 in the Saxmundham and Tunstall collection for other Saxmundham meteorological records, 1973 – 87.

MET7 Meteorological records, 20th century
Transferred from the Farm and Fertiliser Building in 2008, possibly overlapping with MET6, records transferred from the Farm in 2002 and 2004

MET7.1 Meteorological Station Instrument Book, begun by HV Garner, 1921, recording readings and maintenance, August 1921 – July 1974. One volume, numbered 456

MET7.2 Radiation figures, October 1921 – December 1988, with gap May 1922 – September 1923. Ten notebooks

MET7.3 Evaporation figures, February 1948 – December 1963. Three notebooks

MET7.4 Sunshine record cards, 2000 – 4, plus three mounted from 1993. One box, overfull

MET7.8 Rothamsted monthly rainfall and drainage, 1923 – 42. One file

MET7.9 Rothamsted monthly rainfall, 1943 – 2000. One file

MET7.10 Rothamsted monthly sunshine and mean temperature, 1924 – 74. One file

MET7.15 Drainage charts, Rothamsted and Woburn*, 1978 – 86. Seven boxes

MET7.16 Barometric pressure measuring charts, Rothamsted, 1990s. One box; some items too large for box

MET7.17 Barometric pressure measuring charts, Woburn*, 1990s. One box; some items too large for box

MET8 Folders transferred early 21st century
Transferred by Tony Scott of Soil Science in 2008
Eighteen boxes, contents not examined

MET9 Charts transferred early 21st century
Transferred by Tony Scott of Soil Science in 2011
Wind charts, January 2005 – October 2010. One large box

MET10 Meteorological returns from Broom’s Barn
Transferred from Broom’s Barn on closure in 2014
Monthly returns of daily observations 1964-February 2009
Hourly precipitation data 1983-April 1995. Three boxes

*Additional Woburn meteorological records are stored at WOB9

A General Microbiology Laboratory is first mentioned in the 1925–6 Rothamsted report. The Soil Microbiology Department was formed about 1939–45 by the amalgamation of the Bacteriology and General Microbiology departments. In 1983 it was part of the Soils Division and in 1987 was part of Soils and Crop Production.

The archives below are those of one member of the department only. Dr Barbara Mosse was in Rothamsted Soil Microbiology Department from 1954–80 and was a pioneer of research into mycorrhizal fungi.

**MIC1**  
**Barbara Mosse, died 2010**

**MIC1.1**  
Glass negatives of mycorrhiza taken from c the mid 1940s to the early 1960s, stored in brown envelopes with detailed descriptions. The earlier ones date from the time when Barbara Mosse worked at East Malling Research Station. There is an accompanying “List of Lantern slides” (stated to be 2" x 2" whereas Lantern slides per se are c 3" x 3"). The reference numbers on the list do, however, correspond to the numbers assigned to the negatives and to some of the glass slides in the Box below. *One non archive quality box*

Black and white photographs in 14 folders, undated but some with identification and/or reference numbers; one notebook, 1940s, 50s. Also a box of 35 mm glass slides and transparencies. Some of the glass slides have numbers that correspond to numbers on the list in the Box above. *One box*

Black and white photographs, undated, most identified. *One large divided folder in one box*

**MIC1.2**  
Published papers including joint papers, 1950s – 2000s (no way of knowing if this is a complete series). *One large bundle*

Published papers and extracts from papers written by others, including some used by Dr Mosse for reference and sent to her for comment. *One large bundle*  
*These two bundles are in one box*

Notes and some published papers brought together by Dr Mosse and identified by her as  
Axenic Culture  
Bonfanta reprints  
Carbon Drain  
Geosyphon reprints and letters plus Bécard C¹⁴O₂  
Biancotto/Bonfante endobacteria in AM fungi  
Guillaume (Bécard)  
Interactions with other micro-organisms  
J Garbaye INRA  
Jacques Mugnier
Jean Garbaye
Munns
Mycorrhiza, EM pictures, Sexuality, Various notes, more or less current suggestions
Nutrition, heavy metal toxicities, techniques, new ideas
OPPP pathway; significance of CO$_2$; literature on dark fixation of CO$_2$
13 envelopes and folders in one box, probably including duplicate printed papers

Letters from fellow scientists, invitations, comments etc.
Personal photographs, cv and list of publications.
Miscellaneous notes for papers, lectures etc, some of which may overlap with box 2.
*Three folders, one ring binder in one box*
MSS

Manuscripts relating to agriculture, 17th – 19th centuries

Updated 17 June 2013
These documents have no connection with Rothamsted but are what remains of a collection formed by EJ Russell in the 1920s and 1930s to further his wish to make Rothamsted a centre for the study of the history of agriculture. A list in Rothamsted Library illustrates the breadth of the original agricultural documents collection.

Later directors did not develop the idea of an agricultural history centre and most of the documents were distributed to other institutions in the 1970s.

**MSS1** Bond of Hugh Taylor of Walderton, Sussex, gentleman, to Richard Platte of London, 1592.  *One document*

**MSS2** Letter from Arthur Young asking for employment, 1782.  *One document*

**MSS3** Autograph letters of HL Duhamel de Monceau, agriculturalist, 1753 – 67.  *Five documents*

**MSS4** Correspondence and other papers of Sir John Sinclair and others, 1779 – 1807.  *One volume*

**MSS5** Correspondence and other papers of Sir Joseph Banks, mainly letters to Banks from Sir John Sinclair and others, 1783 – 1814.  *One volume*

**MSS6** Letters from Sir John Sinclair (mainly) and others to Sir Joseph Banks, with some drafts by Banks referring to the Board of Agriculture, 1794 – 1804 and documents relating to establishing the Institution for Diffusing the Knowledge of Useful Mechanical Inventions, 1799 (the Royal Institution).  *One volume*

**MSS7** Letters on coinage, corn prices and foreign affairs from Lord Liverpool to Sir Joseph Banks, with a few draft replies, 1797 – 1804.  *28 letters*

**MSS8** Plans of battles in Europe, c 1818.  *One volume*

**MSS9** Letters from Eleanor Ormerod, entomologist, to Parlour of Darlington about insect attacks on wheat, 1885 – 9.  *One bundle; See RUS2.5 bundle 6 for a letter from W Parlour to EJ Russell about buying cattle prints.*

**MSS10** Envelope labelled ‘Mummy wheat sent to Rothamsted by Sir Wallis Borge. See letters in the Times’, 1934.  *One envelope*

email: library@rothamsted.ac.uk
It is not clear why some letters and papers were taken from their original bundles and bound together to form these volumes. The most likely explanation is that this was part of the director EJ Russell’s wish to make Rothamsted a centre for the study of agricultural history.

The volumes include letters from prominent scientists but the contents are not arranged systematically, the summaries below are not comprehensive and the index is inaccurate and inadequate.

PC1 1844 – 74: ash analysis

PC2 1855 – 67: dispute with Liebig; papers on experimental wheat in Kent; composition of wheat; composition of animal food; superphosphate analysis; permanent meadowland; Woburn wheat; E Pugh; woody fibre and T Segeleke.

PC3 1854 – 81: general administration.

PC4 1853 – 1901: general administration; rainfall and drainage.

PC5 1860 – 7: nitrogen; phosphate supplies; animal feeding experiments; cattle transport; work of Liebig and Voit; barley and malt experiments.

PC6 1862 – 80: sewage; RHS Scientific Committee; Rivers Pollution Commission; Sewage Commission

PC7 1860 – 93: Robert Warington junior; animal fat experiments; cereals in South Australia; sugar beet experiments; H von Liebig.

PC8 1872 – 98: barley, sewage, beet manure and grass experiments; JL Thudichum and J von Liebig; Woburn soil; loans for exhibition; administrative matters; weather returns.

PC9 1880 – 4: meteorological observations; British Association address; rainfall and drainage; bread reform; cellulose; nitrogen; chlorophyll; clover; BJ Grosjean; Society of Chemical Industry; animal food.

PC10 1884 – 1901: Montreal address; A Voelcker; work on manure, animal food, allotments and nitrogen; cattle weights; J Mason; grass, nitrogen and sheep experiments.

PC11 1890 – 1900: grain valuations; agricultural education; publications; Chicago exhibition; Rothamsted jubilee.

PC12 1895 – 1900: animal, barley, wheat and manure experiments and publications.

PC13 1897 – 1901: Robert Warington junior; Royal Commission on Agricultural Depression; Beer Materials Committee; sugar beet; milk production; barley; segment grater; Wibourg phosphate; permanent grassland; Rouna’s book on Rothamsted, loans.
PC14 1900 – 1: Paris exhibition; B Dyer’s American lectures; unexhausted manures; C Daubeney.

PC15 1860s – 1904: Robert Warington junior; testimonials.

PC16 1896 – 8: Beer Materials Committee.

PC17 1863 – 1900: wheat crop.

PC18 1848 – 82: business papers.

PC19 1840s onwards: tables.

PC20 Index.

Updated 3 September 2019
The collection of photographs and other pictorial items listed below starts with pictures of Rothamsted’s founders and continues into the present century. They are loose and in albums. Items relating to Rothamsted include formal and informal pictures of the site and of staff and a few drawings and paintings, some of which may have been prepared as teaching aids. The collection also includes pictures of 19th century scientists and photographs of agriculture in England and occasionally overseas.

Some photographs were taken by outside bodies for publication in newspapers and magazines. These studios may still exist, possibly under a different name, so please ask the Librarian about copyright and reproduction.

A photographer is mentioned for the first time in the staff list in the 1923 annual report. The Rothamsted Visual Communications Unit/VCU has a large collection of photographs but it is not catalogued.

Some DVDs are held of television broadcasts which include Rothamsted and Rothamsted staff.

**PHO1**  
**PHO1.1**  
*JB Lawes and JH Gilbert*  
Photographs, drawings and prints of JB Lawes, JH Gilbert and their close families, 19th – 21st century. *One box*

**PHO2**  
**PHO2.1**  
*Staff, site and experiments*  
Photographs of the site, the interiors and exteriors of buildings, staff, directors, machinery etc, late 19th and 20th centuries where the photographic studio or photographer can be identified.

**PHO2.1.1**  
*Rothamsted fields, buildings, staff and work, external studios and photographers*  
Aerofilms: tractors, one with a trailer and advertisement for Lawes’ disinfectant, probably 1920s; aerial views of site/farm, 1954 (in green folder); 1968, 1969 and earlier undated; correspondence about aerial photography, 1949 – 54, 1961.

Architect, the: Russell building interior and entrance hall, 1917

Associated Press: Broadbalk Wilderness, staff in laboratories, Suffolk Punches, one photograph dated 1938.

Bradley RH (temporary Rothamsted staff member): site from the air.

Central Press Photos Ltd: buildings including laboratories and equipment, glass houses, farm, insectary, library, and Russell building; staff including Bawden, Bremner, Crawley, Game,
Hopkins, Lord, Nixon (with first electron microscope), North, Rickson, Watson, Wilkinson, probably 1950s.

Country Life: general views, 1943

Daily Mirror: electron microscope, clover, lettuces, 1944

Daniel of Ford Motor Co., Dagenham: tractors, 1940

Farmer and Stockbreeder: pig feeding experiments, 1934

Fox Photos Ltd: botany department water culture experiments, 1942; Land Army gang refreshment break and WVS van

Frederick Thurston: various items in display cases, captions in French so possibly showing preparations for an exhibition, late 19th century

Henk Snoek/Snoek-Westwood: site buildings, interiors and exteriors, 1966 – 7

Humphrey Joel: drain gauge, laboratories, library, undated, probably 1950s

Keystone Press: laboratories and farm with staff, not identified, 1939.

1. Effect of fertilizers on wheat
2. 'The most famous land drain in the world'
3. Suffolk Punches
4. Manure shed
5. Russell building and commemorative stone
6. Horse and tractor ploughing
7. 96th crop from Broadbalk, missing
8. Sheep
9. Tractor ploughing
10. Insecticide investigations, breaking up soil
11. Insecticide investigations, counting insects from soil
12. Plant Pathology, transmitting virus diseases
13. Plant Pathology, inoculating plants
14. Plant Pathology, recording plants
15. Plant Pathology, student taking notes
16. Plant Pathology, examining cultures
17. Fermentation, testing sewage effluents
18. Botany, identifying grasses
19. Bacteriology, growth of protected seedlings
20. Chemistry, grinding soil for analysis
Keystone: staff: Rolt, Sage (Botany), Custance, Walker (Plant Pathology), 1940

London News Agency/LNA: exhibition for Regina, 1933; staff: Cunow, Turner, Watson (Plant Pathology), Cashen, Russell, Tamhane (Physics), Hall, Walker in sample house, 1938

London News Agency/LNA: staff: Baty (Physics) Gough (Plant Pathology) Hogg/Rolt (Bacteriology) Sage (Botany), 1941

London News Agency/LNA: unidentified staff in glass houses, laboratories and sample house, probably 1940s
London News Agency/LNA: unidentified staff in glass houses and laboratories and aerial views of glass houses, probably 1940s

Oliver G. Harvey: Postcard view of Russell Building, probably 1940s

Pacific and Atlantic Photos: insectary, staff at work in glass houses and laboratories, Browne, Davidson, Handschin, unidentified, 1927

Photopress: unidentified staff in laboratories, one dated 1935

Pictorial Press: equipment and staff most unidentified plus Bishop (Botany) Bradley (Plant Pathology) Green Kelly, Gillum and Smith (no department), probably 1940s

Sport and General Press Agency Ltd: electrical equipment at the farm demonstration, 1936

Sport and General Press Agency Ltd: Annual Gathering, 1937

Sport and General Press Agency Ltd: buildings, experiments, equipment, experimental fields, 'helping to win the war by science', laboratories, machinery, staff, (Crook, Garner, Garrett, Kleczkowski, Ogg, Russell, Williams) visitors (Bledisloe, Hudson, Norfolk, Radnor, Reventlow, Salisbury, Sobolev, Zonoff) 1930s, 1940s

Sport and General Press Agency Ltd: experimental fields, farm and laboratories, some showing staff including Dyke, probably 1950s

Sunday Pictorial: Watson (Plant Pathology) c1940 and two staff.

Sun Photographic Bureau: farm machinery, probably 1960s
The Times: turnip experiments in glass house; cows feeding, both undated probably 1950s

PHO2.1.2 Photographs taken by Rothamsted photography department
International harvester tractor `Titan' first used 1919; buildings, equipment; experimental fields; machinery; Orion computer; pig bell; pudding stone; staff; female staff working on Park Grass during or shortly after the War showing masts on Manor roof; views from the air, 1940s – 70s
PHO2.1.1 and PHO2.1.2 are in one box

PHO2.2 Photographs of staff and others
PHO2.2.1 Staff members, visitors and others, individuals and small groups
Allen, Dr ON and Mrs Allen
Armstrong, Henry Edward, FRS
Arnold, Lucy; Munt, Olive; Staines, Mona, 1935
Barnard, Mildred 1935
Barnes of Woburn, 1934
Barnicot, W, MBE, LAT secretary 1920 – 46
Bigg, C, caretaker and ashburner and Rumball S, laboratory assistant
Bledisloe, Lord and Lady (one folder)
Budden, Lt W, 1916
Butler, Colin, 1976
Clinton, Lord 1937
Davies, botanist in charge of 1877 separations
Grey E and G Lawrence seed sowing on garden clover plot, 1921
Grey E and Mr Wells of the Potash Syndicate in Barnfield, possibly late 1880s (there are other photographs of E Grey in STA1)
Hall, AD, director (two)
Havas, Laszlo (Plant pathology) and family
Hawkins and Pearce, 1935
Heintze, Miss SG, 1936
Herrod-Hempsall, Morland, Tan
Hutchinson, HBH
Immers, FR of Minnesota
Keen, sub lieutenant
Kleczkowski, Nina
MacTennan, captain
McDougall, R 1934
Marshall of Canada 1936
Miller, HG
Morland and Rolt, 1935
Nutman, Dr PS
Most of these photographs are in one folder, together with two unidentified photographs. The photographs of Bledisloe are in a separate folder and those of Clinton, Thornton, Warington and Willis are too large for a folder and are loose in the box. A few have the photographer or studio identified.

PHO2.2.2 Group photographs of staff, boxed
Harvesting 1893, original and postcard
Staff, manor employees or unidentified group, c 1900
Staff 1910, identified
‘Tea party Sept 1910’ male staff, identified
Staff 1912, a few identified
Staff having tea outside, 1911 or 1912, two postcards, some staff identified
‘Rothamsted lab people’ 1913, two old and two modern copies
Soldiers in Rothamsted Park 1916, postcard
Heads of Departments: RAF (Fisher); JHS (Henderson Smith); ADI(Imms); DWC (Ward Cutler), 1931-1932
Crowther, EM; Gregory, FG; Page HJ; Sen Gupta, N; Singh, Karak; Winter, RM, 1921
Staff outside Russell building, showing wartime use of ground for vegetables, undated, possibly taken for 1943 jubilee, two copies, one fragile
Olive Coleman’s retirement party c1973
Staff, most probably retired staff, c1970, identified
All these photographs are in one folder

PHO2.2.3 Group photographs of staff, loose
Staff 1912, a few identified on smaller boxed copy
Staff 1918/9, two copies, one identified
Staff 1918/9, taken at the same time as the group above

*There are framed copies of these photographs in the Rothamsted Archive of Scientific and Other Equipment*

**PHO2.2.4** Silhouettes and identifications of the loose group photographs (PHO2.2.3); scanned copies of photographs of the Testimonial Laboratory and Russell Building, and of the testimonial laboratory interior (originals in the Rothamsted Archive of Scientific and Farm Equipment). *One folder*

**PHO2.2.5** Group photographs of staff by department
Identified and taken in 1958 to mark Sir William Ogg’s retirement:
Bee, Biochemistry, Botany, Canteen, Chemistry, Commonwealth Bureau of Soils, Dunholme Field Station, Entomology, Farm, Hall of Residence, Imperial College, Insecticides, Library, Administrative, Clerical and Photography, Maintenance, Nematology, Pedology, Physics, Plant Pathology, Soil Microbiology, Statistics and Field Experiments, Woburn. *One folder*

**PHO2.2.6** Unidentified photographs of individuals and small groups. *One folder*

**HO2.2.7** Pictures of scientists

Etchings of directors AD Hall, WG Ogg and EJ Russell are catalogued in ADH, DIRS and RUS as ADH10.2, DIRS1 and RUS1.4.

**PHO2.3** Site
**PHO2.3.1** First laboratory
Exterior (four copies of one view) and interior (one view) possibly dating originally from about 1875, plus explanatory note. *One folder*

**PHO2.3.2** Testimonial Laboratory and Sample House
Exterior and interior (many duplicates) including photographs
showing Brenchley with grass pickers Basil/Warren, Kingham, and Morgan. One photograph has the date 1854 but this may be the date of the building, which opened in 1855; others are dated 1888 – 1920 or are undated. One folder, some photographs copyright the Daily Mirror, Humphrey Joel and Rothamsted.

**PHO2.3.3** Russell Building and James Mason Laboratory
Exterior and interior including the greenhouses on the roof and at the south end, Library and laboratories showing Brenchley, Hannaford Richards, Hutchinson, Jackson, Matthews, Morgan and possibly Pearce, some dated 1920. One folder, including a pencil sketch of a laboratory interior.

**PHO2.3.4** Farm
Buildings, vehicles and machinery including tractors, horse drawn drill, barns and farm manager’s house, early – mid 20th century, many undated. One folder.

**PHO2.3.5** Directors’ House
Exterior and interior, 1922. One folder.

**PHO2.3.6** Aerial photographs
**PHO2.3.6.1** Broadbalk 1925, later copy; site 1930 taken by Air Ministry; site 1955, 1956, 1972, 1976 and undated. One folder, one item loose in box.

**PHO2.3.6.2** Rothamsted and Harpenden, June 1973. One roll.

**PHO2.3.7** Miscellaneous
Decolorisation in clay 1895; Broadbalk bomb hole, 1921 or 1922 (bomb dropped by Zeppelin on the night of 3 September 1916); tennis court opening, 1921; drain and drain gauge, undated; North Building construction, 1920s; Broadbalk and Geescroft Wilderneses 1933; Little Knott I mobile shelter, 1980; sub soil plots and old botany bird cages undated. One folder, two items loose in box.

**PHO2.3.8** Framed and glazed pictures
Watercolours of the Manor by Gwen Marr, 1983; Cherry Cottage and barns by R Welyczko 1985; Director’s Garden and Russell Building by GC Barwise 1987; crayon sketch of ploughing, possibly Broadbalk, by E Inez Jones 1919. Five items.

**PHO3** Photograph albums
**PHO3.1** General albums
**PHO3.1.1** ‘English Agriculture 1’: photographs of Rothamsted 1949 – 1955,
many by Aerofilms Ltd. *One large album, many pages unused*

**PHO3.1.2** ‘English Agriculture 3’, with photographs of views and farming scenes including Rothamsted, probably 1930s. *One large album*

**PHO3.1.3** Untitled album of photographs of demonstrations and trials of machinery for the conversion of waste woodland, 1942. *One album*

**PHO3.1.4** Untitled album of photographs of field and indoor experiments, staff and buildings, early 1940s. *One album*

**PHO3.1.5** Album presented to EJ Russell as a memento of the Cawthron Institute, New Zealand, 1929. *One album*

**PHO3.1.6** Album of very faded photographs of pot experiments, mainly tomatoes, testing effects of soil sterilisation, probably 1911, with unrelated loose letter from A Amos of Wye. *One album*

**PHO3.1.7** Album of domestic and landscape photographs of places in England and Wales, early – mid 20th century, plus one photograph of harvesting barley in Long Hoos field, 1923. *One album*

**PHO.3.2** Green albums

*Small green photograph albums probably compiled by or for EJ Russell in the 1910s – 40s, and including some copies of earlier items, eg JB Lawes’ notebooks. There is no evidence of who compiled them although some of the photographs may have been received from visitors. Most have some loose photographs in a pocket at the end.*

**PHO3.2.1** 'Rothamsted fields': photographs mainly of farming, some with captions, including many photographs of sheep and including also photographs of wheat samples, of loaves and of the annual gathering 1934.

**PHO3.2.2** 'Rothamsted laboratory': photographs of the Manor, the interior of the first laboratory, the Testimonial Laboratory, the Sample House, rain and drain gauges, JB Lawes and JH Gilbert’s portraits and notebooks, staff, work in progress, groups, visits and the Director’s garden. Plus plan of the Director’s garden (1 roll shelf H3)

**PHO3.2.3** ‘Rothamsted’: photographs of laboratories, staff, work in progress, Red Gables, JB Lawes and JH Gilbert’s sunshine register and of a sundial at Madras Cathedral.

**PHO3.2.4** 'Counties – views and experiments': photographs of fields and
crops, some identified as Dorset, Kent, Lincolnshire, Norfolk, Surrey and Yorkshire plus soil plans of Kent and Sussex.

PHO3.2.1 to PHO3.2.4 are in one box

PHO3.2.5  'Other experimental stations': photographs of buildings and work in progress at Woburn, Harper Adams, Lincluden House Dumfries (with letter), Lea Valley, Thetford and Wye; also in Australia, Canada, New Zealand, Sierra Leone and unidentified.

PHO3.2.6  'Experimental stations USA and Canada': photographs of buildings and experiments

PHO3.2.7  'Cattle': photographs of prize winning cattle.

PHO3.2.8  Untitled: interior and exterior photographs of unidentified buildings, fields and work in progress, possibly all of Hawkesbury College, New Zealand.

PHO3.2.5 to PHO3.2.8 are in one box

PHO3.2.9  'Fertilizers': loose photographs of Garford, Leeds, Stapleford Abbotts, Essex, Hoos barley and Barnfield mangolds, Aberystwyth, slag making and Nomansland Common.

PHO3.2.10  'Production of fertilizers': photographs of nitrate of lime industry in Norway, phosphate deposits on the Nauru and Ocean Islands, Manchester Corporation Sewage plant and an unidentified sewage plant.

PHO3.2.11  ' Implements': photographs of drawings of prehistoric and mediaeval implements, mostly ploughs; photographs of steam and horse ploughs and other agricultural machinery in the British Isles, Germany and North America including photographs of tractor trials at Rothamsted.

PHO3.2.12  'Soils': a few photographs of soils at Redbourn, Wheathampstead, Hambledon and unidentified places.

PHO3.2.9 to PHO3.2.12 are in one box

PHO3.3  Grey albums

Four small grey photograph albums probably compiled by or for EJ Russell; most of the photographs are from The Times.

PHO3.3.1  Photographs of the countryside and of agricultural and related subjects in the United Kingdom, Holland and New Zealand, eg hay making, ploughing, and reed cutting, the reclamation of the Zuyder Zee and sheep husbandry, 1930s, plus some loose newspaper.
cuttings.

**PHO3.2** Photographs of the countryside and of agricultural and related subjects, eg hay making, ploughing and timber processing in England, Scotland and Canada, plus a copy of an undated picture of Liebig’s assistants at Giessen.

**PHO3.3** Photographs of the countryside and agricultural and related subjects in the United Kingdom and France, eg the use of electricity on a farm, hop picking, cider making and collecting resin, 1930s.

**PHO3.4** Photographs of the countryside and of agricultural and related subjects in the United Kingdom, eg harvesting, thatching and threshing, late 1930s and early 1940s.

**PHO4** Decorative and educational
Life and work at Rothamsted 1960s. Two large preparatory pencil sketches by CG Johnson; final versions displayed in the Bawden building 2013

**PHO5** DVDs
Item on GM research at Rothamsted, featuring Huw Jones and John Pickett. Starts at 58 mins 40 secs.

BBC’s The One Show: Day of the Aphids. Broadcast on Friday 17th August 2012.
Richard Harrington talks about aphid monitoring Video starts playing at 2 minutes.

BBC’s Horizon: What’s Killing our Bees? Broadcast Friday 2nd August 2013.
Includes interviews with Lin Field, Jason Chapman, Stephan Wolf and Jason Lim.

BBC 4: Insect Dissection Broadcast Wednesday 28th August 2013
Gia Aradottir talks about the science of insect antennae.

Includes filming from Rothamsted, specifically Broadbalk and the Wheat Timeline.
PROD

Production papers for work begun by JB Lawes and JH Gilbert, 1840s onwards

| Extent and form: | 50 boxes, mainly paper in reasonable condition; one bag, two bundles, some damage at edges. Seven boxes and five binders, all PROD 8.20, mainly paper in reasonable condition. |
| Administrative history: | Created at Rothamsted Laboratory |
| Custodial history: | Probably stored in the laboratory from 1840s onwards; in the annexe strongroom before 1984; some files moved to Statistics, 1970s and returned to the library, 1990s; further material added 2009 |
| Accruals: | Possible, the Classical Experiments are ongoing |
| Existence of copies: | None known |
| Related material at Rothamsted: | None known |
| Related material in other repositories: | None known |

Lawes and Gilbert wrote extensively about their experiments in scientific journals and also gave lectures to scientific societies. The archives below were generated when preparing their papers and lectures. They include notes and drafts, letters about content and printing, abstracts and translations of their own and related papers, plans and diagrams. Subjects covered include their experiments on animal feeding, cereals, grassland, meteorology, nitrogen, root and leguminous crops, rotation, sewage and silage.

Many of the bundles have not been fully examined. Some have had papers taken out, before 1984, and mounted in the PC/Papers and Correspondence volumes. Other archives of experiments are in the DRAF and EXP series

PROD1   Nitrogen
PROD1.1  Drafts and supporting papers for ‘Agricultural Chemistry, especially in relation to the mineral theory of Baron Liebig, JRAS 12, 1851. One bundle

PROD1.2  Production papers for JH Gilbert’s address to the British Association in Glasgow, including material used in ‘On some Points connected with Agricultural Chemistry’ JRAS 16, 1855. One large bundle; see Ambix volume 37, part 3, November 1990 for ‘Leibig, Gregory and the British Association’ by WH Brock and S Stone

PROD1.3  Drafts of ‘On some Points connected with Agricultural Chemistry, being a reply to Baron Liebig’s Principles of Agricultural Chemistry’ JRAS 16, 1855. One bundle

PROD1.4  Notes and abstracts by JH Gilbert on Liebig’s work and related work of others; Gilbert’s translation of Liebig’s letters 30 – 37; Lady Gilbert’s translation of Liebig’s Einleitung and other works; English and German newspapers with articles on the controversy between JB Lawes, Gilbert and Liebig, Gilbert’s copy of Liebig’s ‘On the Principles of Artificial Manuring’, 1840s – 70s. One large bundle, formerly C23.1

PROD1.5  Letters to JH Gilbert, mainly from A Voelcker and Dr Paul on translating works of Gilbert and Liebig, 1850s, 1860s. One small bundle

PROD1.6  Letters from Liebig to Mechi on JB Lawes and JH Gilbert, science in England and sewage, 1863 – 4, with some typescript copies. Also one letter introducing Lawes to Liebig written by Thomas Graham and dated 1st December 1843. One folder

PROD1.7  Production papers for ‘On the Sources of the Nitrogen of Vegetation, with special reference to the Question whether Plants Assimilate Free
or Uncombined Nitrogen’ by JB Lawes, JH Gilbert and E Pugh, Phil. Trans. 1861, 1850s, early 1860s. *Two boxes*

PROD1.8 Production papers for ‘Preliminary Notice of Researches on the Assimilation of Nitrogen by Plants’ by JB Lawes, JH Gilbert and E Pugh for the British Association, 1857. *One bundle*

PROD1.9 Diagrams and drawings relating to E Pugh’s work, 1857 – 60. *One large bundle stored separately*

PROD1.10 *number not used*

PROD1.11 Production papers for ‘On the present position of the Question of Sources of Nitrogen of Vegetation, with some new results and Preliminary Notice of new lines of investigation’ Proc. Roy. Soc. 43 and Phil. Trans. 180, 1889. *Three boxes*

PROD1.12 Production papers for ‘Preliminary Notice of New Experiments on the Question of the Fixation of Free Nitrogen’ Proc. Roy. Soc. 47, 1890. *One bundle*

PROD1.13 Production papers for ‘The Sources of Nitrogen of Leguminous Crops’ JRAS 3rd series 2, early 1890s. *Three bundles*

PROD2 Rainfall, drainage and meteorology

PROD2.2 Production papers for ‘The Effects of the Drought of 1870 on some of the Experimental Plots at Rothamsted’ JRAS 2nd series 7. *One bundle*

PROD2.3 Production papers for ‘Our Climate and our Wheat Crops’ JRAS 2nd series 16, 1880. *Two bundles*

PROD2.4 Production papers for ‘New Determinations of Ammonia, Chlorine and Sulphuric Acid in the Rain-water collected at Rothamsted, JRAS 2nd series 19, 1883. *One bundle*

PROD2.5 Production papers for ‘On the Amount and Composition of the Rainfall and Drainage Waters collected at Rothamsted’ JRAS 2nd series 17 and 18, 1881 and 1882, including tables for rainfall and drainage experiments, continuing into the 20th century, tables relating to Broadbalk and Barnfield drains, references to wells in Harpenden, plans of drains and weather notes. *Three boxes, largely unsorted*

PROD2.6 Correspondence of JH Gilbert and Voelcker on Broadbalk drainage water, related papers and notes by Gilbert and Voelcker and tables of Broadbalk drainage, late 1860s, early 1870s. *One bundle*
PROD2.7 Analysis of Broadbalk drainage water, notes on Rivers’ Pollution Commission 1st report, pamphlets on London water and Leicester sewage, late 1860s, early 1870s. One bundle

PROD2.8 Plans for Barnfield drainpipes, early 1870s. One bundle, separate

PROD2.9 Plans, notes and specifications for Broadbalk brick drainage trench; also a lysimeter in the Meteorological Enclosure (the ‘Bear Pit’), filled c1990. One bundle

PROD2.10 Notes from the Registrar General’s report on weather, tables of temperature and weather at Chiswick and Rugby and of temperature and rainfall at Chiswick, Greenwich, Nash Mills and Rothamsted, 1840s – 90s. One bundle

PROD2.11 Tables of Barnfield rainfall and drainage waters, with other rainfall and temperature tables, 1850s – c1916. One bundle

PROD2.13 Photographs of drain and rain gauges built in 1870, probably prepared c1925 as a teaching aid. Four items

PROD2.14 Report on draining Broadbalk section 9 and diversion of drains 0 – 8 1993. One paper document and one camcorder or video tape

PROD3 Wheat

PROD3.1 ‘Report on the Experiments on the Growth of Wheat at Holkham Park Farm’ JRAS 16, with supporting papers including reference to experiments at Woburn and Rodmersham, Kent, 1850s. One bundle

PROD3.2 Production papers for ‘On the Growth of Wheat by the Lois-Weedon System’ JRAS 17, 1856. One bundle

PROD3.3 Production papers for ‘On some points on the Composition of Wheat Grain, its products in the Mill and Bread’, an address to the British Association at Cheltenham, 1856, printed in JCS, 10, 1857, with correspondence, notes on foreign wheat and determinations of wheat quality throughout the world, 1840 – 8, probably relating to the International Exhibition of 1851 but also used for Cheltenham paper. One bundle

PROD3.4 Production papers for ‘Report on the Experiments made at Rodmersham, Kent, on the Growth of Wheat’ JRAS 23, 1862, with earlier supporting figures from Rothamsted, Woburn and Holkham. One bundle
PROD3.5 Production papers for an address to the British Association in Dundee on 'Preliminary Notice of Results of the Composition of Wheat Grown for Twenty Years in Succession on the Same Land', 1867. One bundle

PROD3.6 Production papers for 'On the Home Produce, Imports and Consumption of Wheat' JRAS 2nd series 4, 1868, using figures from the 1850s – 68; for Jour. Stat. Soc 43 and JRAS 2nd series 16, 1880 using figures to 1880; for The Field, using figures to 1887 and for JRAS 3rd series 4, 1893 using figures to 1892. Four bundles

PROD3.7 Printed articles issued by the Bread Reform League and The Miller, correspondence of JH Gilbert and Miss Yates, the League secretary and related letter from Graham of University College, London, all with information for Gilbert’s ‘Letter on Bread Reform’ Jour. Soc. Arts, 1880, 1881. One bundle

PROD3.8 Production papers for 'On the Composition of the Ash of Wheat-Grain and Wheat-Straw grown at Rothamsted' TCS 45, 1884. One bundle

PROD3.9 Correspondence relating to the 'Report of Experiments on the Growth of Wheat for the second period of Twenty Years in Succession on the same land' JRAS 2nd series 20, 1884. One bundle

PROD3.10 Production papers for 'The Depression of Corn Prices and the Production of Wheat in some of the chief exporting Countries of the World', JRAS 3rd series 7, 1896. One bundle

PROD3.11 Newspaper cutting, notes and tables relating to a letter on 'The World's Wheat Supply' in The Times, with related correspondence, 1898. One bundle

PROD3.12 Tables for Broadbalk wheat, with notes, including notes by JB Lawes, 1840s – c1930. One box

PROD3.13 Notes on work by Wolff on the relationship between plants and manure and by Anderson on beans; other rough notes on the composition of wheat and beans and tables of work at Rothamsted on wheat and beans, 1840s – 60s. One bundle

PROD3.14 Tables for Barnfield wheat, 1847 – 52. One bundle

PROD3.15 Tables with title 'Experiments on Wheat alternated with Fallow and Smith’s wheat plots, 1856 – 74, which eventually became the Exhaustion Land Experiments’ including tables of ash and dry matter in grain and straw, of manure, of wheat dibbed following Smith’s plan, of produce with notes for Plot O and of alternate wheat and fallow, 1850s – 1930s. One bundle
Tables of results from different varieties of wheat; list and description of wheat supplied to Rothamsted by Hewlins; printed paper ‘The Law of the development of cereals, 1860s – 90s. One bundle

Tables relating to wheat, flour and bread consumption by named families in Harpenden, with more general figures on wheat, flour and bread consumption and notes by JB Lawes, 1869. One bundle

Valuations of and notes on wheat and barley grown on Broadbalk, Hoosfield and Agdell by Hewlins and Few, with related correspondence, 1889 – 1902. One bundle

Mounted newspaper cuttings of JB Lawes’ annual letters on the wheat crop, related letters from others, 1863 – 1900 and letter by Lawes in The Echo, November 1894. One volume, two bundles

The Echo, November 1894 with a letter by JB Lawes. One bundle

Soils
Some documents from PROD4 were scanned in 2008. There is a list in PROD4.7

Production papers for ‘On the Accumulation of the Nitrogen of Manure in the Soil’ JH Gilbert’s address to the British Association in Nottingham, 1866. One folder

Production papers for ‘Determinations of Nitrogen in the Soils of some of the Experimental Fields at Rothamsted and the bearing of the results on the question of the sources of Nitrogen of our Crops’ JH Gilbert’s address to the American Association at Montreal, 1882. One bundle

Production papers for ‘On some points in the Composition of Soils with results illustrating the fertility of Manitoba prairie soils’ JH Gilbert’s address in Montreal, 1884. One folder

Correspondence, newspaper cuttings, timetables and advertisements relating to JH Gilbert’s visit to Montreal, 1884. One bundle

Production papers for ‘Nitrogen as Nitric Acid in the Soils and Subsoils of some of the fields at Rothamsted, JRAS 2nd series 19, 1883. One folder

Tables of average weights of fine dry soils at Rothamsted and percentages of nitrogen at various depths, 1890, with figures from 1840s – 90s. One folder

Particulars of soil sampling in Broadbalk, 1846 – 1914; sampling for the following dates has been separated into folders and scanned in 2008: 1846, 1856 (with analysis of 1856 Hoosfield soils, also called Smiths’ Wheat and Lois Weedon and later the Hoosfield potato experiment and

Rothamsted Research - Archive Catalogue
then the Exhaustion Land); 1865 (analysis by H von Liebig); 1865 (with notebook); 1881; 1893 (details re sampling); 1893; 1893 (chemical analysis); 1895 (Upper Butts, later the Wilderness, including comments on plant species). *Eight folders and one box with table of some of the data converted to grammes and then soil weights in Mkg/ha for the first two depths prepared and added December 2007*

**PROD4.8** Particulars of soil sampling in Geescroft, 1857 – 85, with directions for sampling, 1883. *Five folders, four of which were scanned in 2008*

**PROD4.9** Particulars of soil sampling in Agdell, 1867 – 1914. *Six folders, four of which were scanned in 2008*

**PROD4.10.1** Particulars of soil sampling in Hoosfield Permanent Barley, 1868 – 1913, also referring to Hoos Half Acre (alternate wheat and fallow). *Five folders, four of which were scanned in 2008*

**PROD4.10.2** Particulars of soil sampling on Hoosfield Leguminous and Wheat land, 1881 – 98. *One bundle*

**PROD4.11** Particulars of soil sampling in Rothamsted Park, 1870 – 86. *Five folders, four of which were scanned in 2008; one (1870) included descriptions of procedure and of species composition on the three sampled plots; one (1876) also includes references to sampling other fields, especially Hoos barley, 1882.*

**PROD4.12** Particulars of soil sampling in Barnfield, 1870 – 1901. *Three folders, two of which were scanned in 2008*

**PROD4.13** Particulars of soil sampling in Little Hoos, 1873 – 93. *One folder*

**PROD4.14** Particulars of soil sampling in Woburn Stackyard field and Mr Phillips’ field, 1876. *Two folders, one of which was scanned in 2008*

**PROD4.15** Particulars of soil sampling in Sawpit, Claycroft and Fosters fields, 1881. *One folder*

**PROD4.16** Particulars of soil sampling in Broadbalk, Hoos fallow and Hoos barley, 1901. *One folder*

**PROD4.17** Lists of samples and analyses of various Rothamsted soils, 1840s – 80s, and analysis of French and Russian soils, c1875. *One folder*

**PROD4.18** Notes on ‘various soils’, including Irish soils, late 19th century. *One folder*

**PROD4.19** Rough notebooks and tables for sampling Broadbalk, Hoos and Park Grass soils, 1914 – 6. *One folder*

**PROD4.20** Rough notes on Rothamsted soil samples, 1915 – 6. *One folder*
PROD4.21 Tables of water, per cent and per acre, in different fields, 1860 – 80. One folder

PROD4.22 Tables and notes on nitrogen as nitric acid in various Rothamsted soils, mainly 1880s, with samples from 1860s onwards. One folder, damaged by damp

PROD4.23 Analysis of soils taken from Kitchen Garden and Barnfield for filling 18” pots, 1874. One folder

PROD4.24 ‘Particulars relating to Roots found in samples of Rothamsted soils’ 1846, 1870s. One folder

PROD4.25 Analysis of soil from India (no details) with correspondence and report, 1879; correspondence about a visit from Wilson of India, an engineer and related pamphlet, 1880. One folder

PROD4.26 Tables and notes on nitrogen, carbon and carbonate of lime in deep seated clays based on samples from the Geological Survey Office, London, 1870s – 1900s. One folder

PROD4.27 Tables relating to samples from Rothamsted Garden Clover Soils, 1854 – 97. Four folders, three of which were scanned in 2008

PROD4.28 Tables relating to experiments on the use of Swedish seed, 1875. One folder

PROD4.29 ‘Nitrogen determinations of various crops and vegetation’, early 20th century. One folder

PROD5 Barley

PROD5.1 Production papers for ‘On the Growth of Barley by different manures continuously on the same land; and on the position of the Crop in Rotation’ JRAS, 18, 1857. One bundle

PROD5.2 Production papers for ‘On the Growth of Barley for Twenty years in succession on the same Land’ JRAS 2nd series 9, 1873, with a translation of part of Liebig’s preface to Ueber Gahrung Quelle der Muskelkraft und Ernahrung on the ‘self evident’ ‘truths’ of his theories. One bundle

PROD5.3 Production papers for ‘On the more frequent Growth of Barley in Great Britain’ a talk to the London Farmer’s Club, 1875. One folder

PROD5.4 Tables and lists of samples supplied by Munro and Bevan, authors of ‘Manurial Conditions affecting the Malting Quality of English Barley’, 1890s. One folder
PROD5.5  Hoosfield barley: tables of ash, chemical statistics, dry matter, manures and produce, 1852 – c1915.  *One bundle, with many duplicates*

PROD5.6  Barnfield barley: tables of ash, composition, dry matter, manures and produce, 1853 – 5.  *One bundle*

PROD5.7  Tables, notes and correspondence relating to experiments commissioned by the Board of Trade on losses from barley during malting, the food values of barley and malt and the use of both in animal feed, 1860s.  *Two bundles, one folder*

PROD5.8  Hoosfield barley straw: tables, notes and correspondence on the investigation of permanent tissue by Bevan, Cross and Smith, 1888 – 96.  *One folder*

PROD6  Roots
PROD6.1  Production papers for ‘The Growth of Sugar Beet and the Manufacture of Sugar in the United Kingdom’ JRAS 3rd series 9, 1898.  *One bundle*

PROD6.2  Tables and notes on experiments with turnips (swedes) in Barnfield, 1843 – 70.  *One bundle*

PROD6.3  Tables and notes on experiments with mangolds in Barnfield, 1876 – 1916, with picture 1899.  *One bundle*

PROD6.4  Tables and notes on experiments on sugar beet in Barnfield, 1871 – 5.  *One bundle*

PROD6.5  Notes entitled ‘large roots’ about Dublin and Brockley Park, Ireland and printed report ‘On the Composition of some green crops and the undesirability of growing very large roots by Cameron, RSAI chemist, 1874 – 5.  *One folder*

PROD6.6  Data and notes on root experiments in Barnfield, 1847 – 69.  *One bundle*

PROD7  Leguminous crops
PROD7.1  Draft ‘Report on the Growth of Red Clover by different Manures, JRAS 21, 1860 with notes and a plan of clover plots, 1852.  *One folder*

PROD7.2  Hoosfield clover: tables of ash, dry matter, nitrogen and produce per acre with notes and diagrams, 1849 – early 20th century.  *One folder, one bundle*

PROD7.3  Hoosfield leguminous land: tables and notes on produce and composition of leguminous plants, 1878 – 1902 and growth of other crops to 1922.  *One bundle*

PROD7.4  Tables and notes on Rothamsted garden clover, 1850s – 1920s.  *One bundle*
PROD7.5   Letters to JJ Willis on red clover disease, 1889.  One bundle

PROD7.6   Correspondence, some in German, of JH Gilbert with Noble and others on work on hard shelled clover seed, 1877 – 9.  One bundle

PROD8    Grassland
PROD8.1   Tables for work on grassland, mid 1850s – late 1870s.  One large bundle, with many papers damaged, stored separately

PROD8.2   Production papers for ‘Report of Experiments with Different Manures on Permanent Meadow Land’ JRAS, 20, 1858, including botanical notes on grasses at Rothamsted.  One bundle

PROD8.3   Production papers for the ‘Effects of different Manures on the Mixed Herbage of Grass Land, JRAS 24, 1863.  One bundle

PROD8.4   Production papers for ‘Further report of experiments with different manures on Permanent Meadow Land, JRAS, 24, 1863.  One folder

PROD8.5   Notes and tables on the botany of experimental grass plots for MT Masters of the Gardeners’ Chronicle and other notes on Rothamsted grass plots, 1860s, 1870s.  One folder

PROD8.6   Draft letter of JB Lawes to Stokes on the mixed herbage of permanent meadow, c1873.  One folder

PROD8.7   Tables and lists of samples of Rothamsted Park hay for ‘Agricultural, Botanical and Chemical results for Experiments on the Mixed Herbage of Permanent Grass Land conducted for many years in succession on the Same Land, Part III: the Chemical Results’ for Phil. Trans. Volume 192, 1900.  One folder

PROD8.8   The Gardeners’ Chronicle with a report of an article ‘Note on the Occurrence of Fungi on the various Plots devoted to Experiments with different Manures on Permanent Meadowland in the Park, Rothamsted’ and related notes and correspondence, 1874.  One folder

PROD8.9   Analysis of fairy rings in various Rothamsted fields, drafts for ‘Contribution to the Chemistry of Fairy Rings’ TCS 43 and pamphlet on Fairy Rings by Buckman, 1870s, 1883.  One folder

PROD8.10  Production papers for JB Lawes’ lecture to the London Farmers’ Club on ‘Exhaustion of the Soil in relation to Landlords’ Covenants and the Valuation of Unexhausted Improvements, 1870.  One folder

PROD8.11  Draft of ‘Unexhausted Tillages and Manures, with reference to the Landlord and Tenant (Ireland) Act, 1870’ and notes and newspaper cuttings, 1875.  One folder
PROD8.12 Correspondence, notes, tables and newspaper cuttings relating to ‘On the Valuation of Unexhausted Manures’ JRAS 2nd series 11, 1875. One folder

PROD8.13 Correspondence, notes, tables and newspaper cuttings and a paper in German by Wolff relating to ‘On the Valuation of Unexhausted Manures’ JRAS 2nd series 21, 1885. One bundle

PROD8.15 Notes on Fream’s paper ‘The Herbage of Old Grass Lands, 1888 – 9 and on the ‘rye grass controversy’. One bundle

PROD8.16 Production papers for ‘The History of a Field Newly Laid down to Permanent Grass’ JRAS 2nd series 25, 1889, using figures from Gilbert’s Meadow from the 1860s onwards. One bundle

PROD8.17 Abstracts of results of field experiments with different manures, with figures from 1843 onwards, with notes and drafts and related letters from Ville to JH Gilbert and brief correspondence of Gilbert with Mangou, Barral and Boussingault, 1857 – 8. One bundle

PROD8.18 Tables and notes on botanical separation and the mixed herbage of grass land, 1850s – 90s. Three bundles

PROD8.19 Notes on the composition of artificial manures, farmyard manure and feeding stuff, plus tables, letters and analyses, 1840s – c1900 and Lawes Manure Company circulars, 1861 and 1898. One bundle

PROD8.20 Data sheets, summaries, computer print-outs, diagrams and notes for Highfield and Fosters field ley arable experiments, R/RN1 and R/RN2, 1949 – c1990. Seven boxes, five binders; see also EXP15

PROD9 Rotation

PROD10 Feeding

PROD10.1 Production papers for ‘On the Composition of Foods’ a talk to the British Association in Belfast, 1852. One bundle

PROD10.2 Production papers for ‘Agricultural Chemistry: Pig Feeding’ JRAS 14, 1853. One bundle
PROD10.3 Production papers for ‘Experimental Enquiry into the Composition of some of the Animals Fed and Slaughtered as Human Food’ Phil. Trans, part II, 149, 1859. One bundle

PROD10.4 Notes for a speech by JH Gilbert to the Chemical Society ‘On the Composition of the Animal Portion of our food and on its relation to Bread’, 1859, with later notes and tables on the composition of foods, beer and milk in Harpenden c1851, weight, height etc of named individuals in Harpenden, 1851 – 63 and correspondence with and paper of Edward Smith on experiments on human foods. One bundle

PROD10.5 Drafts for ‘Observations on the Recently Introduced Manufactured Foods for Agricultural Stock’ JRAS 19, 1858, with printed advertisements for animal foods, pamphlets on animal nutrition and notes by Lawes on his use of Thorley’s cattle condiment in experiments. One bundle

PROD10.6 Draft ‘Report of Experiments on the Fattening of Oxen at Woburn Park Farm, JRAS 22, 1861, with tables, notes and correspondence from 1849. One bundle

PROD10.7 Production papers for ‘On the Composition of Oxen, Sheep and Pigs and of their increase while fattening’, JRAS 21, 1860. One bundle

PROD10.8 Production papers for ‘Supplementary Report of Experiments on the Feeding of Sheep’ JRAS 23, 1862 with tables and calculations from 1848 onwards. One box

PROD10.9 Production papers for JB Lawes’s paper to the Royal Dublin Society ‘On the Science of Feeding, as applied to the production of Meat and Manure, 1864. One bundle

PROD10.10 Production papers for ‘On the Sources of Fat of the Animal Body’ a lecture to the British Association in Nottingham, printed in Phil. Mag. 32, 1866. One bundle

PROD10.12 Printed copies of Versuche Über die Fettbildung in Theirkorper by Soxhlet, with letters, notes and tables, 1881. One bundle

PROD10.13 Production papers for ‘Supplement to a former paper entitled “Experimental enquiry into the Composition of Some of the Animals Fed and Slaughtered as Human Food, Phil. Trans. 174, 1883. One bundle

PROD10.14 Production papers for ‘The Feeding of Animals for the Production of Meat, Milk and Manure and for the Exercise of Force’ JRAS 3rd series 6, 1895, with some translations of foreign works. One bundle
PROD10.15 Production papers for ‘The Valuation of Manures obtained by the Consumption of Foods for the Production of Milk’ JRAS 3rd series 9, 1898. *One bundle*

PROD10.16 Tables relating to sheep experiments, 1843 – 63. *One bundle*

PROD10.17 Tables and calculations for experiments on the comparative fattening qualities of Cotswold, Hampshire, Leicester, Sussex and crossbreed sheep, 1850 – 3. *One bundle*

PROD10.18 Tables relating to sheep grazing, 1856 – 69. *One folder*

PROD10.19 Tables, calculations and notes on experiments to determine the feeding quality of equal weights of linseed cake, cotton cake and cotton feed, 1866. *One folder*

PROD10.20 Tables, analyses and notes by Voelcker on sheep feeding experiments on cotton cake, maize meal and roots, 1877. *One folder*

PROD10.21 Tables, calculations, analyses and notes on sheep feeding experiments at Whittingham, Norfolk, 1888 – 9 compared with experiments at Rothamsted in 1850 – 1. *One folder*

PROD10.22 Tables, notes and calculations on Woburn sheep feeding experiments, 1880s – 90s, referring also to Rothamsted experiments in 1850s and 1860s, with report of Woburn experiments published in JRAS 3rd series 1895 and other printed papers. *One bundle*

PROD10.23 Sheep killing books, 1851 – 3, 1866. *Three notebooks*

PROD10.24 Notebooks with weights of sheep, their food, dung and urine, 1860, 61, 66. *Seven notebooks*

PROD10.25 Tables and notes on the 2nd – 5th series of pig feeding experiments on the relationships between food consumed and live weight increase; also tables, notes draft report and letter of Lawes’s on the 6th experiment, 1850, 51. *Four bundles*

PROD10.26 Tables and notes on experiments on the relationship of nitrogenous foods and work, with a diagram of the rack in which pigs were held, 1854, 62. *Two bundles*

PROD10.27 Miscellaneous tables on Rothamsted pigs, 1850s and undated. *One folder*

PROD10.28 Tables and notes on experiments with adding wine and spirits to pig food. *One folder*

PROD10.29 Pig killing books, 1850s, 1860s. *Three notebooks*
PROD10.30  Pig feeding experiment notebooks, 1850.  *Four notebooks*

PROD10.31  Tables relating to Rothamsted bullocks, 1847 – 99.  *One bundle*

PROD10.32  JB Lawes’s ‘Tables for estimating dead weight and value of cattle from live weight’ with advertising notice and a few letters, 1888.  *One folder*

PROD10.33  JH Gilbert’s notes on dairying, including notes on the Midland Dairy Institute, Kegworth, Nottinghamshire, c1895.  *One bundle*

PROD10.34  Tables relating to the ashes of ten animals (cattle, pigs and sheep) of different descriptions, ie fat, half fat etc., 1850s, 1860s.  *One bundle*

PROD10.35  Notebooks on pig and sheep experiments and on crops and manures, mid 1850s.  *Three notebooks*

PROD10.36  Notebooks on feeding and weights of bullocks, pigs and sheep, 1860s.  *Four notebooks*

PROD10.37  Tables on the balance of food and excrement in oxen, pigs and sheep, 1876.  *One folder*

PROD10.38  Correspondence with R Stratton and C Randall on feeding and manures, c1876.  *One small folder*

PROD11  Sewage

PROD11.1  Commission appointed to inquire into the best mode of distributing the sewage of towns and applying it to beneficial and profitable uses: figures, newspapers, pamphlets and tables, late 1850s – mid 1860s; printed copy of second report, 1861 and draft of third report.  *Two boxes; related pamphlets in Library, see Library catalogue*

PROD11.2  Letters on the Commission’s experiments in Rugby, with some draft replies from JH Gilbert, JB Lawes and Christy, 1856 – 65.  *Three volumes*

PROD11.3  Production papers for JH Gilbert’s lectures on sewage at Cirencester and Hull and for JB Lawes and Gilbert’s paper ‘On the Composition, Value and Utilization of Town Sewage’ JCS, 19, 1863 – 6.  *One bundle*

PROD11.4  Lawes’s ‘Remarks on the Discussion for the Paper on the Sewage of London’, 1855 and copy of the Weekly Agricultural review, with an editorial on Liebig and letter on urine as manure.  *One bundle*

PROD11.5  Analysis of foodstuffs and special diets, with tables of analyses of beer (mainly) and milk supplied by named publicans in Harpenden, calculations of excrement produced by London’s population and of nitrogen in food, printed returns of metropolitan water supply and other
calculations of food stuffs and human excrement, c1850s, 1860s.  

**PROD11.6** Tables of nitrogen and carbon consumption and human excrement analysis, with details of diets in workhouses, on board ship and in prison, c1850s, 1860s.  

**PROD11.7** Tables, calculations and notes on human excrement, mid 19th century.  

**PROD11.8** Tables, calculations and notes on human excrement, with Sewage Commission notes and accounts, mid 19th century.  

**PROD11.9** Circulars, reports, tables and notes of the British Association Committee on sewage, 1868 – 76.  

**PROD11.10** Letters to JH Gilbert, mainly telling him of meetings, with a few draft replies, 1860s, 1870s.  

**PROD11.11** Correspondence on work of Committee, 1860s, 1870s.  

**PROD12 Silage**  

**PROD12.1** ‘Rothamsted Ensilage Experiments 1884 – 5’: tables, including tables of animal weights and feed; analyses, notes and determinations, JH Gilbert’s directions for silage experiments and proof copies of ‘Experiments in Ensilage, conducted at Rothamsted, season 1884 – 5.  

**PROD12.2** ‘Rothamsted Ensilage and Cow and Oxen feeding experiments, material for article in Agricultural Gazette etc.’: analyses, notes and tables, 1880s.  

**PROD12.3** ‘Ensilage and feeding experiments at Rothamsted, second season, 1885 – 6’: analyses, notes and tables.  

**PROD12.4** ‘Rothamsted Silage and Feeding Expts: analyses, notes and tables with additional details of bullock feeding experiments, dairy herd accounts, silage temperatures, pit liquor composition and relevant printed items, 1886 – 7.  

**PROD12.5** ‘Ensilage and Dairy Experiments: correspondence, notes and tables with translations of related papers, 1882 – 9.  

**PROD12.6** ‘Bath and West of England Agricultural Society’s ensilage experiments season 1885 – 6’: correspondence and report on experiments at Bower Ashton near Bristol, 1883 – 6.  

**PROD12.7** ‘Hay and Ensilage Mr Edwards Dairy Experiments and Miscellaneous’: analyses, notes and tables relating to experiments at
St Albans Dairy and JH Gilbert’s notes on silage in America, 1880s. *One bundle*

**PROD12.8** Rothamsted Ensilage Experiments 1885 – 8: analyses, notes and tables including details and sketch of silage pits. *One bundle*
Documents, 1840s onwards, received from Rumball Sedgwick, early 2001

<table>
<thead>
<tr>
<th>Extent and form:</th>
<th>Seven boxes and three large loose plans, mainly paper documents in good condition unless otherwise indicated. The plans are based on the Ordnance Survey 25” or 6” inch scales, unless otherwise indicated.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative history:</td>
<td>Created or brought together by the donors, Rumball and Sedgwick of St Albans, then given as an unconditional gift to IACR Rothamsted (now Rothamsted Research) and added to the archives administered by the Library, where it will be retained as a separate collection. A few additional items were received in 2007 – 8.</td>
</tr>
<tr>
<td>Custodial history:</td>
<td>Kept by the donors before being given to Rothamsted in 2001, possibly after the death of a Lawes family member.</td>
</tr>
<tr>
<td>Accruals:</td>
<td>Rumball Sedgwick continued to work for the Lawes Trust until 2007, so other items may come to light</td>
</tr>
<tr>
<td>Existence of copies:</td>
<td>None known</td>
</tr>
<tr>
<td>Related material at Rothamsted:</td>
<td>There is a little Lawes family material in the archives at Rothamsted that are administered by the Library. There are also some photographs of Rothamsted Manor but there are no 19th or 20th century records of estate management.</td>
</tr>
<tr>
<td>Related material in other repositories:</td>
<td>Hertfordshire Archives and Local Studies holds mediaeval and early modern records of the Rothamsted estate but there is not much material from the 18th century onwards (D/Elw).</td>

Updated 17 June 2013
The firm known in 2009 as Rumball Sedgwick of St Albans managed the Lawes family estate, including the land now owned by the Lawes Trust. Although this archive is small, it is the main source of information on Rothamsted estate management. The Lawes family may have destroyed some of their archives when they left Rothamsted as the 19th and 20th century material in their surviving archive is limited.

Much of the collection is plans, which are a useful source for local history. It also includes some sources of personal information, eg details of properties and tenants.

**RB1**  
**Sir John Bennet Lawes, 1814 – 1900**

**RB1.1**  
Lists of tenants, rental, details of copyhold tenancies and quit rents with correspondence, sale particulars and other supporting papers, c1840 – c1920. *One large bundle*

**RB1.2**  
Probate copy of will of William Sears of Harpenden Common, farmer, 1846, with later notes and rent receipts. *Four items in folder*

**RB1.3**  
Quit rent receipts, 1850s – 60s, 1880s – 1900s. *Three small notebooks*

**RB1.4**  
Correspondence about a dispute over enfranchisements of copyhold properties in Harpenden, 1879 – 84. *One folder*

**RB1.5**  
Lease by JB Lawes to the Lawes Agricultural Trust, with a plan attached of fields and buildings concerned and with the LAT foundation deed, 1889. *Plan size 60 x 80 cm. Two in folder*

**RB1.6**  
Lease of Rothamsted Manor, CB Lawes to JB Lawes, 24 June 1896. *One item in folder*

**RB1.7**  
Harpenden Common presentments, 1895, regulations, undated, consent to telegraph poles, with attached plan showing the position of buildings near the Common, 1904, agreement with race committee, 1905. *Plan size 95 x 18 cm. One small bundle in folder*

**RB2**  
**Sir Charles Lawes-Wittewronge, 1843 – 1911**

**RB2.1**  
Lease, assignments, sale contract and supporting papers for C Lawes-Wittewronge’s studio in Chelsea, 1873 – 1914, with plans showing its position between Commercial Road and Chelsea Bridge Road. *10 items in folder*

**RB2.2**  
Ordnance Survey 25” maps: 1st edition revised 1897 and 2nd edition, 1898, of Harpenden, Rothamsted and district, with Rothamsted properties coloured. One map has a pencil note saying ‘1909’; *Size: 2=2 m x 1 m 40 cm, 1=3 m x 1 m 30 cm*
One of the 1898 maps (not the one dated 1909) has a related schedule, based on OS number and listing acreage, cultivation, tenants and rents; the other includes a list of tenants and their holdings. *Copied onto CD-ROM, 2002*

**RB2.3** Description of property and tenants, 1909, with map reference numbers. *One item in folder*

**RB2.4** Sketch plan of railways through Harpenden to Bedford and Hemel Hempstead, 1905, with small areas of adjoining land coloured; detailed plan of area near railway with roads and properties named, undated. *Scale: 3.156 chains to 1 inch and 2 chains to 1 inch; size 35 x 90 cm and 35 x 135 cm. Two items in folder*

**RB2.5** Insurance policy, leases and plans for The Sycamores’ near Leyton Road, Harpenden, 1906 – 26 and undated. *Plans size: 22 x 23 cm, 28 x 24 cm and 33 x 54 cm; condition: brittle. Six items in folder*

**RB2.6** Agreements to pay for the use of gateways onto the Rothamsted estate, including one with plan of land occupied by WC Sneath, with list of gateways, 1909 – 30. *Plan size: 19 x 25 cm. Seven items*

RB3.30 Inventories of linen sent to Cornwall and Australia, of worn-out articles in the Manor to be disposed of locally, of worm eaten furniture suggested for removal and of other articles at Rothamsted, 1926 – 7 and c1926, inventory of Wittewronge boxes at bank, 1929, with some later notes on disposal, inventory of boxes stored in depository in St Albans, 1929, inventory of items for repair, 1929, of articles moved to depository, 1930, of articles suggested for disposal and receipt for paintings, 1931. One bundle, including duplicate items

RB3.31 Account for bread from Jn Parcell, baker and confectioner, 1911 – 31. One notebook

RB4 Lady Helena Lawes-Wittewronge, died 1961 and Sir John Claude Bennet Lawes (Wittewronge) 1898 – 1979 (Sir John’s widow and son).

RB4.1 Rothamsted estate: valuations, 1932. One folder

RB4.2 Sale of land to the Lawes Agricultural Trust: draft agreements, schedules, plans, terms and valuations regarding the sale of a large part of the Rothamsted estate to the LAT, 1930 – 4, including letters on Coach Lane widening, Hatching Green right of way, Harpenden parish church north aisle upkeep, the condition of the timber and an agreement, with plans, for renting
land near the Redbourn Road to Dunkley, 1933. Plans sizes: 30 x 30 cm to 80 x 90 cm. One bundle

RB4.3 Schedules of tithe rent charges, plan and notes on altered tithe apportionment, 1934, arising from sale of some Rothamsted estate land to the LAT with altered tithe apportionment and plan, 1934 (MAF LT 36168) showing land subject to altered tithe rent charge, the railway, coniferous and deciduous trees and buildings (Public Hall, The Sycamores, Heathfield Works, Red Gables, Rothamsted Lodge, Manor and Experimental Farm named). Also including a plan of the area around the Manor, with no schedule or other details, a small tracing (MAF LT 32726) of the area near the Rubber Factory at Southdown and details of JB Lawes’s lands from the 1844 tithe apportionment. Sizes 66 x 100 cm and 25 x 27 cm; condition: reasonable. One bundle

RB4.4 Rothamsted estate survey 1934, with plan number, holding details and rents. Three items

RB4.5 Timber valuation books, notes and sale particulars, 1930s. One bundle

RB4.6 Knott Wood: valuation books, lists of timber, tenders for sale and three plans showing routes to be taken by purchasers removing timber, with some notes of purchasers, 1933 – 8 (Knott Wood timber was reserved to the vendor when other land was sold to the LAT). Plans size: 70 x 48 cm; condition: reasonable; one copied onto CR-ROM in 2002. One bundle

RB4.7 Plan of land for sale between Amenbury Lane, Leyton Road and Coach Lane, with plot numbers and contours, 1934. Size: 30 x 55 cm; condition: brittle. One item in folder

RB4.8 Two plans with title ‘St Albans RDC Planning Scheme’, showing boundaries, housing densities and other proposals affecting the Lawes-Wittewronge estate, 1935, with OS 6” 1925 edition (complete sheet) with pencil note ‘Harpenden Town Planning, 1931’. Size: 1=44 x 44 cm; 1=19 x 36 cm. Three items in folder

RB4.9 Draft lease of grazing rights on land near Hatching Green, Harpenden to Walter Vyse, 1936, with plan. Size: 29 x 50 cm. Two items in folder

RB4.10 Sale particulars of furniture, paintings, silver and other objects offered for sale by Christies in 1936; draft catalogue for sale in Harpenden, list of statuary sold to the LAT; schedule of fittings at the Manor, inventory of heirlooms and furniture in depository, lists of items returned to the depository and of items Mrs Sidebottom was willing to purchase, 1936. One bundle
RB4.11  Insurance valuation of Mrs Sidebottom’s property at the Manor, 1936, and probate valuation, 1939.  Two items

RB4.12  Draft prospectus for sale of residue of Rothamsted Estate, 1938 with statement on history of Amenbury Lane, 1935; related plans, 1934 – 49 and undated, titled ‘Portion of Rothamsted Estate’ showing areas for sale (near Amenbury Lane, in Rothamsted Park and at Southdown) some with notes on sales and tenants.  Plans size: 45 x 55 cm and 40 x 33 cm; condition: reasonable.  One bundle

RB4.13  Plans of small area between Crabtree Lane and Milton Road, 1938, one with title ‘Sale to Alderton’.  Scale: one based on OS 25", one 1/1000; size: 26 x 26 cm and 20 x 20 cm.  Two items in folder

RB4.14  Catalogue, accounts, posters and notes on bids for sale of Manor contents after Mrs Sidebottom’s death, 1940.  One folder

RB4.15  Military occupation, 1939: schedules of state and fixtures, including items in the garden, inventory of furniture and effects as taken over by military, schedule of dilapidations of furniture and effects, schedule of repairs with cleaning estimates, compensation form and plans of area let to military, showing the Manor, gardens and access roads.  Plans size: 60 x 54 cm and 36 x 39 cm; one torn at edge.  One bundle

RB4.16  Plan prepared by the Agricultural Requisites Supply Company of position of posts on roads at Rothamsted used by the LAT, c1940.  Size: 43 x 30.  One item in folder

RB4.17  Rentals, 1943 – 6, 1949.  Two items in folder

RB4.18  Plan of ‘Proposed house in Amenbury Lane, Harpenden for R Gingell, Esq’ mainly showing proposed road widening, 1949.  Scale: 1/5000; size: 34 x 46 cm.  One item in folder

RB4.19  Plans, evidence, correspondence and other supporting papers relating to Helena, Lady Lawes-Wittewronge’s objections to the Hertfordshire Development Plan, 1953.  The largest plan shows the land referred to in the statement of the objectors’ case (Amenbury Lane tennis court, Paddock Lane, Hatching Green paddock, land and woodland on the north side of Harpenden Lane, woodland near Harpenden Lane, agricultural land near Harpenden Lane and land at Rothamsted to be dealt with separately).  It also shows the boundaries of land sold to the LAT and agricultural land designated for development.  Size: 48 x 44 cm.  There are also three related preparatory plans and three showing services (water etc, to disputed properties).  Size: 31 x 28 cm; condition: reasonable.  One bundle
RB4.20  number not used

RB4.21  Rumballs’ accounts on behalf of the Lawes family to be remitted to the Public Trustee: general, 1931 – 62; house, 1931 – 6; estate, 1960 – 2; Harpenden Common Preservation, 1931 – 5. One volume, continuing an unidentified earlier volume

RB4.22  Miscellaneous notes and letters on estate management, late 1950s. One large bundle, received from Rumballs in 2008 in a damaged ring binder, and probably a survivor from a series of similar letters and binders.

RB5  Unclassified plans (all in a single folder)

RB5.1  ‘Rothamsted’: small plan of Manor buildings with unidentified red line, possibly cable or gas main, undated. Size: 14 x 14 cm. One item

RB5.2  Sketch plan endorsed ‘Rothamsted alteration of footpath’ and Rothamsted Manor’ undated. Size: 38 x 56 cm; condition: poor. One item

RB5.3  National Telephone Co. Ltd: proposed pole near Rothamsted Avenue, undated. Size: 17 x 22 cm. One item

RB5.4  Part of the road between Harpenden High Street and Crabtree Lane, showing proposed road widening, undated. Size: 27 x 52 cm; condition good. Two items

RB5.5  Plan of the Bowling Alley and surrounding area (Southdown) showing the lines of sewers, undated. Size 32 x 38 cm. One item

RB5.6  Plan of area near Piggottshill Lane with title ‘Harpenden UDC plan referred to’, undated. Size 31 x 18 cm. One item

RB6  Miscellaneous

RB6.1  ‘List of plans and papers relating to the Manor of Rothamsted’, including some of the documents listed above, plus others not received by Rothamsted, undated, after 1952. One item, received from Rumballs in 2008.

EJ Russell worked at Rothamsted for nearly 40 years, over 30 of them as Director. His archive is one of the most extensive in the Rothamsted archive and although it includes notebooks on his scientific work before and at Rothamsted, most of it is administrative material relating to his work as Director and on behalf of both Rothamsted and the government.

The Director’s papers include correspondence (largely unsorted), administrative papers about war service, new buildings, buying the Rothamsted estate and other matters; the official papers relate to his service on committees. Russell also travelled widely, visiting research stations and universities and speaking on scientific agricultural matters; these visits produced a series of diaries and photograph albums.

Russell had an ambition to make Rothamsted a centre for the study of the history of agriculture. Most of the documents he collected for this are no longer at Rothamsted but the library still has the books and prints.

**RUS1 Pre-Rothamsted and personal**

**RUS1.1** Notebooks relating to EJ Russell’s scientific work before coming to Rothamsted, late 19th and early 20th centuries. *19 notebooks in one box*

**RUS1.2** Notebooks relating to EJ Russell’s scientific work at Rothamsted, 1913–9. *17 notebooks and one folder in two boxes*

**RUS1.3** Certificates and diplomas from the *Exposition Internationale de Centenaire de Pasteur*, Strasbourg, 1923; the British Empire exhibition, 1924; the University of Berlin, 1935 and the Polish Academy of Sciences, 1959; lists of decorations, medals and diplomas 1966 and 2017 (with photographs). *Five items, four boxed; one framed; one folder. Medals stored in Early Book Room (2017).*

**RUS1.4** Portrait etching by CH Barraud, 1938. *Framed*

**RUS2 Director’s correspondence, c1910 – 1940s.**

*These bundles were in the Manor Library where they had been for an unknown length of time. They contain mainly correspondence and reflect Russell’s wide ranging work promoting British agricultural science.*

**RUS2.1** Notes and figures on ‘crops other than wheat etc, c1910 – early 1920s’. *Five folders in one bundle*

Notes and figures on ‘rotation experiments, early 20th century’. *15 folders in one bundle*

**RUS2.2** ‘Early notes on fertilizers, early 20th century’. *12 folders in one*
bundle

RUS2.3 Correspondence on the Library 1915 – 6, 1926; working conditions 1916 – 7; the Agricultural Education Association, 1916 – 7, 1922 – 3; wart disease 1920 – 1; with Lord Bledisloe 1925; with committees, government departments and societies 1926; on conferences, 1926, on experiments, 1926. Eight bundles

RUS2.4 General correspondence, correspondence on building extensions and on publications, 1926; correspondence on appointments and enquiries, 1927. Five bundles

RUS2.5 Correspondence on the Library, visitors and visits to America and Palestine, 1927; on committees, conferences, experiments and the Library, 1928 – 9. Seven bundles

RUS2.6 Correspondence on appointments, committees and societies, building extensions, the Farm, general administrative matters, general enquiries, lectures, the Library, staff, visitors, visits and Woburn, 1930 – 1. 12 bundles

RUS2.7 Correspondence on appointments, scholarships and testimonials, committees, building extensions, the Farm, general matters and general enquiries, 1930 – 1. Six bundles

RUS2.8 Correspondence on lectures and BBC talks, the Library, overseas contacts, staff and Woburn, 1932. Five bundles

RUS2.9 Correspondence on appointments, scholarships and testimonials, committees, experiments, building extensions, and the Farm, 1933. Five bundles

RUS2.10 Correspondence on general enquiries, the Library, overseas contacts, publications, visitors, visits, voluntary workers and Woburn, 1933. Nine bundles

RUS2.11, RUS2.12 Letters from rural schoolchildren, 1933. Two boxes

RUS2.13 Correspondence on committees, government departments and societies, experiments at Cheshunt, Hertfordshire, general matters and general enquiries, 1934 – 5. Five bundles

RUS2.14 Correspondence on experiments, building extensions, general enquiries, the Farm, lectures and the Library, 1934 – 5. Six bundles

RUS2.15 Correspondence on Woburn and voluntary workers, 1934 – 5, on appointments, scholarships and testimonials and on committees, government departments and societies, 1936 – 8.
Four bundles

RUS2.16 Correspondence on experiments, building extensions and general matters, 1936–8. Three bundles

RUS2.17 Correspondence on general enquiries, 1936 – 8 and on appointments, scholarships and testimonials, 1939 – 43. Three bundles

RUS2.18 Correspondence on Rothamsted centenary and on committees, 1939 – 43. Three bundles

RUS2.19 Correspondence on enquiries about crops and food, fertilizers, the soil and miscellaneous, 1939 – 43. Four bundles

RUS2.20 Correspondence on experiments, 1939 – 43. Two bundles

RUS2.21 Correspondence on extensions, general matters, the farm, the library and Woburn, 1939 – 43, on school and farm centres, 1942 – 4 and on preparation and sale of engravings of Lawes and Gilbert by Julia Clutterbuck (Mrs Alsop) 1924 – 41, with letters from Miss A Gilbert on pictures of JH Gilbert. Seven bundles, plus engravings. Plates transferred to the Heritage Collection may 2014

RUS2.22 Correspondence on refugees, early 1940s. One box; the contents of box RUS 2.22 had been roughly arranged in alphabetical order sometime before it was brought to the Archives. The following details are taken from what has been written on each letter or group of letters.

Abel, Prof Dr Emil; Audor, Stephen (also refers to Balcerk and Klaus); Balcerk, Wincenty; Beer, Hanna; Berkowitz, N; Bier, Mrs; Blass, RG; Bondy-Charvát, Captain RO; Burslik, Dr Margaret; Czechs at Redbourn (Beer, Klaus, Weiss); Czechs: Miklos and others; Dmochowski; Dukes; Filewicz and Modlibowska; Gruensfeld, Dr M; Guttmann, Miss Steffi; Havas, Dr and Mrs; Hecht, Dr; Hochfeld, Arnold; Jakubiec, Michal; Jalowiecki, Major Michael; Kassanis, Basil; Kende, Andrew; Klaus, Jan; Kleczkowski, Dr and Mrs; Slizynski, Dr BM; Snięsiko, Professor; Landau, Neville; Laurentzsch, Mr and Mrs; Kurt; Michlstaedter, Dr Elias; Murpugo, Peter and Paul; Ossowski, Dr Leon; Rabl, Miss Edith; Rodrigueux-Merina, Francisco; Rothschild, Dr Eva; Rozsynai, Mr Desider; Ruczkwaki, Stanislaw; Schmidt, Gerhard; Schultz, Hans; Spitzer, Peter; Spiwak, HJ; Steinbrecher, Dr; Steuer, Mr and Mrs; Schlesinger, Miss Ilse; Strzemienski, Dr E; Van Baslen, A; Wagner, Mr and Mrs Karol; Wasowicz and Balcerk; Weiss, Dr Victor; Wiesenthal, Dr Uszer; extensions to curfew (Aguirre, Boyanoff, Cunow, Kalmus, Kleczkowski, Murpugo, Olbrycht,
Rothamsted Research; general: Balcerek, Klaus, Wagner; Polish students: A and J Kleczkowski, R Sibliger.

**RUS2.23** One bundle of correspondence from 1933 retained in the condition it was found.

**RUS3** Diaries, photographs and large photograph albums, 1912, 1920s – 50s

Group at Rothamsted, undated, probably 1930s
Imperial Agricultural Research Conference 1927 (roll, identified)
International Fertilizer Conference, Rome 1938 (identified)
International Society of Soil Science, soil microbiology 1935 (roll, identified)
Scientific Society, University of Wales Aberystwyth, 1918 – 9 (identified)
Society of Economic Biologists, Reading 1921 (two photographs, one identified)
All in one box

RUS4 **Director’s administrative papers**

RUS4.1 Letters and some draft replies from staff members including staff
on active service, 1914 – 8. *One large bundle*

RUS4.2 Letters on administrative matters, including changes resulting
from the war and plans for new laboratories, with some draft
replies, 1914 – 9. *One bundle*

RUS4.3 Letters on exemptions from military service, 1915 – 9. *One bundle*

RUS4.4 Letters on administrative matters, 1915. *One bundle*

RUS4.5 Correspondence, designers’ catalogues and photographs,
c 1920, relating to the war memorial tablet to KR Lewin and CH
Martin, staff members killed in action. *One file*

RUS4.6 Letters, notes and diagrams relating to cotton yields on the
Tayiba and Barakat estates in the Sudan, 1911 – 4. *One box*

RUS4.7 Papers relating to the Lawes and Gilbert Centenary Fund,
including subscribers’ lists, circulars, newspaper cuttings,
accounts, correspondence and minutes, 1913 – 9. *One box*
The Fund was established to build new laboratories to
commemorate the births of JB Lawes and JH Gilbert.

RUS4.8 Vouchers for expenses incurred in experiments extracting
ammonia from peat, 1916. *One small bundle*

RUS4.9 Letters and reports on possible use of human and animal
sewage from army camps as manure, 1916 – 9. *One folder*

RUS4.10 Letters and reports on the testing and supply of potash fertiliser,
1917. *One folder*
RUS4.11  Letters and reports on possible use of blast furnace dust as potash fertiliser, 1917.  *One folder*

RUS4.12  Letters on use of manufacturers’ waste as fertiliser, 1917, 1918.  *One folder*

RUS4.13  Letters and reports on the use of bracken, wood ash and wool washings for potash fertiliser, 1917 – 8.  *One folder*

RUS4.14  Letters, papers and reports on EJ Russell’s work for the National Salvage Council on the disposal of waste explosives, 1917 – 9.  *One folder*

RUS4.15  Rothamsted Farm Advisory Committee: letters, notes and report, 1924.  *One folder*

RUS4.16  Joint ARC and MAF Committee to review the work and finances of RES: report, Director’s (EJ Russell) memo and related letters (EJ Russell and WG Ogg), 1942 – 4; summary by R Plumb, 2003.  *One folder*

RUS4.17  Evidence by EJ Russell and others to the Royal Commission on Agriculture, with papers of the Technical Committee, Costings Committee and Empire Cotton Growing Committee, 1918 – 21.  *One folder*

RUS4.18  Circular on patenting scientific inventions, with related correspondence and staff comments, 1921 – 2.  *One folder*

RUS4.19  Printed circulars setting out arrangements for visiting parties to Rothamsted and Woburn, 1923 – 5.  *One folder*

RUS4.20  Accounts and letters for running Leadon Court farm, Herefordshire, 1922 – 6.  *One small bundle*

RUS4.21  Press notices about purchase of Red Gables and appointment of Lord Bledisloe as LAT chairman, 1920 – 1.  *One folder*

RUS4.22  Reports of work carried out at Rothamsted for the Water Pollution Research Board, largely on milk and sugar effluents, 1928 – 38.  *One box*

RUS4.23  General correspondence on purchasing land at Rothamsted from the Lawes estate, including correspondence with solicitors, agents, valuers, newspapers, possible contributors and other interested parties, with plans of possible development of the area, 1932 – 5.  *One bundle*

RUS4.24  Valuation of property held on lease from the Lawes family and of
possible future purchases, 1932 and correspondence, mainly with surveyors, 1932 – 4. **One folder**

**RUS4.25** Correspondence with banks, subscribers' list and statement of accounts, 1933 – 4. **One folder**

**RUS4.26** Correspondence about Sir R McDougall's gift to the appeal, with life insurance policy, 1934. **One folder**

**RUS4.27** Circulars and subscribers' lists, 1934. **One folder**

**RUS4.28** Newspaper cuttings, 1934. **One bundle**

**RUS4.29** Correspondence about the possible purchase of more land between Rothamsted estate and Harpenden, part of Rothamsted Park, 1934 – 7. **One bundle**

**RUS4.30** Correspondence with the Royal Asiatic Society about a sundial, with photograph, 1935; newspaper photograph of installation at Rothamsted, undated. **Five items**

**RUS4.31** Reports of the sub-committee on record storage at Rothamsted and Woburn, c1935. **One folder**

**RUS4.32** Location list of records in the Sample House, file cabinets and compartments; list of library files, early – mid 20th century. **One bundle**

**RUS4.33** Correspondence, reports and papers on EJ Russell's membership of the wartime committee for investigating damaging German crops by weeds or chemicals, 1940 – 4. **Four files, one envelope, tied together**

**RUS4.34** Dates, speakers and titles of colloquium meetings, 1921 – 74. **One exercise book**

**RUS4.35** Programme, photographs and circulars for the Rothamsted centenary, 1943. **One bundle**

**RUS4.36** Letters about the future of the International Society of Soil Sciences, 1944 – 5. Two letters from EJ Russell as ISSS President, regarding Professor Prianishnikov of Romania, 1930, printed in *Stiinta Solului* XXXV, 2, 2002. **One bundle**

**RUS4.37** Programme of work, 1935 – 6. **One item**

**RUS4.38** Speeches at a dinner for EJ Russell on his 80th birthday, 1952. **One folder**

**RUS4.39** Allotments: correspondence of Rothamsted staff with Allotment
Club secretary, Harpenden UDC and other interested parties on administrative matters, including the legal status of the allotments, occupancy, rents and moving their position to allow for building development, with newspaper cutting, 1920s – 60s. One bundle

RUS4.40 Photographs of farming and tea growing in Kenya, supplied to EJ Russell for a lecture by Kenya Department of Information and Brooke Bond East Africa Limited, 1957. One folder

RUS4.41 List of EJ Russell’s decorations, medals, diplomas plus a few certificates 1918-1961
Robert Warington, junior, 1838 – 1907, at Rothamsted and JB Lawes’ London factories, mid – late 19th century

Robert Warington junior was employed at Lawes’ tartaric and citric acid factory at Millwall and came to Rothamsted briefly in the 1850s and again in 1876. To avoid difficulties with Gilbert, Lawes employed Warington as his personal assistant and he carried out work in chemistry and microbiology. He and Gilbert found it difficult to work together and Warington left in 1890; their dispute is described in detail in John Lawes of Rothamsted by GV Dyke.

Warington’s daughter Katherine was employed in the Botany Department in the mid-20th century. His father, Robert Warington senior, had helped Lawes with his patent suit, so in all three generations of the family were connected with Rothamsted.

The archives below illustrate both Warington’s scientific work and his interest in social matters.

**RWJ1**  
**Personal and working papers**

**RWJ1.1 – 9** Notebooks on work at Rothamsted, 1859 – 80s. *Nine exercise books*

**RWJ1.10** Tables relating to experiments with note ‘for Mr Warington 1865’; notes on ash analysis, 1860s, and for experiments at South Kensington on nitrogen determination. *One bundle*

**RWJ1.11 – 13** Notes on analyses, experiments and teaching, late 1860s. *Three volumes*

**RWJ1.14, 15** Notes on work in JB Lawes’ factories, 1867 – 72. *Two volumes*

**RWJ1.16** Commonplace book with meteorological notes, Italian exercises etc c1868, with references to balances on pages 43 and 55. Not identified, possibly by Warington. *One notebook*

**RWJ1.17** Autobiographical notes by Robert Warington junior, plus biographical notes on his father, late 19th century. *One folder*

**RWJ1.18** Notes on work in progress, with tables, diagrams and a few letters, 1880s, 1890s. *One bundle*

**RWJ1.19** Drafts for an album of letters and papers about the formation and early history of the Chemical Society, with loose circulars on an unsuccessful attempt to establish a chemists’ benevolent fund, early 1890s. *One exercise book*

**RWJ1.20** Lecture notes including notes for talks on capital and labour, strikes and monopolies, ‘What should we teach?’ and ‘The Education Question’1893 – 1904. *Four items*

**RWJ1.21** List of printed works on nitrogen assimilation and notes for talk, 19th and early 20th centuries. *One volume*
RWJ2  Correspondence
RWJ2.1 Letters and some draft replies on Warington’s appointment as a volunteer worker at Rothamsted, his work at the Royal Agricultural College, his appointment to Rothamsted and his subsequent work and writing, late 1850s, 1860s. One bundle

RWJ2.2 Letters and some draft replies from R Warington to JH Gilbert and to his secretary Mr Gifkins, on his work and position at Rothamsted and the Royal Agricultural College, 1850s, 1860s. One bundle

RWJ2.3 Letters, mainly from JB Lawes, with some draft replies, on R Warington’s work and writing, his position at Rothamsted and his relations with JH Gilbert, 1870s. One bundle

RWJ2.4 Letters from various correspondents, mainly on work in progress, 1870s – 90s. One bundle

RWJ2.5 Correspondence with Grosjean on work on tartaric acid, 1875 – 82. One bundle

RWJ2.6 Letters, mainly from JB Lawes, with some draft replies, on Warington’s work and writing and his relations with JH Gilbert, 1880s, 1890s. One bundle

RWJ2.7 Letters, mainly from JB Lawes and the LAT on R Warington leaving Rothamsted and on his future, 1890s, 1900s. One bundle

RWJ2.8 Statement by Voelcker to EJ Russell with his view of R Warington leaving Rothamsted, 1928. One item

RWJ2.9,10 Letter books with letters on all aspects of R Warington’s work, including church and social work and personal matters, 1885 – 1906. Two volumes

RWJ2.11 – 13 Letters received by R Warington on all aspects of his work, including church and social work and personal matters, 1885 – 1906. Three volumes

These papers of Robert Warington senior do not concern work at Rothamsted but were included in the archives of his son Robert, who worked at Rothamsted from 1876 – 90.

The information below is from the outside of the bundles and the contents have not been examined in detail. However, the titles show the range of Warington senior’s work

RWS1  ‘Miscellaneous letters’ to R Warington as secretary of the Chemical Society and the Mathematical Society, mainly from overseas and about current work.  One bundle

RWS3  Notes, letters and papers including chemical tables, brief business letters to JH Gilbert, notice of award of a testimonial by the Chemical Society, reports of analysis of the waters of the River Lea and of other analysis and experimental work, c1840 – mid 1860s.  One bundle

Updated 17 June 2013
The Society for Extending the Rothamsted Experiments was founded to raise funds during AD Hall’s directorship and the financial help it provided contributed to the post Lawes and Gilbert expansion of Rothamsted in the early 20th century. It also helped with the purchase of the Rothamsted estate in 1934 and with jubilee celebrations in 1943. Its archive is a comprehensive record of its work.

**SERE1**  Appeals and correspondence on establishing the Society for Extending the Rothamsted Experiments, 1904. *One bundle*

**SERE2**  Society for Extending the Rothamsted Experiments (the Incorporated Society for Extending the Rothamsted Experiments in Agricultural Science from 1909): minutes, 1904 – 56. *One volume*

**SERE3**  Correspondence and notes on the incorporation of the Society, 1908 – 10. *One bundle*

**SERE5**  Letters to subscribers, meeting arrangements and notes, 1912 – 6. *One large bundle*

**SERE6.1 – 4**  Accounts and subscribers’ lists, 1904 – 47. *Four volumes*

**SERE7.1, 2**  Ledgers, 1904 – 26, 1937 – 40. *Two volumes*

The site plans and related papers below are not a complete record of building development at Rothamsted. Many of them date from EJ Russell’s directorship, 1912 – 43, which was period of expansion.

SITE1 Buildings and development
SITE1.1 pre-1910
SITE1.1.1 Sample House: shelving plans, 1896 and plans for conversion to Library Annexe, 1930s, 1950s. *Three folders, tied as one*

SITE1.1.2 Testimonial Laboratory: plans and costings for proposed alterations, 1902 – 3. *One folder*

SITE1.2 1911 – 20
SITE1.2.1 Proposed railway siding in West Barnfield: correspondence, 1912. *One folder*

SITE1.2.2 New farm buildings: correspondence, estimates, financial papers, plans, specifications and miscellaneous papers, 1912 – 4. *Two folders, tied as one*

SITE1.2.3 Capital grant: correspondence, farm and laboratory vouchers, 1911 – 14; supplementary grant: correspondence, farm and laboratory vouchers including vouchers for new farm buildings and new north wing, 1914; capital grant for building new laboratories: accounts, correspondence, itemized expenditure lists and specification of works, 1914 – 17; new laboratory buildings (Russell Building) correspondence, estimates, financial papers, plans, specifications and miscellaneous papers, copies of programmes for the official opening c1914 – 1920s. *Three boxes, partly unsorted*

SITE1.2.4 North (Plant Pathology) Building: plans, 1920s, of this and other proposed developments, including designs for the forecourt, the staff garden and the water cistern in the staff garden. *One folder, plus rolled plans stored separately*

SITE1.2.5 Director’s House: plans for proposed alterations and development, 1920s. *One folder*

SITE1.3 1921 – 30
SITE1.3.1 Red Gables: plans for proposed alterations and development as an administrative block, 1920s – 30s; photograph, mid 20th century. *One folder*

SITE1.3.2 Grounds: plans for development of new laboratories forecourt, 1920s. *One folder, plus rolled plans stored separately*
SITE1.4  1931 – 40
+SITE1.4.1 General plans and estimates, including the staff garden, 1930s. One folder, plus rolled plans stored separately

SITE1.4.2 Programme for opening of new farm buildings, 1932, with an undated description new developments and a possibly unrelated summary of conditions on the farm and fields. One folder

SITE1.4.3 Photographs and correspondence on Knott woodland clearing and reclamation, 1935 – 43, and on possible purchase of adjoining land. Three folders and one bundle of photographs

SITE1.4.4 Fossils collected in West Barnfield, 1920s, presented to Rothamsted in 1931, with accompanying notes. One box, not archive quality

SITE1.4.5 Plan for proposed additional heating for glasshouses, potting sheds etc, 1940. One folder

SITE1.4.6 Soil survey map of Rothamsted Farm by Dr Linwood, L. Lee, 1931. One roll

SITE1.4.7 Rothamsted Experimental Farm Plan of Drains, 1940, Four items in one roll

SITE1.5  1941 – 50
SITE1.5.1 Wind tunnel: plans, specifications, reports and correspondence, 1940s – 70s. Two boxes

SITE1.5.2 Statistics department accommodation in Rivers Lodge and the South/Statistics (later the Fisher) Building, 1940s – 60s: correspondence, notes, reports and plans, including plans of complete site. One box plus one roll stored separately

SITE1.5.3 Plan of 1/1000 acre rain gauge dated 16/8/1946. One folder

SITE1.5.4 Rothamsted Experimental Farm Plan of Buildings and Drainage 1941, One roll

SITE1.6  1951 – 60
SITE1.6.1 Plans and related papers on development and use of the North Building, 1946 – 1965. The building was occupied at different times by the Plant Pathology Institute (Entomology, Mycology) then Pedology and Virology, and finally the whole of the Plant Pathology Department. Four folders

SITE1.6.2 Plans and related papers for central sterilization and storage of soil, 1959 – 62. One folder
SITE1.7 1961 – 70
SITE1.7.1 Correspondence and shade charts relating to the redecoration of the Russell Building, 1960s to 1980s. One folder

SITE1.7.2 Large scale tracing of the site map used in the Annual Report 1966-1969. One large roll

SITE1.8 1971 – 80
SITE1.8.1 Plans for new insectaries, glasshouse and ancillary building, 1972. Two copies in one folder

SITE1.8.2 Plans for extensions to Statistics (Fisher) Building, 1973 – 5. One roll

SITE1.8.3 Proposed central area redevelopment, 1976. One plan

SITE1.8.4 Minutes of a meeting on fire damage to the Ogg Building, 1978. One document

SITE1.8.6 Plan of Surface Water Drains at Rothamsted Experimental Farm, 1971, Three items in one roll

SITE1.8.7 Plan of Main Irrigation at Rothamsted Experimental Farm, undated probably about 1971, One roll

SITE1.9 1981 – 90
SITE1.9.1 Library annex: plans of heating installations, 1981. One roll, stored separately

SITE1.9.2 Plan of Entomology wormery on the Ninnings site. One plan

SITE1.9.3 Site plan 1983, amended 1985. One document

SITE1.9.4 List of donors to Conference Hall, late 1980s. One folder

SITE1.10 1991 – 2000
SITE1.10.1 Development Plan, Issue 4, 1996. One comb binder

SITE1.10.2 New laboratories: site master planning and new laboratory building reports C and D, 2000. Two comb binders

SITE.1.10.3 Glasshouse redevelopment 1993: plans, including plans of complete site, and related notes. One folder

SITE.1.10.4 Letters on planning permission for West Common development, 1992. One folder
SITE1.10.5  Rothamsted Farm 1998. One roll

SITE1.11  2001 – 10

SITE1.11.2  Draft plan for alterations to the Bawden Building basement, undated. One document.

SITE1.11.3  Site redevelopment project: minutes, plans and reports. 2001-2004. 13 box files shelves out of sequence at Bay 11, shelf 1 and 2

SITE1.12  2011 – 20
Nothing in Archives for 2011 onwards

SITE2  Sales and development
SITE2.1  MAFF Plant Pathology Laboratory site
Planning and design statement on behalf of LAT Dec 2003. One spiral bound brochure
Development proposal by Laing Homes n.d. One spiral bound brochure
Original and revised sales brochures and comments by Roger Plumb on the Hatching Green development of Bryant Homes by Taylor Woodrow 2006 – 7. Two pamphlets, one loose paper

SITE2.2  Southwood Court: brochure explaining the history, 2007. One pamphlet

SITE3  Archaeological
SITE3.1  Roman site
Reports, plans and letters, including letters on transfer of excavated material to St Alban’s Museum, 1914 – 2003. One folder

SITE4  Guides and histories
SITE4.1  Journal articles on Rothamsted history and guides to the site and buildings, late 20th, early 21st centuries. One folder

SITE5  Grounds, gardens and woodlands
SITE5.1  Miscellaneous minutes, papers and plans
Files transferred by Gardeners, October 2017
Woodland Advisory Group minutes, 1975-2002; woodland management correspondence, 1970s-1980s; EMS Department meeting minutes, 1977-1985; Buildings and Grounds Advisory Group minutes and terms of reference, 1980s and 1990s; Planning Group minutes of first meeting, 1975; various papers, including plans, 1979 – 80; Estates Advisory Committee
minutes, 2000s; H&CES reports on grounds, 1996-2001. One box

SITE5.2  Woodland Advisory Group
Files received from Norman Carreck, September 2006
SITE5.2.1 Minutes, 1974 – 93 (1st to 50th meeting) excluding minutes of meetings 19 and 23; minutes and papers, 1993 – 2002 (51st to 66th meeting). One volume and one folder

SITE5.2.2 Agenda, correspondence and supporting papers, 1950s to 2004 (few before 1980s); covering letter on transfer to archives, 2006. One folder. Total one box; consult librarian for access

SITE6  Broom’s Barn
SITE6.1 Broom’s Barn Field Plan, undated, One roll
SITE6.2 Broom’s Barn Experimental Station Soil Magnesium ADAS Index, 1960, One roll

email: library@rothamsted.ac.uk
Experiments on the problems of poor light land were begun by East Suffolk County Council in 1926 and were later continued by Fisons of Ipswich and Rothamsted. Experiments on the effects of fertilizers on soils were started in Saxmundham in 1899 under the Suffolk Education Committee. Saxmundham management was transferred to Broom’s Barn Experimental Station under Dr R Hull in April 1964. Part of the 1999 deposit came from W Blacker, former Suffolk District Advisory Officer, following an anniversary display at Saxmundham in 1999. Mr Blacker asked for a note to be added to this list saying the first foreman at Saxmundham, Mr Charles Cattermole, was awarded the RASE long service award and that he ‘served the Station and Mr Oldershaw with great loyalty’.

These archives were collected by and refer to AW Oldershaw, Agricultural Organiser in East Suffolk, 1911 – 47, PJO Trist, County Advisory Officer, National Agricultural Advisory Service, 1947 -?; Raymond Hull of Broom’s Barn Experimental Station, V Woolnough of Saxmundham, G Bennett and G Cooke of Rothamsted.

**ST1**

**Tunstall**

**ST1.1** Reports, 1926 – 53, excluding 1940, some duplicates. *One bundle*

**ST1.2** 'Liming proposals', 1938. *One folder*

**ST1.3** Report on linseed experiments at Tunstall, 1948 – 50. *One document in folder*

**ST1.4** AW Oldershaw's book of correspondence, figures, newscuttings, notes, reports etc, 1930s –50s. *One volume*

**ST1.5** AW Oldershaw's paper on 'Tunstall light land experiments' from the Suffolk Farmers' Journal, early 1950s, with a few notes, diagram and newspaper cutting. *Five documents in folder*

**ST1.6** Photographs of experiments (potatoes, barley, wheat, sugar beet, peas) 1940s, some undated, all black and white, list with photographs. *14 photographs*

**ST1.7** Photographs from a journal of Tunstall experiments (lucerne, lupins, parsnips, sugar beet). *Four photographs*

**ST2**

**Saxmundham to about 1964**

**ST2.1** Reports and related pamphlets, 1901 – 63 (some gaps); short history, 1899 – 1959. *17 pamphlets in one bundle*

**ST2.2** 'Experiments on arable crops at Saxmundham' by AW Oldershaw in *JRASE*, volume 102, 1941; *Agriculture*, December 1959 and January 1960, with articles by EJ Russell on ‘60 Years of Saxmundham’. *Three pamphlets in folder*
ST2.3 'Field Books' kept by AR Oldershaw and PJO Trist, 1930s – 1950s, ie books of correspondence etc, as for Tunstall above. Three volumes

ST2.4 Agricultural Executive Committee AEC 36/323: Saxmundham Experimental Station: 'Miscellaneous correspondence', mainly correspondence of AB Garner of AEC and including letters of DA Boyd of Rothamsted, 1947 – 55. One folder

ST2.5 MAF (sic) folder 46/6 and 46/6A: General correspondence (meetings, open days, repairs, wages) 1940s – 60s, mainly late 1950s and 1960s. Two folders

ST2.6 MAFF folders 2404 and 2404A: Saxmundham Experimental Station: General technical correspondence and data, 1950s, 60s. Two folders

ST2.7 MAFF folder 2776: Saxmundham Experimental Station: 'Purchase of bulk supplies, 1960 – 1. One folder

ST2.8 Letter from EJ Russell to PJO Trist 1959, describing his first visit to Saxmundham, c1912. One document in folder

ST2.9 Saxmundham ready reckoner, undated. One folder

ST2.10 Annual reports, 1925 – 63 (some gaps). One folder

ST3 Saxmundham after 1964

ST3.1 Saxmundham Sub-Committee minutes, notes and proposals, 1960s, early 1970s. One bundle

ST3.2 General administrative correspondence, 1964 – 70, mainly with R Hull, G Cooke and V Woolnough of Saxmundham, including a letter from G Cooke saying he did not wish to continue the experiments. One large bundle

ST3.3, 4 Volumes with titles 'minute book' and 'ledger' including reports of management visits to Saxmundham, 1964 – 77; report on Saxmundham soils, 1959; list of reports handed to Dr Hull of Brooms Barn in 1964; a loose paper 'The Soils of the Experimental Field at Saxmundham' by Joan Thurston 1967; minutes, notes, diagrams, details of soil samples and loose newspaper cuttings on agricultural matters, not always relating to Saxmundham. Two volumes

ST3.5 Guide 1966, notes on experiments prepared for visitors in 1970, list of publications describing results of Saxmundham experiments, brochure for Open Day 1999 and lecture 'A Hundred Years of Agricultural Research'. One folder
ST4  Photographs
Tunstall 1934, Saxmundham 1912, 1930s – 60s. One folder

ST5  General
East Suffolk Education Committee 'Notes on the use of chalk and lime in East Suffolk' by AW Oldershaw and AW Punter, c1938; 'Sugar beet experimental work in East Suffolk to the end of the season, 1938, a summary of conclusions'; Agricultural sandland survey, c1948; report on cultivation of lupins, c1948. Four documents

ST6  Meteorology

Most of the archives below relate to the Staff Union. This had its origins in November 1918 when the Director (Russell) called a meeting of staff to ‘discuss arrangements for restarting (sic) regular staff meetings’. This resulted in the formation of the Staff Union (by February 1919), the activities of which were managed by two sub-committees: the Common Room (Social) Committee and the Business Committee. One function of the latter was to represent the views of staff on ‘various questions of interest and importance’. It is believed that the role of the Business Committee was soon subsumed by the Staff Council, which was established in 1921 and consisted of all Heads of Departments and two elected representatives of junior staff. Social activities remained the responsibility of the Staff Union, which continues as the Sports and Social Club. The last minutes in the series below were signed in February 1980 and Staff Council probably was abolished in the early 1980s.

**STA1** Personnel and administration
STA1.1 Staff list 1903 – 49 including dates of arrival and departure, nature of work and funding, plus loose partial copy, 1903 – 20. *One volume, fragile, access restricted, consult librarian*

STA1.2 General information for staff, c1962. *One item*

**STA2** Staff Council
STA2.1 – 10 Minutes, 1921 – 80, with index, 1948 – 55. *Five volumes, four binders, one folder*

**STA3** Staff Union/Sports and Social Club
STA3.1 Minutes
STA3.1.1 Executive committee minutes 1919 – 77, 1979 – 89. *Eight volumes, one folder, one ring binder*
STA3.1.2 Annual General Meeting minutes, 1946 – present. *Four volumes, three folders*
STA3.1.3 Staff meeting and AGM minutes 1918 – 46. *One volume*
STA3.1.4 Business committee minutes, 1919 – 20. *One volume*
STA3.1.5 Art club committee minutes, 1954 – 72. *One volume*
STA3.1.6 Bridge club committee minutes, 1937 – 63, also including Common Room Management Committee minutes, 1930 – 1. *Two volumes*
STA3.1.7 Camera Club AGM minutes, 2007-2015. *One folder*
STA3.1.8 Tennis Club
STA3.1.8.1 AGM minutes 1948-2017. *Five volumes, two folders*
STA3.1.8.2 Membership records 1990-2000. *Three folders, one notebook.*
STA3.1.8.3 Courts: history and correspondence, 1967-1999. *One box*
STA3.1.8.4 Fixtures and competitions. *Three folders, one plaque*
STA3.1.8.5 General correspondence, 1992-2002. *One folder*
STA3.1.8.6 Marion Gratwick (Tennis Club President) correspondence and committee minutes, 1986-. *One box*
STA3.1.9 Walking Club minutes and accounts, 1979-2018. *One box, one ring binder*

**STA3.2** Finance
STA3.2.1  Cash books, 1928 – 46 (continuing from previous one, now missing). Two volumes

STA3.2.2  Petty cash books, 1935 – 9, 1954 – 62. Four notebooks

STA3.2.3  Subscription book, 1936 – 48. One volume

STA3.2.4  Treasurers’ and auditors’ reports, clubs’ accounts, allocations’ requests etc, 1937 – 2000, not complete for every year. Two boxes

STA3.2.5  Analysis books, 1968 – 1999. One folder, nine volumes in two boxes

STA3.2.7  Bar cash analysis books, 1975 – 93, with gaps. 10 volumes

STA3.2.8  VAT record books, 1975 – 9. Five volumes

STA3.2.9  Miscellaneous receipts, subscribers’ lists, balance sheets, cheques and statements, many rolled, not fully examined, mainly 1930s – 1950s. One box

STA3.3  Clubs, entertainment and sport

STA3.3.1  Annual reports from SU clubs, committees and societies, not always complete for each year, 1957 – 85. Six folders

STA3.3.2  Programmes, invitations and scripts etc for entertainments, including some leaving parties, 1919 – 80s. Six folders

STA3.3.3  Undated, mainly mid 20th century, scripts and posters for staff entertainments. One folder

STA3.3.4  Retired staff party papers, mainly notices in Bulletin and letters of thanks, 1980s. One folder

STA3.3.5  Children’s party papers, 1964, 1980s, very few. One folder

STA3.3.6  Christmas cards, 1929 onwards and calendar, 2007. Seven folders

STA3.3.7  Histories of Rothamsted clubs and of some clubs in Harpenden, prepared for the Local History Society’s exhibition on sport in Harpenden, 1980, plus copy photographs of Rothamsted Ramblers Hockey Club, c1900. One folder

STA3.3.8  Photographs of Rothamsted Rocket, Staff Union’s prizewinning float at Harpenden carnival, early 1970s.

STA3.4  Administration

STA3.4.1  Administrative letters and circulars including the organisation of social events, upkeep of the bar, pavilion and sports field, representation on committees and similar general matters, 1970s, 1980s, few only, no earlier correspondence found. One folder

STA3.4.2  Rules and guidelines including Staff Union rules, rules of clubs, rules for use of the pavilion, manor and Red Gables, duties of departmental representatives, guidance notes for club accounts, ‘Facts of Life at Rothamsted, 1960s – 90s. One folder

STA3.4.3  Letters and certificates on club registration, licences, fire certificates and bond certificates, 1950s – 70s. One folder
STA3.4.4 Lists of office holders, 1970s, 1980s. One folder

STA3.5 Property
STA3.5.1 Pavilion
STA3.5.1.1 Correspondence, estimates, notes, plans and planning permissions for building, 1960. One folder
STA3.5.1.2 Correspondence, estimates, notes, plans, planning permissions and questionnaire for wc, showers and changing rooms, early 1970s. One large bundle
STA3.5.1.3 Correspondence on modifications, 1986. One small folder

STA3.6 Report

STA3.7 Miscellaneous
STA3.7.1 Names and addresses of Rothamsted players in St Alban’s Sunday football league. One bundle

STA4 General
STA4.1 Register of assistant staff, c1909 – 50. One volume
STA4.2 Register of fees paid by temporary workers, 1925 – 55. One volume
STA4.3 List of staff joining Federated Superannuation Scheme for the Universities/FSSU, 1945 – 52. One volume
STA4.4 Lists of graded staff pay, deductions and contributions, 1948 – 9. One volume
STA4 includes references to named individuals and is not available for consultation

STA5 Obituaries
Taken from a variety of sources. Extracted systematically from The Rothamsted Bulletin from 2002 – June 2016 when it ceased, but some obituaries from earlier issues are also included.
**Extent and form:** 52 boxes, contents in fair condition, many in non-archive quality packaging

**Administrative history:** Created at Rothamsted. In archives before 1984 and received at intervals since then.

**Custodial history:** Unknown before transfer to archives.

**Accruals:** Possible but unlikely.

**Existence of copies:** None known

**Related material at Rothamsted:** Extensive. These boxes are not the complete archives of the Statistics Department founded in 1919 but miscellaneous items that have come to the archives at random. In 2012, the department of Computational and Systems Biology holds a substantial quantity of archives.

**Related material in other repositories:** Possible but none known

---

**Access and Copyright:**

Contact the Librarian: phone: 01582 763133 ext. 2657
e-mail: library@rothamsted.ac.uk
E J Russell in *A History of Agricultural Science in Great Britain* says the Statistics Department was started in 1919 with RA Fisher and one mathematician; in 1983, with Computing, it formed Biomathematics. The archives below are not the complete archive of statistical work at Rothamsted.

**STATS1** Memo on the use of statistics and the case for additional staff, undated. *One folder*

**STATS2** Draft for paper on variations in wheat yield, possibly by RA Fisher for the Journal of Agricultural Science, volume XI, part 2. *One folder*

**STATS3** Survey of fertilizer practice: original survey tabulations, preliminary tabulations for more investigations, tabulations and tables on types of fertilizer used, files by county, general files, late 1930s – early 1950s. *33 files in three boxes.* Note: files not examined – information taken from list with files. There were numerous other boxes relating to this Survey in the then Statistics Department in the 1980s *but these are no longer there.* There is no indication why these files were separated from the bulk of the collection.

**STATS4** The following items are the contents of three boxes that came to the archives from the Statistics Department in 2002, together with copies of Rothamsted General Survey Program (RSGP) manuals withdrawn from the Library in 2016. They have not been numbered individually as they may in future be returned to Statistics or transferred to a repository specializing in the history of computing. All are one file unless otherwise indicated. The titles are copied from the files.

**Computer department**
- Introductory Guide to RGSP, 1976
- Program Manual for Rothamsted General Survey Program part 1, 2nd ed. 1975 (PM 1)
- Program Manual for Rothamsted General Survey Program part 1, 3rd ed. 1976
- Program Manual for Rothamsted General Survey Program part 2, 1973 (PM/2)
- Rothamsted General Survey Program (RGSP) Prospectus, 1977
- Program guide: GLIM release 3, 1978 (PG 134/5)
- Maximum Likelihood Programme, 1980
- Genstat manual, 1983
- Genstat and Experiments, notes for readers of output, 1975

**Programme and programming facilities available on the Rothamsted Orion**

1 – 63
64 – 89 (two copies, probably duplicates)
Simulation (two copies, probably duplicates)

**Surveys and experiments programme**
Provisional description, 1963
Mark 1, 1966

**Miscellaneous Rothamsted**
Chapter II of ‘Design from the Computer’ by GV Dyke, undated
Four files with title ‘Bats’ and with note attached ‘This was always going to be written up but never was. By Howard Simpson initially. Ruth 13.1.95.’

**Miscellaneous not Rothamsted**
Bibliography on design of experiments by Herzberg and Cox, 1958
DSIGN users’ manual, 1974 from ARC Unit on Statistics.

**Newsletters**

**STATS5**
Administrative archives mid 20th century onwards, found in the Fisher Building after the department of Biomathematics and Bioinformatics moved to another part of the Rothamsted site; includes reference to named individuals, not available for consultation. *Eight boxes*

**STATS6-STATS 20**
Files previously identified as ‘Statistics Archives’ transferred to the Library Archives in December 2011. These files were identified as the ‘Statistics Archives’ before the mid-1980s. They were not arranged systematically and it was not clear why they were identified as the Statistics Archives. They have been rearranged so as to bring together records of named individuals, and material previously catalogued at STF31 has been incorporated into sections STATS6.5 and STATS7.11.

**STATS6**
**RA Fisher**
Rain and longitude: Hertfordshire rainfall correlations. 1919
Rainfall: monthly correlations, Rothamsted, Aberdeen, Borrowdale. N. d.
Rain: analysis by monthly totals. N. d.
Rain: Hertfordshire. N. d.
Rainfall: correlations, Rothamsted, Aberdeen, York. N. d.
Microplots: Correspondence with Fisher and figures on work by Colonel Chance of Salisbury on microplot experiments, 1920.

**STATS6.2**
Index numbers: postcards to Fisher from K. C. Smith of LSE with totals of wholesale prices and related graph. 1922-1933
Wheat: Broadbalk - calculations on dressed grain. Studies in crop variation: an examination of the yields of dressed wheat from Broadbalk, JAS Volume XI, 1921: data and notes. Phenological observations: mainly Hertfordshire and including observations by staff members Brenchley, Glynne and Warington, 1921 –1924. One box

STATS6.5 RA Fisher and F Yates “Statistical Tables for Biological, Agricultural and Medical Research” Working papers and correspondence. This section includes material previously catalogued at STF31. 1st ed. 1938. Manuscripts, drafts and proofs; reviews. 2nd ed. 1942. Calculations with printed draft; working papers and correspondence. 3rd ed. 1944-1950. Correspondence. 3rd ed. 1951-1953. Correspondence. Two boxes

STATS6.6 RA Fisher and F Yates The 6 x 6 Latin squares, Proceedings of the Cambridge Philosophical Society, Volume XXX, 1934: data

Rothamsted Research - Archive Catalogue
Samuel virus work. Analysis of variance. Experiment R45 Latin Squares
Virus inoculation
Latin Squares 5 x 5
Latin Squares 1 and 2
Latin Squares 6 x 6. One box

STATS7 F Yates
STATS7.1
A new method of arranging variety trails involving a large number of varieties, JAS Volume XXVI, 1936: data and notes. 
Soil temperatures. N. d. 
Miscellaneous. N. d. 
Incomplete Latin squares, JAS Volume XXVI, 1936: data. 
An analysis of replicated experiments when the field results are incomplete, Empire Journal of Agriculture, Volume I, 1933: data. 
Potato experiments with different forms of potash: notes. 1927-1931. 
The principles of orthogonality and confounding in replicated experiments, JAS Volume XXIII, part 1, 1933: data and correspondence. 1933-1936. One box

STATS7.2
A complex pig feeding experiment, JAS Volume XXIV, 1934: notes, figures and report. 
Contingency tables involving small numbers and the $X^2$ test, Journal of the Royal Statistical Society supplement, Volume I, 1934: data and notes. One box

STATS7.3
The recovery of interblock information in variety trails arranged in three dimensional lattices, Annals of Eugenics, Volume IX, 1939. 
F. Yates and T. Eden 
On the validity of Fisher’s Z test when applied to an actual example of non-normal data, JAS Volume XXIII, 1933: data and notes. 
F. Yates and I. Zacopanay 
The estimation of the efficiency of sampling with special reference to sampling for yield in cereal experiments, JAS Volume XXV, 1935: data and notes. One box

STATS7.4
Gold Coast Survey Dept. Report on survey and adjustment of a network of precise traverses measured between 1924 and 1930
Gold Coast Survey Dept. Notes on the application of the method of least squares to the adjustment of triangulation and level and traverse networks. 1929. By J. Clendinning and F. Yates
Gold Coast Survey Dept. Report on three chains of triangulation surveyed in the southern part of the colony during the years 1924, 1925 and 1926. Records. Part 1. By J. Calder Wood
Gold Coast Survey Dept. Tables for use in the department. 1st ed. 1929. One box

STATS7.5
File 1. 1933-1937.
File 2. 1937-1945.
File 5. 1962-1986. One box

STATS7.6
Working files and papers. (Box 1)
The evolution of a survey analysis program. 1968.
Notes on research in plant breeding and genetics. 1951.
Trials of coffee progenies. 1955.
Variable format in Fortran. N. d.
Plant diseases in the tropics. 1951.
Breeding for twins and singles. 1952-1953.
Memorandum to ARC on the relative importance of agricultural research problems. Dissemination of technical information to farmers. 1950.
Rotation experiments. 1944-1947.
The place of simple experiments on cultivars fields in agricultural development. 1953.
Elementary statistics – examples. N. d.
Estimation of sampling error of a sample with uniform sampling fraction from a sample taken with probability proportional to size (with replacement) from a large population. 1958.
Operational research. Paper from 4th Session of UN Sub-Commission on statistical sampling. 1950.
Fixed and random effects – a distinction without a difference. 1971.
Determination of research priorities. Estimation of the yield of potatoes in England and Wales by sampling methods. 1953. One box

STATS7.7 Working files and papers. (Box 2)
Incomplete blocks – Lattice design. N. d.
General factorial programme. N. d.
Fortran – key information. 1971.
Elementary statistical theory - confusion worse confounded. Misleading statistical procedures. N. d.
Statistical Tables for Biological, Agricultural and Medical Research. 7th ed. 1981-1982. One box

STATS7.8 Working files and papers. (Box 3)
Design and analysis of factorial experiments TC35. 1981
Discussion of reports on cloud seeding experiments. 5th Berkeley Symposium. N. d.
A Monte-Carlo trial on the behaviour of the non-additivity test with non-normal data. 1971.

STATS7.9 Working files and papers. (Box 4)
Design of experiments. 1950-1951.
Election. 1951.

Rothamsted Research - Archive Catalogue
STATS7.10  Working files and papers. (Box 5)
2 x 2 computations. 1981.
2 x 2 compared comparisons. N. d.
2 x 2 reply to discussion. 1984.
Tests of significance for 2 x 2 contingency tables. 1983.
Sampling methods. Chapter 10. Literature. One box

STATS7.11  Biographical material previously catalogued at STF31.
Letters from Russell to Yates. 1927-1938.
Letters re Yates Honorary Degree at University of London. 1982.
Yates one-day meeting at Imperial College on the occasion of his 70th birthday. 1972.
Reprints of Yates papers. 1930-1970. Two boxes

STATS8  T N Hoblyn
A statistical analysis of the daily observations of the maximum and minimum thermometers at Rothamsted, Quarterly Journal of the Royal Meteorological Society, Volume LIV, 1928.
Meteorology temperatures 1878-1888.
Meteorology temperatures 1888-1898.
Meteorology temperatures 1898-1908.
Meteorology temperatures 1908-1918.
Meteorology temperatures 1918-1926.
Maximum and minimum temperatures. 1878-1926.
Temperature work: analysis of variance etc. 1878-1926.
Temperature work: curve fitting etc. 1927.

FE Allan
The general form of the orthogonal polynomials for simple series with proof of their simple properties, Royal Society of Edinburgh Proceedings, Volume 1930: notes and proof.

DA Boyd

STATS9  JO Irwin
On the influence of soil temperature on the germination interval of crops, JAS, volume XXI, 1931.
4” and 8” soil temperatures. 1924-1928.
Influence of soil temperatures on germination interval of crops. c1930.
Report on agricultural crop observations (manuscript). 1929.
Crop weather data: mean interval between sowing and appearance above ground. 1924-1928.
Wheat, winter oats, spring barley and swedes. Correlation between interval and mean daily soil temperature. 1924-1928.
Mean soil temperatures in germination intervals. 1925-1928.
Crop weather data. Interval between sowing and breaking into ear. 1924-1928.
Lecture on weather and the farmer and crop forecasting. 1930.

One box

STATS10  RJ Kalamkar
A statistical examination of the yields of mangolds from Barnfield, JAS Volume XXIII, 1933.
The influence of rainfall on the yield of mangolds at Rothamsted. 1933.
Thesis. Rough working sheets. N. d.
A study in sampling technique with wheat. 1932.
Experimental error and the field plot technique with potatoes. N. d.
Barnfield mangolds. Summations. 1876-1930.
Rainfall. 17 March to 17 November. 6-day periods. Curves for yield and rainfall response. 1876-1930.
Rainfall data. Miscellaneous rainfall charts. 1858-1929. One box

STATS10.2  More files on rainfall, possibly not all Kalamkar.
Coefficient of 5th degree polynomials. N. d.
Rainfall polynomials. 1854-1930. One box

STATS11  RS Koshal
Shoot height and number. N. d.
The effect of rainfall and temperature on percolation through drain gauges, 1934. JAS volume XXIV, 1934: notes and drafts.

WA Mackenzie
Studies in crop variation III: an examination of the yields of dressed grain from Hoosfield, JAS Volume XIV, 1924
Examination of the field of dressed grain from Hoosfield. 1924.
Examination of the yield of barley at Rothamsted.

AT Legge
Notes on Rothamsted electro pot culture experiments. 1918-1928. One box

STATS12  WB Mercer and AD Hall
Wheat. Variation of yield in small plots. N. d.
Wheat. Precision observations. 1932-1935.
Wheat data. N. d.
Mangel plots. N. d.
Experimental Error in Field Trials, JAS Volume IV, 1911.

O Tedin
The influences of systematic plot arrangement upon the estimate of error in field experiments. 1931.

HG Thornton
Observations on soya beans. c1930. One box

J Wishart and WA Mackenzie
Influence of rainfall in the yield of barley at Rothamsted. c1930.

J Wishart
Potatoes: fertility and contour maps and rough sheets.
Broadbalk dynamometer trials. 1920s.
Barley: Churchfield, Jealott’s Hill Farm. c1930.
Nitrogen: increase of yield. c1930.
Rainfall: effect of nitrate of soda plots on Broadbalk. c1930.
Statistical analysis of Shoby mixed grazing trials. 1927.
Sheep grazing trials at Thrussington and Bridgewater. 1925-1928.
Sheep grazing experiment, Rothamsted. 1928.
Sheep grazing trials, Bridgewater. 1926.
Phosphate grazing experiments. 1924.
Sheep grazing experiment. 1924-1926.
Uniformity trial data, Sawyers Field. 1925. One box

Barley experiments
Barley weather experiments. Reaseheath, Baghall, Bangor. 1925.
Barley grading. 1926-1927.
Barley grading. 1928.
Barley. Malting. N. d.
Barley. Hoosfield: various states of growth experimental data. 1904. One box

Miscellaneous files on notes and data
Box 1
Classical experiments. Temperature effects.
Computation times.
Confounding enumeration of interactions.
Curve fitting
Dilution series
Fisher computations. 1929
Four course rotation
Maximum likelihood
Miscellaneous computations
Oats in NIAB variety trials
Orthogonal polynomials
Park Grass dry matter. 1904-1922
Phosphates in soils
Pot culture variations
Radio integrator
Random numbers. One box

STATS15.2 Box 2
Recording procedure
Sampling methods of estimating yield from experimental plots
Soil fauna
Stones sampling
Straw manure. 1921
Sugar estimation
Turnips
Results of the Woburn experiments on the continuous growth of wheat. 1877-1918
27 designs
X² test in transformation. One box

STATS15.3 Box 3
Barometer: composition of world values by years. 17th-20th Century.
Gamma functions – half integers.
Dew Point data. 1915-1925.
Aphid numerics (infestation numbers).
Broadbalk soil sampling. 1891-1910.
Test of significance. Reply to Welch. c1937.
t.s. distributions.
Solution of equations by successive approximation.
Reduction in error due to local control. 1927-1937.
Split lattice. 1943.
Strength of figures in triangulation.
Incomplete randomized blocks, combinatorial solutions.
Graeco Latin squares. One box

Email: library@rothamsted.ac.uk
This collection of papers relating to staff members and others connected with Rothamsted is not a formal collection of staff records. Instead, it is what has found its way to the library archives and represents only a few of the many Rothamsted employees and contacts. It varies from a single document or folder for an individual to one or more boxes. It is in order of acquisition and is added to whenever something new is given to the library.

**STF1 Edwin Grey**
Personal papers including school copy book, letters, newspaper cuttings and photographs, 1870s to 1940s; testimonial for 50 years service at Rothamsted, 1922; list of ‘some old articles used in the Laboratory in the very early years’, 1922; rough notes on laboratory work, early 20th century; drafts of *Cottage Life in a Hertfordshire Village, The Old Experiments and Reminiscences of Rothamsted Experimental Station and Fields*, 1920s and 1930s. *One box*

**STF2 GC Sawyer**
Army discharge certificate, 1916. *One roll*

**STF3 AW Rymer Roberts**
Notebooks on insecticide trials on wireworms, 1916 – 8. *Three volumes*

**STF4 Winifred Brenchley**
Notebooks on work at Blakeney Point, 1919 – 22; commemorative book of staff signatures, 1948; diplomas prepared by Rothamsted staff, 1911 and undated. Copy of obituary prepared by Mary Glynne; personal reminiscences by Joan Thurston *Three notebooks; two diplomas; one folder; see also BOT*

**STF5 Margaret Holden**
Letters concerning chlorophyll-derived compounds in Leaf Protein that cause a photosensitivity in mice (1970s); miscellaneous letters from WG Frankenberg, Bill Pirie, Geoff Wiltshire, EC Large (ECL), T Eden (all 1950s – 1960s), Roy (Markham?), Robin Hill (dates uncertain) and ‘Tony’ Pirie (1977); script for a lecture on chlorophyllase; an incomplete biographical memoir; press cutting from a local newspaper (probably the Herts Advertiser); obituary (from The Mycologist); list of publications; an article by her on ‘Sir John Lawes and a brief history of Rothamsted Experimental Station from 1843 to 1901’ (1972, probably written for Harpenden Local History Society); a copy (probably late stage proof) of Phillip Nutman’s paper on the war years at Rothamsted (*Biology History* (1994), 7, 25-35) with corrections, probably made by Margaret Holden, that were not incorporated in the published paper. *One folder*

| STF26  | Michael Elliott    |

* Rothamsted Research - Archive Catalogue *
The majority of the material in this collection was donated to Rothamsted Library by Michael Elliott’s family after his death. It has not been examined in detail and most of the descriptions are Elliott’s own.

**STF26.1** National Research Development Corporation Bulletin, 51, winter 1979 – 80 with details of the pyrethrum programme at Rothamsted and Dr Elliott’s personal account of pyrethroids; abstracts and delegates' list for memorial symposium 'Future prospects for chemical insecticides', 2010. *One pamphlet, one folder*

**STF26.2** Early bioassay results, samples from SHH (SH Harper), research projects etc. 1950s; copy of PhD thesis 1952/53. *One bundle, one binder stored separately*

**STF26.3** Programmes of work (on pyrethroids), 1960s; copies of patents applied for 1965, granted 1969 (resmethrin and bioresmethrin). *One bundle*

**STF26.4** Research in the Rothamsted Insecticides and Fungicides Department, 1960s-1980s. *One bundle*

**STF26.5** Consultancy agreements and correspondence with Wellcome and University of California, Berkeley; literature notes, mid 1980s-early 1990s. *One bundle*

**STF26.6** British Technology Group correspondence on consultancy and patents, 1984-1991. *One bundle*

**STF26.7** Correspondence relating to ME’s employment at Rothamsted, 1940s-1980s; details of awards, 1970s and 1980s; handwritten copy of correspondence about the patenting of the first synthetic pyrethroid, 1961; correspondence on the history of pyrethrum growing in Kenya, 1972. *One bundle*

**STF26.8** Agricultural Research Council awards to inventors correspondence, 1874-1981. *One bundle*

**STF26.9** Agricultural Research Council awards to inventors correspondence, 1987-1988. *One folder*

**STF26.10** Correspondence relating to nominations for awards and honorary degree, mid 1980s-early 1990s; correspondence relating to the award of the SCI Environment Medal, 1993; programme for presentation ceremony for NAS membership, 1997. *One bundle*

**STF26.11** Album of photographs and signed labels presented to ME on his retirement, 1985; album of photographs of presentation of the
monograph on deltamethrin, 1982; miscellaneous photographs.  

Two albums, two folders

STF27  Blanche Benzian  
Notes on work on Knott Wood, c1940; letter from VM Goldschmidt, 1945 and letters from EM Crowther, 1946 – 51; photographs, most unidentified but including group photograph of the Chemistry Department, 1975; photograph album presented on retirement, 1976.  One folder, one album

STF28  Mary Glynne  
Dr Glynne gave most of the material in this collection to Rothamsted Library shortly before she died; similar material of hers found later at Rothamsted has been added. The papers, which include material from Dr Glynne’s co-workers, have not been sorted and include drafts and duplication. They are not in archive quality packaging.

STF28.1  Notes, data and photographs relating to Dr Glynne’s scientific work, 1920s – 60s. Includes disease data obtained from Classical Experiments, especially Broadbalk. Also samples of wheat affected by Gibellina cerealis, a pathogen that, in the UK, has only been reported from Rothamsted.  Seven boxes

STF28.2  Miscellaneous items found at Rothamsted:  
Correspondence with Sir John Russell; notes on the Plant Pathology department, possibly prepared for a book of Russell’s; notes on Rothamsted and its work and for guiding parties, 930s, 1940s; notes on conferences in Scandinavia, 1950s – 60s.
One folder
Notes on the Roman temple, with aerial photographs, 1930s – 70s. One blue folder
Photographs of Rothamsted and Rothamsted staff, 1920s – 50s, including a formal and informal one of RA Fisher. Two folders
Letters from Edwin Grey, early 1950s. One folder
List of publications and a few pamphlets. Loose
All of the above are in one box

STF28.3  Correspondence, photographs, newspaper cuttings etc. deposited by Dr Glynne’s family (see Librarian). Two boxes

STF28.4  Two albums of science-related photographs. One box

STF29  Don and Marion Watson
Photograph albums of visits to Australia, New Zealand and the United States, 1940s.
Marion Watson: papers on employment at Rothamsted including curriculum vitae and salary details, 1929 – early 1940s; general correspondence on work at Rothamsted covering work in progress, preparation of papers, building alterations and some personal and domestic matters, 1938 – 70. The correspondence is incomplete and includes letters without replies and vice-versa. Black and white photographs of buildings, crops, staff, coronation celebrations and cat ‘Sputnik’ probably taken by Marion Watson in the 1950s; album of photographs presented to Marion and Don Watson in 1971. This material was given by Betty Lennon to George Dyke and by him to Rothamsted Library in 1994. There is no supporting paperwork and the collection has not been examined in detail. Offprint of chapter on Marion Watson by Bryan D Harrison from Pioneering Women in Plant Pathology, 2008.
Don Watson: History of Rothamsted, c1973, with related notes; a study of the respiration of apples, compiled at Cambridge. Three volumes and one box

STF30  Tom Goodey
Personal interleaved and annotated copy of his book Plant Parasitic Nematodes, 1933; original drawings for work by T Goody and JB Goody, 1930s to 1950s; design for tile, 1913 and letter, 1984; biography, 1994; reminiscences by his daughter, 2000. The tile design was photographed here by a relation, possibly a niece or granddaughter, in the late 1990s. Four boxes, all except the tile drawing brought to the archives by David Hooper when he retired in 1995; the tile drawing was in the archives by 1984; the reminiscences are closed until 2020.

STF31  Number not used. Material on Frank Yates, formerly listed here, has been moved to STATS6.5 and STATS7.11
STF32  **George Cooke**
Photocopy of a paper by George Cooke on techniques for field experiments on agricultural crops, 1951; tribute by AH Bunting, 1992 and numerous photographs given to the Library by Beth Cooke via George Dyke and unsorted, early 1990s.  *One box*

STF33  **EC Large**
Numbered albums of black and white photographs of experimental work; two obituaries. *Eleven volumes and one folder. Closed until 2025, consult Librarian*

STF34  **Kay Boutwood**
Lecture notes, supporting papers and slides, received 2000.  *Two boxes*

STF35  **Roger Plumb**
Description of the Golden Jubilee Walk, 2002. *One item*
Commemorative booklet: Sir Richard Southwood, a near 60 year relationship with Rothamsted, 2004. *One booklet*
Notes, photocopies and printouts arising from work on James Wittewronge, Charles Lawes, Marianne Warde née Lawes, the Manor wall paintings and laboratory staff members, 2006 – 7.  *One folder*
Colour prints or slides of frontispiece and of pages 1 – 10, 44, 72, 97 – 9, copies of EXP 3.2 made in 1994.  *Six discs; originals in JBL5.1.*
Plans of Rothamsted estate conveyances, 1921 – 66, prepared 2003. *One folder and four rolls stored as a single roll*

STF36  **DA Louis**
Notes on scientific work and personal letters, 1884, 87. *One bundle*

STF37  **George Dyke**
Photocopies relating to JB Lawes’ published papers used in his book ‘The Record of his Genius’.  *One large bundle of photocopies*

STF38  **EC Humphries**
Photographs at work and with colleagues, of the Botany Department staff with some members identified, of the Allotment Club House being demolished, and aerial photographs, 1950s and 1960s; an article by him on ‘Development of Rothamsted from 1900 until the present day (c 1973)’ (probably written for Harpenden Local History Society).  *One folder*
Framed photograph of JB Lawes, possibly from the Allotment Club House. *One framed picture, received with the other material from Humphries and stored with the collection of scientific equipment and other material*

**STF39 Marjorie Bawden**
Notes on local history and photocopies of local material collected in the early 1990s plus notes on the Lawes family, correspondence with I Fleming of Edinburgh on Eleanor Ormerod’s portrait and notes on the family of Mary Glynne. The folder also contains Lady Bawden’s obituaries, 1994; Sir Frederick Bawden’s certificate of election as a member of the New York Academy of Sciences 1959 and his obituary and memorial service address, 1972. *One bundle; records of Sir Frederick Bawden’s scientific work are in the archives of the Royal Society.*

**STF40 Harold Gough**

**STF41 J Bennett**
Reminiscences of Rothamsted 1946 – 7, received 1997. *One folder*

**STF42 JT Martin**
Reminiscences of Rothamsted, 1929 – 51, received 1997. *One folder*

**STF43 GT Dunkley**
Newspaper and magazine cuttings, pictures and photographs relating to JB Lawes, JH Gilbert and others and to work at Rothamsted, 1854 – 1917. *One large volume*

**STF44 H Ling Roth**
Notes on agriculture, mainly handwritten but with some photographs and extracts from printed works. *Three bound volumes, one presented to Library by H Ling Roth junior in 1929*

**STF45 Thomas Wilson**
Notebook from Thos Wilson of Rivers Lodge, 1850s, with personal accounts and notes on currencies, units of measurement, weights and measures. *One notebook, plus later photographs and reminiscences (by Thos Wilson’s daughter) of Rivers Lodge*

**STF46 John Jenkyn**
Notes on Hampden Bomber crash on Woburn Farm, 1941 and memorial to F Rowney and T Barker, September 2010; notes on
Denys Morland; photocopies of letters from John Lawes to Evan Pugh and newspaper cutting. *One box*

**STF47 NW (‘Bill’) Pirie**

Correspondence with HH Mann on swayback in lambs, 1944; correspondence 1962 with Russell on Pirie’s appointment in 1940; letter from H Kay on needs of developing countries, 1964; eight letters received from NW Pirie in 1991, one found in library, 2007.

Material (mostly photographs but also some diagrams) relating to Pirie’s work on Leaf Protein (LP). Apart from a miscellaneous set, there are three sets that are labelled in accordance with the labelling on the original files: LP History; Leaf Protein Machinery Photographs 1950s – 1970s; LP Machinery 1950 – 1970, Orig 1950s, Village Units, Air Free Press etc. *There is clear overlap between the sets and some duplication, especially between the first three and the last, but the latter has been kept because most of the photographs in it are mounted (albeit very crudely) and some, but not all, are labelled.*

Also, a notebook labelled Experimental Cooking with Leaf Protein, July 1959; material (mostly photographs) relating to work on viruses (with FC Bawden), including Tobacco Mosaic Virus, Tobacco Necrosis Virus and Bushy Stunt (probably including some early examples); three books by Pirie with author’s annotations; two articles thought not to be in the Rothamsted reprint collection; notes etc relating to FC Bawden; a green album (Moore’s Modern Methods) containing travel photographs. *The notes on Bawden were probably compiled when Pirie was writing his biographical memoir on him for the Royal Society; it is not certain that all of them relate to Bawden. See also STF48. Other material relating to Pirie is held by the Royal Society. Five folders, one notebook, one album in one box; two folders, three books in second box; plus a separate diagram*

**STF48 Stan Pierpoint**

Miscellaneous correspondence etc concerning PR (pathogenesis-related) proteins, salicylic acid, a paper on Edward and Edmund Stone, and on the location of the Sheffield University Biochemistry Department; notes on the history of the Biochemistry Department (compiled to mark its 50th anniversary) including photographs, drafts of posters, and a hand-written memoir by Margaret Holden. Also material relating to Bill Pirie, including obituaries and correspondence relating to their preparation and of the Biographical Memoir prepared for the Royal Society; correspondence relating to what was probably Pirie’s last paper (not published); correspondence relating to the archiving of Pirie’s papers; correspondence relating to the

*Rothamsted Research - Archive Catalogue*
donation of leaf protein equipment to the Science Museum; correspondence with Lady Brenda Maddox concerning Rosalind Franklin and her interactions with Pirie and Bawden (with copies of 2 letters exchanged between Pirie and Franklin). Pierpoint worked with Pirie and was also a close personal friend who helped to sort-out Pirie’s scientific affairs after his death, which is why this material relating to Pirie, including letters written by him, are archived here rather than under STF47 (NW Pirie). Four folders, rolled-up poster drafts

**STF49**  
**David Jenkinson**  
Papers and correspondence relating to Jenkinson’s Fellowship of the Royal Society; the preparation of obituaries on George Cooke; a visit to the USA in 1991 (including participation in a workshop on Stabilization and Turnover of Organic Matter in Soil); contributions to a review for the IPCC (Intergovernmental Panel on Climate Change); a research project with KARI (Kenya) on Maintenance of Soil Fertility and Organic matter (jointly with PK Leech); transcript of British Library Oral History of British Science interview (recording available at https://www.bl.uk/voices-of-science/interviewees/david-jenkinson); funeral programme and order of service. Few of Jenkinson’s papers have survived at Rothamsted, and, as far as is known, none were donated to other archives. Three folders

**STF50**  
**PH Gregory**  
Papers relating to work on spore dispersal gradients, 1960s (with some additional, later, material from BDL Fitt). Two folders

**STF51**  
**TW Tinsley**  
TW (Tom) Tinsley (1924-2010) joined Rothamsted in 1948 to work on potato viruses and was subsequently seconded to the West African Cacao Research Institute, taking up a permanent post there in 1957. He returned to the UK in the early 1960s and played an important part in the creation of the Institute of Virology at Oxford. After Tinsley’s death in 2010, Prof Stefan Buczacki was asked to sort his papers and offered those he felt should be preserved to the Rothamsted archive in 2013.

**STF51.1**  
Notes on viruses, the history of virology, research visits to China, Malaysia, Egypt, the USA and Canada. 9 notebooks; 1 folder.

**STF51.2**  
Notes and correspondence on the history of cocoa cultivation in the Far East, South America and West Africa. 5 folders; 1 notebook.

**STF52**  
**FG Gregory**  
A small collection of personal letters from Professor F.G. (Jack) Gregory to his friend George Walton, written between December
1959 and February 1961. They contain several references to Phillip Nutman. Donated by Bill Walton, son of George Walton and godson of Gregory. Gregory’s association with Rothamsted began in about 1919 when he worked for what later became the Imperial College Research Institute of Plant Physiology, of which he was later Director. *One folder.*

**STF53 Maureen Lacey**
Notes and overhead projector slides for lecture on Development of Aerobiology at Rothamsted; notes for Airborne Spores: a Personal Perspective, 2006; notes on her work at the Antibiotics Research Station; copies of artwork produced for the British Society of Plant Pathology, 1997-1990. *3 folders*

**STF54 Myrtle Hughes**
Myrtle E. Hughes worked as a Clerical Officer in the Field Experiments Section from 1940 until her retirement in 1984. Certificate accompanying the award of the Silver Jubilee Medal 1977. *One certificate. Medal stored in medal box in Early Book Room*

**STF55 Mary T. Franklin**
Mary Franklin, Nematologist, retired 1971. Retirement card and tributes. *One folder*

**STF56 John A. Nelder**
Research notes
- Box 1 Survey of weedkiller punch cards and notes from 1961
- Box 2 Research Notes & preparations for publications and Correspondence Woburn Market Garden, Experiments in Glasshouses, Rothamsted Experiments 1945-47 Vegetable trials
- Box 3 Research Notes 1950’s. *Three boxes*
**WOB**  
**Woburn, mid 19th century onwards**

Woburn Experimental Station was established in 1876 by the Duke of Bedford. It was managed by the Royal Agricultural Society and the first directors were the chemists Augustus Voelcker and his son John Augustus; Lawes was involved with designing the experiments, which originally were to study the effects of different feedstuffs on the value to crops of the resulting farmyard manure. The range of experiments widened and the RAS continued funding the Station until 1921. Rothamsted has managed it since 1928.

The Woburn archives at Rothamsted begin in the late 19th century and are of the general administration, including a long series of correspondence, and of the experimental work. There are also some archives of HH Mann, the agricultural scientist who worked both at Woburn and in India.

Woburn Fruit Farm: in 1894 the Duke of Bedford provided land for Spencer Pickering to carry out experiments on fruit growing and development. The Duke gave up the experiments in 1918 and Spencer Pickering died in 1920. ‘The Scientific Work of the late Spencer Pickering’ which includes an obituary was published by the Royal Society in 1927. Pickering lived in Harpenden and worked at Rothamsted for a while in the 19th century but the Fruit Farm was not part of the Rothamsted experiments. These archives were in the Annexe strongroom before 1984 but there is no indication why they came there.

**WOB1** Administration: general

**WOB1.1** Director’s (EJ Russell’s) reports to the Lawes Agricultural Trust, 1922 – 36. *One folder*

**WOB1.2** Inventories, plans and schedules, 1922 – 35. *One folder*

**WOB1.3** Inventory and valuation, record of the state of cultivation of the farm, letters and notebook, 1936 – 7. *One bundle*

**WOB1.4** Visitors’ books, 1894 – 1967. *Four volumes*

**WOB1.5 – 9** Extracts from Field Plots Committee and other committee minutes of decisions and information on Woburn experiments, 1950s – 70s. *Five green binders*

**WOB2** Administration: correspondence

**WOB2.1** Letters on work at Woburn, including a letter from JH Gilbert on buying a soil sampling frame, 1901 – 16. *One folder*

**WOB2.2** Letter book, 1917 – 8, with some letters very faint. *One volume*

**WOB2.3** Correspondence of JA Voelcker, EJ Russell, RASE, Woburn Park Estate Office and the Ministry of Agriculture, 1920s – 30s. *One folder*

**WOB2.4** Letters identified and probably put together by HH Mann,
late 1920s – early 1940s: contracts and estimates for work; electricity supply; enquiries for Woburn information; experimental methods at Woburn; history of Woburn (Dr Voelcker); library and journals at Woburn; meteorological records: rainfall; records of Woburn: general. *Eight folders tied into one bundle*

**WOB2.5**  
Letters to HH Mann from A Voelcker, EJ Russell, WG Ogg and others on Woburn administration, with some draft replies and reports, 1930s – 50s. *One large bundle*

**WOB2.6**  
Letters of HH Mann, EJ Russell and JA Voelcker and others on the Hills Bequest, 1930s, 1982. *One bundle*

**WOB2.7**  
Letters of HH Mann and W Barnicot on financial matters, 1936 – 7. *One bundle*

**WOB2.8**  
Letters to HH Mann from BA Keen and EJ Russell, with draft replies and reports, 1936 – 7. *One bundle*

**WOB2.9**  
Correspondence of BA Keen and EJ Russell with HE Armstrong, Sir M Burrell, Lord Clinton, Sir JB Farmer and Sir David Prain on Woburn experiments, 1936 – 7. *One bundle*

**WOB2.10**  
HH Mann’s administrative correspondence, with supporting pamphlets, 1940 – 50s. *One large bundle*

**WOB2.11**  
Letters with results of tests on sick animals at Woburn, 1930s – 50s. *One folder*

**WOB2.12**  
Correspondence with Nematology Department 1957 – 77. *One bundle*

**WOB2.13**  
Letters and forms, 1966 – 80, relating to maintenance of oil pipeline, with plan, 1980. *One small bundle*

**WOB3**  
**Experiments: working papers and results**

**WOB3.1**  
Experimental sheets: notes and figures from crop and feed experiments, late 1880s – late 1890s. *Seven bundles, one folder*

**WOB3.2**  
Animal feeding and dung making: day books and notebook for bullock and sheep experiments, 1880s – 1920s. *28 notebooks in two boxes*

**WOB3.3**  
Permanent barley experiments figures, 1888 – 9. *One notebook*

**WOB3.4**  
Permanent wheat and barley experiments figures, 1890.
One notebook

WOB3.5 Swede finger and toe experiments figures, 1896 – 1900. Four notebooks

WOB3.6 Field experiments record book, late 19th, early 20th century. One notebook; plans of field experiments at Rothamsted and Woburn, 1946, 1952 – 9 are stored at FX5

WOB3.7 Weed experiment figures, 1899 – 1902, 1911 – 5. Two notebooks

WOB3.8 Pot experiment record book, 1906. One notebook

WOB3.9 Calf rearing and tuberculosis: record books, correspondence, minutes and notes, 1911 – c1920. One box

WOB3.10 Woburn Soils PB (permanent barley), figures from 1927 and 1876. One notebook

WOB3.11 Green manuring experiments: figures, correspondence, notes, pamphlets and extracts from printed works, 1920s – 1940s. Two boxes

WOB3.12 Sewage sludge experiments, W/RN/4, 1940 – 57. This is the world’s longest sewage sludge experiment. Johnny Johnston continued work on it from the late 1950s onwards and may have other files. Five files from Steve McGrath, 2002

WOB3.13 Notes and plans for cropping, 1940s to 1970s. One bundle

WOB3.14 Notes, letters and tables on fertilizing, 1960s to 1980s. One bundle

WOB3.15 ‘Results book from 1909’, 1909 – 20s. One volume

WOB4 Experiments: correspondence and supporting papers

WOB4.1 Artichokes: notes and correspondence on growing artichokes at Woburn, 1957 – 62. One bundle

WOB4.2 Barley pot experiments: figures and correspondence, 1929 – 33. One folder

WOB4.3 British Non-Ferrous Metals Research Association: correspondence relating to metal specimens buried in Lansomes Field for work on corrosion, 1930s – 60s. One bundle

WOB4.4 Broccoli: correspondence, 1935 – 8. One folder
WOB4.5 Carrots: correspondence and notes on 1941 carrot experiments. *One bundle*

WOB4.6 Clover sickness: correspondence, notes, draft and printed papers, 1930s – 60s. *One bundle*

WOB4.7 Concentrated organic manures, carrots and kale: correspondence, mainly of Mann and Watson, 1930s. *One bundle*

WOB4.8.1 Continuous/permanent wheat and barley: various tables, diagrams, letters and reports, 1920s – 50s, in no apparent order but including figures from late 19th century. *Three bundles, one folder*

WOB4.8.2 Continuous/permanent wheat and barley, computer printouts, data sheets, diagrams, notes and summaries for thesis by MC Igbokwe on nutrient cycles in cereals grown continuously and in rotation on the light sandy loam at Woburn with special reference to nitrogen fertilising, 1977. *Three boxes, three green binders; copy of thesis in Library*

WOB4.9 Equisetum: correspondence, 1935. *One folder*

WOB4.10 Fallowing: effect on wheat and barley in very exhausted lands: draft and printed paper, letters on preparation for printing, 1940s with earlier notes. *One bundle*

WOB4.11 Grass: correspondence, late 1920s, early 1930s. *One folder*

WOB4.12 Hyganic fertilizer: correspondence, mainly Mann, Brenchley and Watson, report and figures, 1937 – 8. *One bundle*

WOB4.13 Kale: correspondence, notes and reports from Mann, Russell, Voelcker and Watson, 1932 – 5. *One bundle*

WOB4.14 Lettuce: notes and reports, 1942 – 3. *One bundle*

WOB4.15 Linseed: reports and figures, 1948 – 9. *One bundle*

WOB4.16 Lucerne: correspondence, 1928. *One folder*

WOB4.17 Leucite: correspondence and figures, late 1920s – 50s. *One folder*

WOB4.18 Magnesia: notes for paper, 1930s. *One bundle*
WOB4.19 Millets: correspondence, 1940s, 50s. One bundle

WOB4.20 Plant competition: barley and chickweed, barley and Agrostis gigantea, barley and clover, rye grass and clover, correspondence and reports, 1930s – 50s. Four bundles, tied as one

WOB4.21 Potatoes: notes and figures, 1929 – 30, 1950s. One folder

WOB4.22 Pyrethrum: correspondence of Mann, Tattersfield, Watson and CT Gimingham of Ministry of Agriculture, 1933 – 9. One folder

WOB4.23 Radishes and soil texture: correspondence and figures, Mann, Questner, Russell, 1941 – 3. One folder

WOB4.24 Rotation: unexhausted value of cake and corn, Stackyard, 1928 – 36. One bundle

WOB4.25 Soya beans and maize: correspondence, 1930s – 50s. One large bundle

WOB4.26 Spurrey and wild oats: correspondence of Mann, Hubbard, Thurston, with printed papers, 1940s, 50s. One bundle

WOB4.27 Sugar beet manurial and cultivation experiments: reports, diagrams, correspondence of Mann, Cochran, Warren, Watson and Yates, 1930s – mid 1940s; sugar beet seed: Mann's correspondence, reports, papers on manuring for sugar beet seed, 1941 – 5; sugar beet vernalisation: Mann's correspondence on vernalisation of sugar beet seed, 1942 – 4. One box

WOB4.28 Sulphate of ammonia on wheat: correspondence of Mann, Barnes and Watson, with notes and figures, 1934 – 6. Three bundles

WOB4.29 Swayback in lambs: correspondence of Mann and the Ministry of Agriculture with figures and printed papers, late 1940s and 1950s. One folder

WOB4.30 Sweet lupins: correspondence, notes and reports on lupin experiments, 1940s – 50s. One bundle

WOB4.31 Take all and eyespot: correspondence of Mann, Salt and Witts with tables, papers and reports, 1950s. One bundle

WOB4.32 Take all in wheat and barley: correspondence of Mann, Garrett and Watson with tables and reports, 1940s. One folder
WOB5  Farm
Joint records of Rothamsted and Woburn farms are kept with Rothamsted farm records.

WOB5.1.1 – 44  Cultivation or field notebooks, 1882 – 1958. 41 small notebooks and three binders in five boxes

WOB5.2.1  Farm diaries, 1946 – 1998; 2000 - 2007. 10 boxes

WOB5.2.3  Woburn field diaries, 1962-1995. 2 boxes, 4 bundles

WOB5.2.4  Office field diaries/plans, 1974-1990. 4 boxes

WOB5.3  Weights, rainfall and stock tables, 1881 – 6. One notebook

WOB5.4  Silo temperatures, 1884 – 9. One notebook

WOB5.5  Cropping book, 1887 – 98. One notebook

WOB5.6.1, 2  Field weight books, 1897 – 12. Two notebooks

WOB5.7  Soil sampling book, late 19th, early 20th century. One notebook

WOB5.8  Stackyard Field soil record book, 1898 – 9. One notebook

WOB5.9  Implement and equipment lists, 1940s – 80s. One folder

WOB5.10  Farm reports, 1946 – 77. One bundle

WOB5.11  Soil hardness measurements, undated, probably 1950s. One notebook

WOB5.13  Figures for fertilizer use, 1971 – 80. One notebook

WOB5.14  Valuations, 1991. One notebook

WOB6  Finance
WOB6.1.1 – 4  Petty cash books, 1918 – 36 (not a continuous series). Four volumes

WOB6.2.1 – 7  Cash books, April 1927 – March 1947. Seven volumes

WOB6.3.1 – 17  Ledgers, September 1927 – September 1939;
October 1940 – September 1941; October 1942 – September 1947. 17 volumes in two boxes

**WOB6.4**  
Statements of account, 1922 – 6. One folder

**WOB6.5.1, 2**  
Cash receipts and payments books, October 1948 – September 1951. Two volumes

**WOB6.6**  
Wages book, June 1927 – March 1930. One volume

**WOB6.7**  
Postage book, 1956 – 64. One volume

**WOB7**  
Fruit farm

**WOB7.1**  
Plot descriptions and experiment details, c1894 – c1912. One large volume

**WOB7.2**  
Crop record book, c1895 – c1919. One large volume

**WOB7.3.1, 2**  
Results and notes on experiments, not exclusively fruit experiments, 1895 – c1917. Two volumes

**WOB7.4, 1 – 12**  
Notes and figures on experiments, treatments and results, 1908 – 9. 12 small volumes in box

**WOB7.5**  

**WOB7.6**  

**WOB8**  
HH Mann

**WOB8.1**  
'Abstracts from Memoirs, Review etc', late 19th century. One notebook

**WOB8.2**  
‘Extracts on various subjects’ (political, religious, social), late 19th century. One notebook

**WOB8.3**  
Correspondence from Poona Agricultural College, especially with the Indian Tea Association, 1907 – 9. One bundle

**WOB8.4**  
'On the Flocculation of Deccan Soils' and 'Flocculation Experiments' c1910. One folder

**WOB8.5**  
Correspondence, notes and reports on work with tea, mainly in Georgia, with photographs of Georgia, and including also correspondence on tea growing in Africa and India, 1929 – 30. One bundle

**WOB8.6**  
Notes on visit to Tanganyika and related printed papers, 1930s. One bundle
WOB8.7 Notebook, originally Mann’s, beginning with lists of references to works on agricultural science, probably compiled about 1915, and continuing with lists of figures in an unidentified hand, 1930s – 1950s. *One volume in poor condition*

WOB8.8 Obituaries and related notes, 1961 – 3; reminiscences by GV Dyke of Mann and TW Barnes, 1991. *One folder*

WOB8.9 Samples and drawings of fodder grasses of North India, probably compiled by Mann, early 20th century. *One volume*

WOB9 Meteorology
*Additional Woburn records are stored in the MET section of the archives*

WOB9.1, 2 Fruit farm meteorological registers, 1895 – 1919. *Two large volumes*

WOB9.2 – 6 Meteorological Observations, 1928 – 67. *Six volumes*

WOB9.4 Meteorological data, 1967 – 87. *One box*

WOB9.5 Agricultural meteorological scheme: observers' handbook and correspondence on Woburn's participation, 1929 – 36. *One bundle*

WOB10 White books

WOB10.1 Woburn white book rotation experiments, 1966 – 77. *One green binder*

WOB10.2 Woburn white book crop sequence experiments, 1967 – 77. *One green binder*

WOB10.3 Woburn annuals 1970 – . *One green binder*

WOB10.4 Woburn Rotations and Crop Sequences 1978 – 87, excluding RN/3. *One green binder*

WOB10.5 Woburn RN/3 1978 experiments. *One green binder*

WOB10.6 Woburn RN and CS experiments 1988 – 95. *One green binder*

WOB11 Awards, maps, newspaper cuttings and photographs
WOB11.1  Woburn Experimental Station awards from the Franco-British exhibition 1908 and the Turin International Exhibition 1911. *Six items, rolled, some damaged*

WOB11.2.1  Plans, some blueprints, of Woburn Experimental Farm, based on OS 25” to one mile, 1928 – 48 and undated. *24 plans, stored flat*

WOB11.2.2  OS maps showing electricity supply, undated, after 1988. *Two plans, rolled*

WOB11.2.3  Plan of dairy farm one showing soil structure and pipe line, undated, after 1963. *Two plans, rolled*

WOB11.3 – 6  Photographs of experiments, late 19th – early 20th century, with list of negative numbers. *Three large volumes and one small notebook*

WOB11.7  Photographs of buildings, experiments, fields and individuals, late 19th and 20th centuries, some including name of photographic studio. *One box*

WOB12  Miscellaneous

WOB12.1  German diploma awarded to A Voelcker, 1852. *One item in folder ADH 9*

WOB12.2  Reports on barley, with instructions from Bohemia, 1892, notes on potato experiment, 1892, weights and notes on bullock feeding experiment, 1893 – 4, weekly account of work done in the experimental fields for five weeks in 1894, (originals) and copies of letters, 1876 – 7, and reports, late 1870s, 1920s, *One large envelope, contents probably brought together from the archives of the RASE for display*
# XTRA

## Miscellaneous Small Collections

| Extent and form:          | 27 boxes  
                            | 2 <A5 notebooks          |
|--------------------------|-------------------------|
| **Administrative history:** | Given to the archives by staff members after 1984 |
| **Custodial history:**   | Kept in departments or elsewhere before transfer to archives |
| **Accruals:**            | Likely                  |
| **Existence of copies:** | There will be copies elsewhere of printed items |

Some small groups of archives are not included in the main sequence. They are generally items that have come to the Library Archives at random and where there is no related material in the archives that they may be added to. Access may be restricted.

**Conferences and meetings**

IAALD European Regional Conference: programme for visit to Rothamsted and Commonwealth Bureau of Soils, 1963. *One folder*

Insectary: programme for official opening, 1990. *One folder*

Resistance 1997: programme and abstracts. *One comb binder*

Open Weekend 1999: minutes, correspondence and other papers. *One lever arch file*

Entomology and Nematology Open Day: information, 1997. *One folder*

Centenary Building opening: programme, photographs and speeches, September 2003. *One folder*

PhD Symposium 2005: programme, abstracts, speakers’ details. *One pamphlet*

‘A celebration of 150 years of the Park Grass Experiment’: explanatory leaflet, abstracts and bibliography 2006. 160 years of Park Grass meeting programme, botanical overview and postcards *One folder*

Rothamsted Insect Survey 50th Anniversary: programme, leaflets, sample certificate, 2014. *One folder*

Public events and meetings flyers 2015- *One folder*

Total one box

**Departments**

**Bee Research**

Minutes and circulated papers of the Bee Research Advisory Committee, 1922 – 40. *One volume, one folder*

Licence exempting RES from the Foul Brood Diseases of Bees Order, 1942. *One item*

Receipts for payments to Special Bee Research Fund, 1943 – 61. *One volume*

Photographs of bee keeping, probably early 1940s, with explanatory letter from Norman Carreck, 1997. *One folder*

Photographs of meeting or event concerning bees on beans, undated, late 20th century. *One folder*
Notes on Bee research at Rothamsted, 1998 and 2006. *Two documents*  
All the bee research archives are in one bundle

**Entomology**
Entomology Department book of quotations, May 1986-. *One notebook*

**Nematology**
History of the Nematology Department. *One printed brochure*

**Plant Pathology**
Accounts, 1918 – 25, ledger 1918 – 9. *Two volumes*  
Notes on the history of the Department, probably compiled by Mary Glynne, late 1950s and notes prepared for green book, 1973. *One folder*  
Administrative record: details of staff, including temporary and overseas staff, visits abroad, vehicles etc, mainly 1960s. *One green binder*

**Plant Physiology**
Accounts, 1939 – 47 (all including some general accounts and one also including LAT accounts for 1889 – 90). *One volume*

**Insecticides**
Departmental annual reports and associated correspondence, 1918-1951; Five-yearly reports, 1939-1945. *Four folders*

Miscellaneous: reports on soil analyses, undated. *One volume, to be moved if related records are found elsewhere*  
Total five boxes

**Stores / Purchasing**
Two notebooks:  
Particulars relating to the purchase and use of Rectified Spirits of Wine in the Laboratory commencing April 1903-1920  
Particulars relating to the purchase and use of alcohol in the Laboratories 1921-1933  
*Total 2 notebooks*

**Health and Safety**
Health and Safety Committee and sub-committees (biological, fire, first aid, radiations, safety advisers) minutes and papers, 1979-1986; Safety manual, 1988; Genetic Manipulation Local Rules, 1999. *One folder; Two pamphlets*  
*Total one box*

**Institute of Arable Crops Research**
Theme Bulletins, 1995 – 6. *Eight pamphlets*
‘Progress towards a reinvigorated Rothamsted’: part of a confidential briefing prepared for RES Board meeting, 2000. *One binder; consult the librarian for access*  
*Total one box*

**Press releases, news cuttings and occasional publications**  
Event publicity, information sheets etc produced by Rothamsted, 2000-; news cuttings, 1940s-1990s; 2017-. *One box, one pamphlet box.*

**Rothamsted International**  
Campaign Manager’s Report, 1992; Information pack, 1993 and three year review, 1993 – 6  
Newsletter, 2010 – 11. *One pamphlet*  
*Total one box*

**Royal family**  
ROY1 Letter on possible visit of King George V and postcard of the Russell Building illuminated for Jubilee Celebrations, 1935. *Two items*  
ROY2 Newspaper cuttings and photographs of the Duke of Edinburgh’s visit, 1954. *One folder*  
ROY3 Dukes of Gloucester: photographs of visit, 1955 and programme for visit, 2004. *Four items*  
*Total one box; see AY2 (Anniversary Year archives) for Queen Elizabeth II’s visit, 1993.*

**Rothamsted Research**  
‘Making a difference: the past and future economic and societal impact of Rothamsted Research’ 2006, with supporting papers. *One folder*  
*Total one box*

**Visiting Group**  
Volume II, Biomathematics Division, 1987. *One folder in box with 1996*  
Director’s statement and programmes 201 – 46, 1996. *Two boxes*  
Director’s overview and programmes 501 – 15, 2005. *Two boxes*  
*Total six boxes and a loose folder, not numbered, consult librarian for access*
Visits
Group photographs of Pyranishnikov (Russian) and others, including WG Ogg. *This has been dated to 1928? But this is unlikely as it shows an elderly Sir William Ogg*

Photograph of visit by Danish Legation, 1934

Photograph of visit by representatives of allied governments, identified, 1942.

Photographs of visit by Charles Brannan, US Secretary of Agriculture, 1951 (Economic Co-operation Administration)

Photographs of visit by African chiefs, 1953 (Harpenden Free Press)

Photographs of visit by John Hare, Minister of Agriculture, 1958 and BR Sen of the FAO, 1959 (MAFF)

Photographs of visit by Soviet Academy, 1965 (RES)

Programme, guest list and sample letters for a visit to Rothamsted by Harpenden UDC, 1973.

*One box, contents not numbered, see also PHO*
